Handbook of Cultural Intelligence

Soon Ang, Linn Van Dyne, 2015-01-28 Cultural intelligence is defined as an individual's ability to function effectively in situations characterized by cultural diversity. With contributions from eminent scholars worldwide, the Handbook of Cultural Intelligence is a state-of-the-science summary of the body of knowledge about cultural intelligence and its relevance for managing diversity both within and across cultures. Because cultural intelligence capabilities can be enhanced through education and experience, this handbook emphasizes individual capabilities, specific characteristics that allow people to function effectively in culturally diverse settings, rather than the approach used by more traditional books of describing and comparing cultures based on national cultural norms, beliefs, habits, and practices. The Handbook covers conceptual and definitional issues, assessment approaches, and application of cultural intelligence in the domains of international and cross-cultural management, as well as management of domestic activity. It is an invaluable resource that will stimulate and guide future research on this important topic and its application across a broad range of disciplines, including management, organizational behavior, industrial and organizational psychology, intercultural communication, and more.

Understanding Student Mobility in Europe Joana Almeida, 2020-04-29 Understanding Student Mobility in Europe interprets student mobility in European higher education through an active dialogue between disciplines, voices, and variables of interest. Providing the conceptual, methodological, pedagogical, and empirical foundations of an interdisciplinary approach, this book advances readers' understanding of the student exchange experience whilst outlining guidelines and resources for approaching student mobility and considering how students can gain from cross-border education. Intersecting voices from different disciplines and sojourners, including exchange students, international students, and highly skilled immigrants, the book outlines practical guidelines for intercultural curriculum development and assessment and provides insights, practical ideas, useful terminology, and resources to maximise the learning gains of this student population. Split into three distinct parts, the book initially lays the foundational substructure in which an interdisciplinary approach is based. It then addresses questions of practical application by considering the experiences of 50 sojourners in Portugal and the UK through an interdisciplinary lens and summarises the implications of interdisciplinarity with regards to student mobility in European tertiary level education. This book is essential reading for academics and postgraduate students interested in student mobility education abroad, practitioners, and policy makers at institutional, national, and international levels.
