*Rethinking Frank Lloyd Wright* Neil Levine, Richard Longstreth, 2023-03-03 Among the general public Frank Lloyd Wright remains the best known American architect of the twentieth century And yet his larger than life profile in the popular realm contrasts sharply with his near invisibility in academic and professional circles In *Rethinking Frank Lloyd Wright* Neil Levine and Richard Longstreth have assembled a group of eminent scholars to address this most puzzling paradox of the great

architect's career In a series of engaging and well illustrated essays the contributors draw on their wide ranging understanding of modern architecture to reveal the ways in which Wright continues to play an instrumental role in domestic and international spheres making the case for reevaluating his popular and professional reputations Prompted by the transfer of the architect's archive from its home at Taliesin West in Scottsdale Arizona to the Avery Library at Columbia University and the Museum of Modern Art this volume revisits Wright's relevance for a contemporary audience

**Wright on Exhibit** Kathryn Smith, 2022-07-12 The first history of Frank Lloyd Wright's exhibitions of his own work a practice central to his career More than one hundred exhibitions of Frank Lloyd Wright's work were mounted between 1894 and his death in 1959 Wright organized the majority of these exhibitions himself and viewed them as crucial to his self presentation as his extensive writings He used them to promote his designs appeal to new viewers and persuade his detractors Wright on Exhibit presents the first history of this neglected aspect of the architect's influential career Drawing extensively from Wright's unpublished correspondence Kathryn Smith challenges the preconceived notion of Wright as a self promoter who displayed his work in search of money clients and fame She shows how he was an artist architect projecting an avant garde program an innovator who expanded the palette of installation design as technology evolved and a social activist driven to revolutionize society through design While Wright's earliest exhibitions were largely for other architects by the 1930s he was creating public installations intended to inspire debate and change public perceptions about architecture The nature of his exhibitions expanded with the times beyond models drawings and photographs to include more immersive tools such as slides film and even a full scale structure built especially for his 1953 retrospective at the Guggenheim Museum Placing Wright's exhibitions side by side with his writings

Smith shows how integral these exhibitions were to his vision and sheds light on the broader discourse concerning architecture and modernism during the first half of the twentieth century Wright on Exhibit features color renderings photos and plans as well as a checklist of exhibitions and an illustrated catalog of extant and lost models made under Wright's supervision **Frank Lloyd Wright** Robert McCarter, 2006-06-01 Kenneth Bendiner journeys from the Renaissance to the present day through the works of artists from Rembrandt to Manet to Warhol to make the case that though understudied paintings of food are so important that they should be considered a separate classification of art a genre unto themselves

**Modern Architecture** Frank Lloyd Wright, 2021-07-13 Frank Lloyd Wright's classic account of his vision for an organic architecture in a beautifully designed new edition Modern Architecture is a landmark text the first book in which America's greatest architect put forth the principles of a fundamentally new organic architecture that would reject the trappings of historical styles while avoiding the geometric abstraction of the machine aesthetic advocated by contemporary European modernists One of the most important documents in the development of modern architecture and the career of Frank Lloyd Wright Modern Architecture is a provocative and profound polemic against America's architectural eclecticism commercial skyscrapers and misguided urban planning The book is also a work of savvy self-promotion in which Wright not only advanced his own concept of an organic architecture but also framed it as having anticipated by decades and bettered what he saw as the reductive modernism of his European counterparts Based on the 1931 original for which Wright supplied the cover illustration this beautiful edition includes a new introduction that puts Modern Architecture in its broader architectural historical and intellectual context for the first time The subjects of these lively lectures from Machinery Materials and Men to The Tyranny of the Skyscraper and The City move from a general statement of the conditions of modern culture to particular applications in the fields of architecture and urbanism at ever broadening scales Wright's vision in Modern Architecture is ultimately to equate the truly modern with romanticism imagination beauty and nature all of which he connects with an underlying sense of American democratic freedom and individualism *Fallingwater* Justin Gunther, Scott W.

