The Track in the Forest Bob Burns,2018-10-02 The 1968 US men s Olympic track and field team won 12 gold medals and set six world records at the Mexico City Games one of the most dominant performances in Olympic history The team featured such legends as Tommie Smith Bob Beamon Al Oerter and Dick Fosbury Fifty years later the team is mostly remembered for embodying the tumultuous social and racial climate of 1968 The Black Power protest of Tommie Smith and John Carlos on the victory stand in Mexico City remains one of the most enduring images of the 1960s Less known is the role that a 400 meter track carved out of the Eldorado National Forest above Lake Tahoe played in molding that juggernaut To acclimate US athletes for the 7 300 foot elevation of Mexico City the US Olympic Committee held a two month training camp and final Olympic selection meet for the ages at Echo Summit near the California Nevada border Never has a sporting event of such consequence been held in such an ethereal setting On a track in which hundreds of trees were left standing on the infield to minimize the environmental impact four world records fell more than have been set at any US meet since including the 1984 and 1996 Olympics But the road to Echo Summit was tortuous the Vietnam War was raging Martin Luther King Jr and Robert Kennedy were assassinated and a group of athletes based out of San Jose State had been threatening to boycott the Mexico City Games to protest racial injustice Informed by dozens of interviews by longtime sports journalist and track enthusiast Bob Burns this is the story of how in one of the most divisive years in American history a California mountaintop provided an incomparable group of Americans shelter from the storm

The Small Shall Be Strong Matthew S. Makley,2018-07-20 For thousands of years the Washoe people have lived in the shadows of the Sierra Nevada Mountains At the center of their lands sits beautiful Lake Tahoe a name derived from the Washoe word Da ow a ga Perhaps because the Washoe population has always been small or because it has been more peaceful than other tribal communities its history has never been published In *The Small Shall Be Strong* Matthew S Makley demonstrates that in spite of this lack of scholarly attention Washoe history is replete with broad significance The Washoes

for example gained culturally important lands through the 1887 Dawes Act And during the 1990s the tribe sought to ban climbing on one of its most sacred sites Cave Rock a singular instance of Native sacred concerns leading to restrictions The Small Shall Be Strong illustrates a history and raises a broad question How might greater scholarly attention to the numerous lesser studied tribes in the United States compel a rethinking of larger historical narratives **Sunset Limited** Richard J. Orsi,2005 The only major US railroad built from west to east the Southern Pacific played a major role in the shaping of the West the development of southern California in particular Sunset Limited explores the corporate strategy over time to reveal how the company saw its place in the world **The Californios** Hunt Janin,Ursula Carlson,2017-12-14 Before the Gold Rush of 1848 1858 Alta Upper California was an isolated cattle frontier and home to a colorful group of Spanish speaking non indigenous people known as Californios Profiting from the forced labor of large numbers of local Indians they carved out an almost feudal way of life raising cattle along the California coast and valleys Visitors described them as a good looking vibrant improvident people Many traces of their culture remain in California Yet their prosperity rested entirely on undisputed ownership of large ranches As they lost control of these in the wake of the Mexican War they lost their high status and many were reduced to subsistence level jobs or fell into abject poverty Drawing on firsthand contemporary accounts the authors chronicle the rise and fall of Californio men and women **Nevada Historical Society Quarterly** Nevada Historical Society,2007 *Overland Explorations of the Trans-Mississippi West* Hunt Janin,Ursula Carlson,2020-04-06 In 1528 the Spanish explorer Alvar Nunez Cabeza de Vaca and his three companions were shipwrecked and looking for help began an eight year trek through the deserts of the American West Over three centuries later the four Great Surveys in the United States were consolidated into the U S Geological Survey The frontiers were the lands near or beyond the recognized international national regional or tribal borders Over the centuries they hosted a complicated series of international explorations of lands inhabited by American Indians Spanish French Canadians British and Americans These explorations were undertaken for wide ranging reasons including geographical scientific artistic literary and for the growth of the railroad This history covers over 350 years of exploration of the West *The Mountains That Remade America* Craig H. Jones,2020-02-25 From ski towns to national parks fresh fruit to environmental lawsuits the Sierra Nevada has changed the way Americans live Whether and where there was gold to be mined redefined land mineral and water laws Where rain falls and where it doesn't determines whose fruit grows on trees and whose appears on slot machines All this emerges from the geology of the range and how it changed history and in so doing changed the country The Mountains That Remade America combines geology with history to show how the particular forces and conditions that created the Sierra Nevada have effected broad outcomes and influenced daily life in the United States in the past and how they continue to do so today Drawing connections between events in historical geology and contemporary society Craig H Jones makes geological science accessible and shows the vast impact this mountain range has had on the American West Eldorado National Forest
