An Analysis of the H-2a Agricultural Guest Worker Program and Recommendations for Future Policy Paulina M. Irigaray, 2011-03 The majority of the people who make up the United States seasonal agricultural workforce are nonimmigrant Mexican citizens Immigration policies such as the Immigration Reform and Control Act IRCA and the H 2A agricultural guest worker program were meant to encourage growers to employ legal labor workforces A study of the laws and practices that eventually resulted in the H 2A program shows how and why the demographics are predominantly Mexican In addition such study is revealing as to why the US enacted the H 2A program including definitional details of the program itself However does this program really work This question has radically different answers In theory the program seems to be well designed but in practice it does not function as intended because of its many shortcomings loopholes open ended issues and poor enforcement I will analyze and demonstrate how these inadequacies perpetuate illegal immigration and exploitation of both legal and illegal seasonal agricultural farm workers Lastly I will offer a composite of recommendations for legislative reform of the H 2A program as well as provide pertinent resourceful questions for further research