Perkins, 2025-04-01 An international treasure on the UNESCO World Heritage List Fallingwater is a total work of art This book an exciting new look at a masterpiece is a revelation for the first time seen here in its fullness Designed by Frank Lloyd Wright for Edgar Kaufmann Sr his wife Liliane Kaufmann and their son Edgar Kaufmann Jr Fallingwater is lauded for its architectural daring and drama Here the Kaufmanns sought to live in harmony with the natural world The rooms of the house reflect this ideal and remain suffused with a natural aesthetic that embraces stone and wood handwork and craftsmanship In the living room the great stone floor flows riverlike toward the horizon of Wright designed built-in sofas and large paned casement windows where views open to balconies to forest and to cascading falls From here the hatch opens to the flowing stream below Pools and the waters of Bear Run were beautiful and for swimming Relaxed elegance was the order of the day Delicacy softness tactility are everywhere in evidence This atmosphere pervades the whole and serves as an organic setting

for the Kaufmanns collection of objects paintings textiles sculpture and products of craft that enrich and awaken the corners and nooks secreted here and there on the multiple layers and throughout the rooms of the house But much more than the sum of its parts and what it holds Fallingwater itself is art total and sublime **Wright and New York** Anthony Alofsin,2019-01-01 This dazzling dual portrait of Frank Lloyd Wright and early 20th century New York reveals the city's role in establishing the career of America's most famous architect *Essays on Ayn Rand's The Fountainhead* Robert Mayhew,2007-01-01 Ayn Rand's *The Fountainhead* is still remembered and enjoyed today as the philosopher's first best selling novel In this unique study of *The Fountainhead* Dr Robert Mayhew brings together historical literary and philosophical essays that analyze the novel's style its use of humor and its virtues of productivity independence and integrity The essays make extensive use of previously unpublished material from the Ayn Rand Archives offering a new collection of material to explore and consider This book leads through the creation publication and reception of the 1943 novel that made Rand famous Mayhew's collection of essays offers an insightful and critical perspective on the much regarded novel and is a necessary read for anyone interested in Ayn Rand and great American literature **Architecture and Design at the Museum of Modern Art** Thomas S. Hines,2019-01-22 A comprehensive and fascinating look at the history of the Museum of Modern Art's Architecture and Design Department under the leadership of the influential curator Arthur Drexler Arthur Drexler 1921 1987 served as the curator and director of the Architecture and Design Department at the Museum of Modern Art MOMA from 1951 until 1986 the longest curatorship in the museum's history Over four decades he conceived and oversaw trailblazing exhibitions that not only reflected but also anticipated major stylistic developments Although several books cover the roles of MoMA's founding director Alfred Barr and the department's first curator Philip Johnson this is the only in depth study of Drexler who gave the department its overall shape and direction During Drexler's tenure MoMA played a pivotal role in examining the work and confirming the reputations of twentieth century architects among them Frank Lloyd Wright Le Corbusier Richard Neutra Marcel Breuer and Ludwig Mies van der Rohe Exploring unexpected subjects from the design of automobiles and industrial objects to a reconstruction of a Japanese house and garden Drexler's boundary pushing shows promoted new ideas about architecture and design as modern arts in contemporary society The department's public and educational programs projected a culture of popular accessibility offsetting MoMA's reputation as an elitist institution Drawing on rigorous archival research as well as author Thomas S Hines's firsthand experience working with Drexler *Architecture and Design at the Museum of Modern Art* analyzes how MoMA became a touchstone for the practice and study of midcentury architecture *Architecture's Odd Couple* Hugh Howard,2016-05-24 In architectural terms the twentieth century can be largely summed up with two names Frank Lloyd Wright and Philip Johnson Wright 1867 1959 began it with his romantic prairie style Johnson 1906 2005 brought down the curtain with his spare postmodernist experiments Between them they built some of the most admired and discussed buildings in American history Differing radically in their views on

