Seventh Year Industrial Civilization In Transition:

The Seventh Year William Jackson Davis, 1979 Resettling America Gary J. Coates, 2023-06-10 Nominated for 1982 Transformational Book Award an international competition sponsored by Renewal Magazine *A Prosperous Way Down* Howard T. Odum, Elisabeth C. Odum, 2011-05-18 A Prosperous Way Down the last book by Howard T and Elisabeth C Odum has shaped politics and planning as nations states and localities begin the search for ways to adapt to a future with vastly increased competition for energy It considers ways in which a future with less fossil fuel could be peaceful and prosperous Although history records the collapse of countless civilizations some societies and ecosystems have managed to descend in orderly stages reducing demands and selecting and saving what is most important The authors make recommendations for a more equitable and cooperative world society with specific suggestions based on their evaluations of trends in global population wealth distribution energy sources conservation urban development capitalism and international trade information technology and education Available for the first time in paperback this thoughtful provocative book forces us to confront assumptions about our world s future and provides both a steadying hand and a call to action with its pragmatic analysis of a global transition Explorations in Environmental Political Theory Joel Jay Kassiola, 2015-03-04 The contributors to this volume focus on the political and value issues that in their shared view underlie the global environmental crisis facing us today They argue that only by transforming our dominant values social institutions and way of living can we avoid ecological disaster **Challenges and Opportunities** Howard F. Didsbury, Jr., 1986-09-17 Challenges and Opportunities **Nutritional Considerations in a Changing World** G. H. Bourne, 1984-03-19 *Requiem For Modern Politics* William Ophuls, 2019-05-20 This long promised sequel to Ophuls s influential and controversial classic *Ecology and the Politics of Scarcity* is an equally provocative critique of the liberal philosophy of government Ophuls contends that the modern political paradigm that is the body of political concepts and beliefs bequeathed to us by the Enlightenment is no longer intellectually tenable or practically viable Our attempt to live individualistically hedonistically and rationally has failed utterly causing a comprehensive crisis that is at once political military economic ecological ethical psychological and spiritual Liberal politics has abandoned virtue rejected community and flouted nature thereby becoming the author of its own demise By exposing the intrinsically contradictory and self destructive character of Hobbesian political systems Ophuls subverts our conventional wisdom at every turn Indeed his impassioned text reads more like a Greek tragedy than a conventional political argument He critiques feminism multiculturalism the welfare state and a host of other liberal shibboleths but Ophuls is not yet another neoconservative The aim of his thesis is far more radical and progressive offering a political vision that entirely transcends the categories of liberal thought His is a Thoreauvian vision of a politics of consciousness rooted in ecology as the moral and intellectual basis for governance in the twenty first century Ophuls holds that a polity based on a renewed erotic connection with nature offers a genuine solution to this crisis of contemporary civilization and that only within such a polity

will it be possible to fulfill the worthy liberal goal of individual self development Ophuls's work will interest and challenge a wide spectrum of readers though it will not necessarily be well liked or easily accepted No one will put down this book with his or her settled convictions about American culture intact nor will readers ever again take modern civilization and its survival for granted

The Church in Response to Human Need Vinay Samuel, Chris Sugden, 2003-02-04 An important contribution to the ongoing discussion of the church's relationship to social development this book contains the revised conference proceedings from the consultation The Church in Response to Human Need held in Wheaton Illinois in June of 1983 In the papers collected here writers from five continents consider whether the Bible indicates any method for ministry among the poor the place of the poor in God's plan God's purpose and the movement of human history the nature of the gospel of the kingdom and the interrelation of the gospel and human culture In addition to the individual papers the book includes the statement Transformation which was produced by the consultation as a whole

Adapting to the End of Oil Maynard Kaufman, 2008-09-15 Adapting to the End of Oil Toward an Earth Centered Spirituality Americans who burn more fossil fuels than any other country will have a hard time adapting to the end of cheap oil This book explains how our materialistic values evolved to make us such wasteful consumers and how corporations profit at our expense The bad news is that rising prices of oil may bankrupt our economy unless we learn how to reduce our energy use The good news is that earth centered values are being affirmed by increasing numbers of people The book shows how earth centered spirituality can help us live more modestly on the earth and preserve the climate

Materials in World Perspective D. G. Altenpohl, 2012-12-06 This is the first book in a new series Materials Research and Engineering devoted to the science and technology of materials Materials Research

and Engineering evolves from a previous series on Reine und Angewandte Metallkunde Pure and Applied Metallurgy which was edited by Werner Koster until his eightieth birthday in 1976. Although the present series is an outgrowth of the earlier one it should not and cannot be regarded as a continuation. There had to be a shift of scope and a change in presentation as well. Metallurgy is no longer an isolated art and science. Rather it is linked by its scientific basis and technological implications to non-metallic and composite materials as well as to processes for production, refining, shaping, surface treatment and application. Thus the new series Materials Research and Engineering will present up to date information on scientific and technological progress as well as on issues of general relevance within the engineering field and industrial society. Premiering the new series the present book by Dieter Altenpohl gives the reader a very general outlook in fact a position analysis of materials and the materials industry within the framework of our contemporary technological environment. It ventures moreover to forecast the changes affecting this pattern in a dynamic interdependent world. This may be an unusual way to start a scientific series; it is believed nevertheless to be an appropriate one.
