Social Policy in Post-Industrial Singapore Kwen Fee Lian, Chee-Kiong Tong, 2008-03-31 Notwithstanding the lean years that followed 1986 and 1997 sustained economic growth since the late 1970s has propelled Singapore into the post industrial age and reproduced the demographic and social structure of advanced western societies The rapid shift to a knowledge intensive economy requiring highly skilled services has resulted in a two speed society consisting of a highly competitive but rewarding sector and a marginalized population that is increasingly at risk Being avowedly anti welfarist the state for ideological reasons has resisted pressures to introduce a comprehensive welfare regime for its risk population preferring to privilege its productive citizenry Is Singapore a counterfactual to the convergence thesis by preferring to put in place a social policy driven by the belief of its leaders that the more successful a society is the more it is able to care for those who fall behind Essays in Singapore Legal History Kevin Tan, 2005 The essays in this volume are the result of an exhibition on legal history staged by the Singapore Academy of Law in 1995 After that exhibition a Legal History Sub Committee was established within the Academy to look into ways of promoting the general awareness of the roots of legal practice in Singapore It was decided that an illustrated collection of essays on selected legal history subjects might provide the right launchpad This book aims not only to bring the fascinating world of legal history to a much wider audience but also to act as a springboard for future study and research If anything it represents the beginning of a quest to making legal history a living subject
