Authentic Learning for the Digital Generation Angela McFarlane, 2014-08-13 Why should we use technology to support learning Where does the responsibility lie to prepare young people to be active and successful cybercitizens Can we go on confiscating pupils' smartphones indefinitely *Authentic Learning for the Digital Generation* is a vital examination of young people's use of personal devices online creative communities and digital gaming It calls into question the idea of the digital native and shows clearly that the majority of young users need help and support in order to benefit from the rich learning potential of personal mobile and online technology use Written by a leading authority on the role of digital technologies in education it looks in detail at the practice and implications of learning using personal devices collaborative online spaces learning platforms user-generated content and digital games In particular approaches to solving problems building knowledge manipulating data and creating

texts are examined It offers clear strategies a vision for what effects on learning we might reasonably expect when children are given access to different types of technology and explores the challenges of managing these practices in the classroom Authentic Learning for the Digital Generation offers careful analysis at a time when there is much discussion about young people emerging from school unprepared for the world of work and often struggling to manage their personal relationships as they are exposed to strong content and harsh criticism online It considers what we know of childhood experience in a digital world and offers ways in which schools and teachers can embrace the opportunity presented by ubiquitous ownership of connected digital devices to enrich and deepen learning

Confronting the Challenges of Participatory Culture

Henry Jenkins, 2009-06-05 Many teens today who use the Internet are actively involved in participatory cultures joining online communities Facebook message boards game clans producing creative work in new forms digital sampling modding fan videomaking fan fiction working in teams to complete tasks and develop new knowledge as in Wikipedia and shaping the flow of media as in blogging or podcasting A growing body of scholarship suggests potential benefits of these activities including opportunities for peer to peer learning development of skills useful in the modern workplace and a more empowered conception of citizenship Some argue that young people pick up these key skills and competencies on their own by interacting with popular culture but the problems of unequal access lack of media transparency and the breakdown of traditional forms of socialization and professional training suggest a role for policy and pedagogical intervention This report aims to shift the conversation about the digital divide from questions about access to technology to questions about access to opportunities for involvement in participatory culture and how to provide all young people with the chance to develop the cultural competencies and social skills needed Fostering these skills the authors argue requires a systemic approach to media education schools afterschool programs and parents all have distinctive roles to play The John D and Catherine T MacArthur Foundation Reports on Digital Media and Learning
