

Understanding Centuries

When you were born, you were **0 years old** the entire time you were in your **1st year of life**; when you were **1 year old**, you were in your **2nd year of life**; and at the age of **17**, you will be in your **18th year of life**.

Did you notice how the **number** of your age is always different from your **year of life**? For example, when you're **7** you are in your **8th year of life**.

Dates in history are also figured this way, except instead of saying **1st year** or **10th year**, we talk about the **1st set of 100 years** (centuries), the **10th set of 100 years**, etc.

Take a look on the time line at the 1st set of 100 years following Christ's birth (AD 1). This range of years, from 1 to 100th is called the **1st century** because it is the **1st set of 100 years** after the birth of Christ.

A KEY TO REMEMBER!

If you're trying to remember dates, thinking in terms of centuries can really be confusing. So, whenever you hear a time period given as a century, **always translate the century into years in your head**. For example:

- When you see **14th century**, think **1300's**
- When you see **8th century**, think **700's**

The next set of 100 years, the dates in the 100's, is called the **2nd century**, and the 1700's is called the **18th century**. This is even true for the years before Christ (BC). For example, the 3rd century BC is the 200's.

Did you notice that the **years** are different from the **centuries**? For example, the year **1345** is in the **14th century**.

When you come across a century term in your reading, it's always a good idea to translate it into years in your head. For example, if you read the term **15th century**, think the **1400's**.

If you read a date or set of dates, but you'd like to describe them in terms of centuries, just drop the last two digits of the year and go up to the next number. For example, for the year **1453** you would think, "14 rounds up to 15, so it's the **15th century**."

¹ Our modern calendar was based on the traditional placement of Christ's birth at AD 1, although it is now believed Christ was actually born a few years prior to AD 1.

² Although technically a new century doesn't begin until the "01" year, people commonly consider that a new "century" begins at "00" instead of "01." Since this distinction isn't crucial to understanding centuries, for memorization's sake, it's often easier to remember that the 18th century is any date in the 1700's, the 2nd century is any date in the 100's, etc.
