Relationship of Cooking Methods, Grades, and Frozen Storage to Quality of Cooked Mature Leghorn Hens Mary T. Swickard, Alice Gertrude Mildren Harkin, Betty J. Paul, 1954 **Fishery Bulletin of the Fish and Wildlife Service** ,1970

Fishery Bulletin of the ,1970 **Evaluating Office Lighting Environments** ,1989 Data from a post occupancy evaluation POE of 912 work stations with lighting power density LPD photometric and occupant response measures were examined in a detailed second level analysis Seven types of lighting systems were identified with different combinations of direct and indirect ambient lighting and task lighting and daylight The mean illuminances with body shadow at the primary task location were within the IES target values for office tasks with a range of mean illuminances from 32 to 75 fc depending on the lighting system The median LPD was about 2.36 W sq ft with about one third the work stations having LPD s at or below 2.0 W sq ft Although a majority of the occupants 69% were satisfied about their lighting the highest percentage of those expressing dissatisfaction 37% with lighting had an indirect fluorescent furniture mounted IFFM system The negative reaction of so many people to the IFFM system suggests that the combination of task lighting with an indirect ambient lighting system had an important influence on lighting satisfaction even though task illuminances tended to be higher with the IFFM system Concepts of lighting quality visual health and control were explored as well as average luminance to explain the negative reactions to the combination of indirect lighting with furniture mounted lighting Fishery Bulletin U.S. Fish and Wildlife Service,1970 **Measuring Regional Authority** Liesbet Hooghe, Gary Marks, Arjan H. Schakel, Sara Niedzwiecki, Sandra Chapman Osterkatz, Sarah Shair-Rosenfield, 2016 This is the first of five ambitious volumes theorizing the structure of governance above and below the central state This book is written for those interested in the character causes and consequences of governance within the state and for social scientists who take measurement seriously The book sets out a measure of regional authority for 81 countries in North America Europe Latin America Asia and the Pacific from 1950 to 2010 Subnational authority is exercised by individual regions and this measure is the first that takes individual regions as the unit of analysis On the premise that transparency is a fundamental virtue in measurement the authors chart a new path in laying out their theoretical conceptual and scoring decisions before the reader The book also provides summaries of regional governance in 81 countries for scholars and students alike Transformations in Governance is a major new academic book series from Oxford University Press It is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions down to subnational governments and side ways to public private networks It brings together work that significantly advances our understanding of the organization causes and consequences of multilevel and complex governance The series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars The series targets mainly single authored or co authored work but it is

pluralistic in terms of disciplinary specialization research design method and geographical scope Case studies as well as comparative studies historical as well as contemporary studies and studies with a national regional or international focus are all central to its aims Authors use qualitative quantitative formal modeling or mixed methods A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and the VU Amsterdam and Walter Mattli of the University of Oxford

Bulletin, 1906 Born Too Soon Or Born Too Small G. A. Neligan, I. Kolvin, D. Scott, R. F. Garside, 1976 Doctors psychologists physiotherapists speech therapists and others whose work is concerned with assessing the performance of children known or suspected to be suffering from a variety of handicaps are becoming increasingly interested in the possible antecedent factors Among the perinatal factors which are considered to be possibly relevant low birthweight is prominent but it is important to know whether the effects of being born too soon carry the same implications as those being born too small and what may be the effect of associated biological and social factors This knowledge is important not only as a contribution to the diagnosis but also as a help in deciding about prognosis and the likelihood of response to a particular form of treatment

Contemporary Ergonomics 2003 Paul T. McCabe, 2002-06-01 The broad and developing scope of ergonomics the application of scientific knowledge to improve people's interaction with products systems and environments has been illustrated over the past 15 years by the books which make up the Contemporary Ergonomics series Presenting the proceedings of the Ergonomics Society's annual conference the series embraces the wide range of topics covered by ergonomics Individual papers provide insight into current practice present new research findings and form an invaluable reference source The volumes provide a fast track for the publication of suitable papers from international contributors These are chosen on the basis of abstracts submitted to a selection panel in the autumn prior to the Ergonomics Society's annual conference held in the spring

The Development and Integration of Behaviour Paul Patrick Gordon Bateson, 1991-05-30 What regularities lie behind the development and organization of behaviour in animals and humans One theme emerging from this book is that ideas have to flow in both directions between the different levels of analysis between the neural and behavioural levels and between the individual and the social group Another theme is that it is not enough to identify the many factors operating in the development and integration of behaviour The processes must also be studied directly Bringing together work at different levels and studying behavioural dynamics require more knowledge and expertise than any one person can usually command Links have to be made between different disciplines and specialists have to learn to work with others who speak with what at first seem to be mutually incomprehensible scientific languages The book illustrates how this may be achieved The themes of this book are strongly related to the approach of Robert Hinde in whose honour the chapters were written
