Patterns of Bias in Hollywood Movies John W. Cones, 2012 It's pretty broadly recognized that Hollywood movies contain patterns of bias but it's not just people of color or women who are hurt by this Many groups within America's multicultural society have complained over the years about negative and stereotypical portrayals of their own group members in motion pictures produced or released through the Hollywood based studios Yet as an expert on the U S film industry points out such complaints have had little impact on consistent patterns of bias in movies This book takes a broader look at the nature of negative and stereotypical movie portrayals and tracks patterns of such one-sided depictions over a longer period time As a result the patterns of bias and the source the problem become more clear The problem appears to be that most of the people who have green light authority in the U S film industry for either the production and or distribution of a motion picture share a common ethnic religious cultural background Thus the stories of their cohort and those of all other ethnic religious and or cultural groups whose members seldom achieve positions of power Hollywood are being filtered through the cultural sensibilities of a single group John Cones suggests that the solution could lie in increasing diversity at the highest levels in the U S film industry This work grew out of the observed frustration of film industry critics who have pointed out examples of bias and stereotyping in specific movies over the years only to be rebuffed by the simplistic studio arguments that such films reflect the real world and that moviegoers vote with their pocket books It can be shown that there is a consistent pattern to the choices Hollywood studio executives make with respect to the movies produced and released and the specific content of those movies and it becomes obvious that Hollywood is selectively portraying reality Moviegoers only have limited options among all of the possibilities that could be portrayed on the silver screen This book differs from other studies touching on bias in motion pictures Most such books focus on the treatment of a single ethnic religious cultural racial or other readily identifiable interest group but this study attempts to provide an overview and to identify patterns over time When the patterns of bias in motion picture content are sufficiently demonstrated and documented it becomes easier to identify the source of the bias and to explain why such bias exists

Screening the World Stuart Hanson,2019-07-26 This book charts the development of the multiplex cinema as the pre eminent form of film exhibition across the world Going from its origins in the USA in the 1960s to its expansion overseas from the mid 1980s across Europe Australia and other parts of Asia Pacific the book considers the emergence of a series of initially regional then national and then international exhibition circuits However more than a consideration of US overseas expansion on the part of companies this book examines the hegemony of the multiplex as a cultural and business form arguing for its significance as a phenomenon that has transcended national and

global boundaries and which has become the predominant venue for film viewing Implicit in this analysis is a recognition of the domination of US media multi nationals and Hollywood cinema and the development of the multiplex cinema as symbolic of the extension and maintenance of the USA s cultural and economic power With case studies ranging from European countries such as Belgium France Germany and The Netherlands to Pacific Asian countries such as Australia China Japan and South Korea this book is the first to explore the development of multiplexes on a global scale **Motion Picture**

Biographies John Cones,2015-04-01 Hollywood movies are famous for promoting negative stereotypes of all kinds especially against minorities women Southerners and Christians To what extent are biographical films selected for production according to certain biases conscious or unconscious among the Hollywood elite An expert on the U S film industry gives readers brief synopses of Hollywood biopics produced and or released from 1912 through 1994 This survey provides the basis for discussion and analysis Tracking these one sided depictions over a longer period of time the patterns of bias and the source of the problem become more clear The problem appears to be that most of the people who have green light authority in the U S film industry for either the production and or distribution of a motion picture share a common ethnic religious cultural background Thus the stories of their own cohort and those of all other ethnic religious and or cultural groups whose members seldom achieve positions of power in Hollywood are being filtered through the cultural sensibilities of a single group John Cones suggests that the solution could lie in increasing diversity at the highest levels in the U S film industry
