The Making of the Scottish Countryside M. L. Parry, T. R. Slater, 2021-10-12 Originally published in 1980 this book examines the evolution of the Scottish landscape from pre historic times to the mid nineteenth century It considers the way in which the structural base of agriculture and the changing farming system came to alter the Scottish rural landscape This book with its focus on the underlying landscape processes gives a developmental view of landscape change It therefore considers the crucial question of the rate and pace of landscape change and argues that the Scottish landscape was not the product of a few brief phases of

quite rapid development but rather the result of a continual and gradual process of change It also looks at the regional variation of landscape change and establishes the importance of regional linkages in the diffusion of ideas especially in new technology

Europe's Living Landscapes Bas Pedroli, Anne van Doorn, Geert de Blust, 2014-12-22 This book is the result of three symposia of the Dutch Society for Landscape Ecology The first symposium in 2005 was about the National Ecological Network in the Netherlands The reason was that the implementation of the NEN decided upon in 1990 was halfway The second symposium in 2006 was about urban ecology and the third one to be held in 2007 will be about civil infrastructure This book does not cover the conferences completely and new contributions are added The three themes are important contexts in which landscape ecologists do their research and apply their knowledge and skills Of course there are many more subjects to hold conferences about for example climate change urbanisation agriculture landscape ecology itself etc The focus of the conferences is on the

Netherlands with its urbanisation intensive land use and water management as characteristic features Although many WLO members do their work abroad or in an international context these conferences offer a window on what happens in the Dutch context The experiences may be of value for other contexts and that is why we present the results in English The selected themes and the focus on the Dutch context are serious demarcations of what landscape ecology in the Netherlands is all about The book does not represent all research and applications of landscape ecology

Neo-Romantic Landscapes Stella Hockenhull, 2009-03-26 Neo Romantic Landscapes offers a reappraisal of the 1940s films of Powell and Pressburger focusing on their use of landscape Questioning the established notion that the two film makers owing to their non British personal roots are located as un British and other Stella Hockenhull draws a correlation between the two media of film and painting to suggest otherwise Emphasising the spiritual aspects of landscape and nature at a time when the experience and imagery of the war years generated a particular kind of affect arising from the aftermath of destruction she locates Powell and Pressburger s wartime films in their historical and cultural context notably Neo Romanticism By offering a close analysis of films such as A Canterbury Tale I Know Where I m Going Black Narcissus and Gone to Earth she finds similar aesthetic qualities in a number of British landscape paintings executed contemporaneously Drawing on press reviews for contemporary spectator response Neo Romantic Landscapes offers a redirection of Film Studies foregrounding the aesthetic pleasures of cinema in excess of narrative plausibility thus resituating Powell and Pressburger in the British cultural traditions of the visual arts

Landscapes Beyond Land Arnar Árnason, 2012-09-15 Land is embedded in a multitude of material and cultural contexts through which the human experience of landscape emerges Ethnographers with their participative methodologies long term co residence and concern with the quotidian aspects of the places where they work are well positioned to describe landscapes in this fullest of senses The contributors explore how landscapes become known primarily through movement and journeying rather than stasis Working across four continents they explain how landscapes are constituted and recollected in the stories people tell of their journeys through them and how in turn these stories are embedded in landscaped forms

The Late Medieval Landscape of North-east Scotland Colin Shepherd, 2021-10-31 The landscape of the north east of Scotland ranges from wild mountains to undulating farmlands from cosy quaint fishing coves to long sandy bays This landscape witnessed the death of MacBeth the final stand of the Comyns earls of Buchan against Robert the Bruce and the last victory in Britain of a catholic army at Glenlivet But behind these momentous battles lie the quieter histories of ordinary folk farming the land and supping their local malts Colin Shepherd paints a picture of rural life within the landscapes of the north east between the 13th and 18th centuries by using documentary cartographic and archaeological evidence He shows how the landscape was ordered by topographic and environmental constraints that resulted in great variation across the region and considers the evidence for the way late medieval lifestyles developed and blended sustainably within their environments to create a patchwork of cultural and agricultural diversity However these

socio economic developments subsequently led to a breakdown of this structure resulting in what Adam Smith in the 18th century described as oppression The 12th century Renaissance the Protestant Reformation and the Industrial Revolution are used here to define a framework for considering the cultural changes that affected this region of Scotland These include the dispossession of rights to land ownership that continue to haunt policy makers in the Scottish government today While the story also shows how a regional cultural divergence recognized here can undermine big theories of socio political change when viewed across the wider stage of Europe and the Americas

The Cultural Landscape & Heritage Paradox Tom Bloemers, Henk Kars, Arnold Van der Valk, 2010 The basic problem is to what extent we can know past and mainly invisible landscapes and how we can use this still hidden knowledge for actual sustainable management of landscape s cultural and historical values It has also been acknowledged that heritage management is increasingly about the management of future change rather than simply protection This presents us with a paradox to preserve our historic environment we have to collaborate with those who wish to transform it and in order to apply our expert knowledge we have to make it suitable for policy and society The answer presented by the Protection and Development of the Dutch Archaeological Historical Landscape programme pdl bbo is an integrative landscape approach which applies inter and transdisciplinarity establishing links between archaeological historical heritage and planning and between research and policy
