Sicily Enough Claire Rabe, 1988-08-01 **The Encyclopædia Britannica**, 1898 The Greek World 479-323 BC Simon Hornblower, 2011-03-17 The Greek World 479 323 BC has been an indispensable guide to classical Greek history since its first publication nearly thirty years ago Now Simon Hornblower has comprehensively revised and partly rewritten his original text bringing it up to date for yet another generation of readers In particular this fourth edition takes full account of recent and detailed scholarship on Greek poleis across the Hellenic world allowing for further development of the key theme of regional variety across the Mediterranean and beyond Other extensive changes include a new sub chapter on Islands a completely updated bibliography and revised citation of epigraphic material relating to the fourth century BC With valuable coverage of the broader Mediterranean world in which Greek culture flourished as well as close examination of Athens Sparta and the other great city states of Greece itself this fourth edition of a classic work is a more essential read than ever before *The New Werner Twentieth Century Edition of the Encyclopaedia Britannica*, 1906 *Lyell and Darwin, Geologists* Martin J.S. Rudwick, 2023-07-07 The studies in this second volume by Martin Rudwick the first being *The New Science of Geology Studies in the Earth Science in the Age of Reform* focus on the figures of Charles Lyell and Charles Darwin Lyell rose to be of pivotal importance in the second quarter of the 19th century because he challenged other geologists throughout Europe by probing their methods and conclusions to the limit While adopting their goal of reconstructing the contingent history of the earth he claimed that the physical processes observable in action in the present could explain far more about the past than was commonly believed and that it was unnecessary to postulate occasional catastrophic events of still greater intensity Far more controversial was Lyell's further claim that the earth and its life had always been in a stable steady state rather than developing in a broadly linear or directional fashion His younger friend Charles Darwin first made his name as a Lyellian geologist Darwin's early work in geology studied here provided important foundations for his later and more famous research on speciation and other biological problems **Siren Feasts** Andrew Dalby, 2013-04-15 Cheese wine honey and olive oil four of Greece's best known contributions to culinary culture were already well known four thousand years ago Remains of honeycombs and of cheeses have been found under the volcanic ash of the Santorini eruption of 1627 BC Over the millennia Greek food diversified and absorbed neighbouring traditions yet retained its own distinctive character In *Siren Feasts* Andrew Dalby provides the first serious social history of Greek food He begins with the tunny fishers of the neolithic age and traces the story through the repertoire of classical Greece the reputations of Lydia for luxury and of Sicily and South Italy for sybaritism to the Imperial synthesis of varying traditions with a look forward to the Byzantine cuisine and the development of the modern Greek menu The apples of the Hesperides turn out to be lemons and great favour attaches to Byzantine biscuits Fully documented and comprehensively illustrated scholarly yet immensely readable *Siren Feasts* demonstrates the social construction placed upon different types of food at different periods was fish a

luxury item in classical Athens though disdained by Homeric heroes It places diet in an economic and agricultural context and it provides a history of mentalities in relation to a subject which no human being can ignore **Codename**