architecture Wright and Johnson shared a restless creativity enormous charisma and an outspokenness that made each man irresistible to the media Often publicly at odds they were the twentieth century's flint and steel their repeated encounters consistently set off sparks Yet as acclaimed historian Hugh Howard shows their rivalry was also a fruitful artistic conversation one that yielded new directions for both men It was not despite but rather because of their contentious and not always admiring relationship that they were able so powerfully to influence history In *Architecture's Odd Couple* Howard deftly traces the historical threads connecting the two men and offers readers a distinct perspective on the era they so enlivened with their designs Featuring many of the structures that defined modern space from Fallingwater to the Guggenheim from the Glass House to the Seagram Building this book presents an arresting portrait of modern architecture's odd couple and how they shaped the American landscape by shaping each other *Rebuilding Babel* Mark

Crinson, 2017-06-30 Much of modernist architecture was inspired by the emergence of internationalism the ethics and politics of world peace justice and unity through global collaboration Mark Crinson here shows how the ideals represented by the Tower of Babel built so the story goes by people united by one language were effectively adapted by internationalist architecture its styles and practices in the modern period Focusing particularly on the points of convergence between modernist and internationalist trends in the 1920s and again in the immediate post war years he underlines how such architecture utilised the themes of a cooperative community of builders and a common language of forms The International Style was one manifestation of this new way of thinking but Crinson shows how the aims of modernist architecture frequently engaged with the substance of an internationalist mindset in addition to sharing surface similarities Bringing together the visionaries of internationalist projects including Le Corbusier Bruno Taut Berthold Lubetkin Walter Gropius and Mies van der Rohe Crinson interweaves ideas of evolution ecology utopia regionalism socialism free trade and anti colonialism to reveal the possibilities heralded by modernist architecture Furthermore he re connects pivotal figures in architecture with a cast of polymath internationalists such as Patrick Geddes Lewis Mumford Julian Huxley Rabindranath Tagore and H G Wells to provide a richly detailed socio cultural framework This is a book crafted for students and scholars of architecture and art theory as well as for those interested in the history of twentieth century optimism about the world and its architecture

**Fallingwater** Lynda S. Waggoner, 2011 Presents a pictorial look at the history structure and restoration of Frank Lloyd Wright's Fallingwater **Frank Lloyd Wright Quarterly**, 2005 **A House in the Sun** Daniel A. Barber, 2016-10-13 *A House in the Sun* describes a number of experiments in solar house heating in American architectural engineering political economic and corporate contexts from the beginning of World War II until the late 1950s Houses were built across the Midwest Northeast and Southwestern United States and also proposed for sites in India South Africa and Morocco These experiments developed in parallel to transformations in the discussion of modern architecture relying on new materials and design ideas for both energy efficiency and claims to cultural relevance Architects were among the myriad cultural and

scientific actors to see the solar house as an important designed element of the American future These experiments also developed as part of a wider analysis of the globe as an interconnected geophysical system Perceived resource limitations in the immediate postwar period led to new understandings of the relationship between energy technology and economy The solar house both as a charged object in the milieu of suburban expansion and as a means to raise the standard of living in developing economies became an important site for social technological and design experimentation This led to new forms of expertise in architecture and other professions Daniel Barber argues that this mid century interest in solar energy was one of the first episodes in which resource limitations were seen as an opportunity for design to attain new relevance for potential social and cultural transformations Furthermore the solar discussion established both an intellectual framework and a funding structure for the articulation of and response to global environmental concerns in subsequent decades In presenting evidence of resource tensions at the beginning of the Cold War the book offers a new perspective on the histories of architecture technology and environmentalism one more fully entangled with the often competing dynamics of geopolitical and geophysical pressures

**What was Contemporary Art?** Richard Meyer, 2013 Contemporary art in the early twenty first century is often discussed as though it were a radically new phenomenon unmoored from history Yet all works of art were once contemporary to the artist and culture that produced them In What Was Contemporary Art Richard Meyer reclaims the contemporary from historical amnesia exploring episodes in the study exhibition and reception of early twentieth century art and visual culture
