**An Algebraic Introduction to Complex Projective Geometry** Christian Peskine, 1943 In this introduction to commutative algebra the author chooses a route that leads the reader through the essential ideas without getting embroiled in technicalities He takes the reader quickly to the fundamentals of complex projective geometry requiring only a basic knowledge of linear and multilinear algebra and some elementary group theory The author divides the book into three parts In the first he develops the general theory of noetherian rings and modules He includes a certain amount of homological algebra and he emphasizes rings and modules of fractions as preparation for working with sheaves In the second part he discusses polynomial rings in several variables with coefficients in the field of complex numbers After Noether's normalization lemma and Hilbert's Nullstellensatz the author introduces affine complex schemes and their morphisms he then proves Zariski's main theorem and Chevalley's semi continuity theorem Finally the author's detailed study of Weil and Cartier divisors provides a solid background for modern intersection theory This is an excellent textbook for those who seek an efficient and rapid introduction to the geometric applications of commutative algebra

**The Biography of Middle. Rachel** John Darcie, 1855 Handbook of Systemic Approaches to Psychotherapy Manuals Mauro Mariotti, George Saba, Peter Stratton, 2022-02-17 This handbook examines the development and use of manuals to guide and support systemic couples and family therapies It addresses the process of manualizing providing a secure base for therapist creativity rather than delineating prescriptive procedures The volume addresses therapist and trainer concerns by demonstrating the value of sufficiently articulating clinical and teaching models to inform colleagues of what actually occurs during therapy The book describes the history value and controversies of manuals In addition it explores issues and experiences in the creation of manuals identifies research issues related to the use and evaluation of manuals and addresses training as a context for the application of treatment manuals Key areas of coverage include Reports of experiences with major internationally established manuals formulations of innovative practices by their developers and specifications of training programs Discussion of the various formats of manuals demonstrating their

benefit and transportability across different contexts Surveys of a broad selection of manuals creating a flexible and diversified concept of what forms manuals may take Essential guidance for using manuals which is an indispensable step for the field to progress and to claim to health resource commissioning governments and insurance agencies that the systemic practice is evidence based and effective The Handbook of Systemic Approaches to Psychotherapy Manuals is an essential resource for researchers professors and graduate students as well as clinicians and related therapists and professionals in clinical psychology family studies public health social work psychotherapy child and adolescent psychology and all interrelated disciplines Unconsciousness Between Phenomenology and Psychoanalysis Dorothee Legrand, Dylan Trigg, 2017-05-18 This book contains a series of essays that explore the concept of unconsciousness as it is situated between phenomenology and psychoanalysis A leading goal of the collection is to carve out phenomenological dimensions within psychoanalysis and equally to carve out psychoanalytical dimensions within phenomenology The book examines the nature of unconsciousness and the role it plays in structuring our sense of self It also looks at the extent to which the unconscious marks the body as it functions outside of experience as well as manifests itself in experience In addition the book explores the relationship between unconsciousness and language particularly if unconsciousness exists prior to language or if the concept can only be understood through speech The collection includes contributions from leading scholars each of whom grounds their investigations in a nuanced mastery of the traditional voices of their fields These contributors provide diverse viewpoints that challenge both the phenomenological and psychoanalytical traditions in their relation to unconsciousness
