Lords and Lordship in the British Isles in the Late Middle Ages Rees Davies,2009-06-11 It is well known that political economic and social power in the British Isles in the Middle Ages lay in the hands of a small group of domini lords In his final book the late Sir Rees Davies explores the personalities of these magnates the nature of their lordship and the ways in which it was expressed in a diverse and divided region in the period 1272 1422 Although their right to rule was rarely questioned the lords flaunted their identity and superiority through the promotion of heraldic lore the use of elevated forms of address and by the extravagant display of their wealth and power Their domestic routine furnishings dress diet artistic preferences and pastimes all spoke of a lifestyle of privilege and authority Warfare was a constant element in their lives affording access to riches and reputation but also carrying the danger of capture ruin and even death while their enthusiasm for crusades and tournaments testified to their energy and bellicose inclinations Above all underpinning the lords control of land was their control of men a complex system of dependence and reward that Davies restores to central significance by studying the British Isles as a whole The exercise and experience of lordship was far more varied than the English model alone would suggest

Cheyette,1975 **The Lordship of England** Scott L. Waugh,2014-07-14 This thorough examination of the feudal powers of English kings in the thirteenth and early fourteenth centuries is the only study to analyze the actual pattern of royal grants and the grantees use of their rights and to place them in the social context of marriage kinship and landholding within the English elite The royal rights known as feudal incidents included custody of a tenant s lands when he died leaving minor heirs the arrangement of the heir s marriage and consent to

the widow's remarriage Scott Waugh shows how the king exercised those rights and how his use of feudal incidents affected his relations with the tenants in chief He concludes that royal lordship was of fundamental importance in reinforcing the power and prestige of the monarchy and in offering the king a valuable source of patronage English kings therefore devoted considerable effort to defining and institutionalizing their feudal authority in the thirteenth century It is also clear that families living under royal lordship were profoundly concerned about these rights especially since marriage was of such critical importance in providing for the smooth transfer of lands from one generation to another Given the hazards of life in the Middle Ages inheritance by minors was a frequent occurrence and the king's distribution of feudal incidents was therefore a delicate political problem It raised issues not only about royal finances and favoritism but also about the fate of families Originally published in 1988 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Lordship and Locality in the Long Twelfth Century Hannah Boston, 2024 A new perspective on lordship in England between the Norman Conquest and Magna Carta Multiple lordship that is holding land or owing allegiance to more than one lord simultaneously was long regarded under the western European feudal model as a potentially dangerous aberration and a sign of decline in the structure of lordship Through an analysis of the minor lords of Leicestershire Derbyshire and Staffordshire during the long twelfth century this study demonstrates conversely that multiple lordship was at least as common as single lordship in this period and regarded as a normal practice and explores how these minor lords used the flexibility of lordship structures to construct localised centres of authority in the landscape and become important actors in their own right Lordship was moreover only one of several forces which minor lords had to navigate Regional society in this period was profoundly shaped by overlapping ties of lordship kinship and locality each of which could have a fundamental impact on relationships and behaviour These issues are studied within and across lords honours around religious houses and urban areas and in a close case study of the abbey of Burton upon Trent This book thus contextualises lordship within a wider landscape of power and influence

Episcopal Power and Ecclesiastical Reform in the German Empire John Eldevik, 2012-08-06 This book explores how bishops used the medieval tithe as a social and political tool in eleventh century Germany and Italy

The Lordship of Ireland in the Middle Ages James F. Lydon, 2003 The lordship of Ireland in the middle ages was vested in the English crown by the famous grant of Pope Adrian IV in 1155 resulting in the invasion of 1169 This book shows how that lordship developed and the heritage it passed on to later generations It is not wholly a narrative but is thematic in its approach examining the emergence of the Anglo Irish identity the growth of separatism both politically and culturally and the survival of Gaelic Ireland The resulting conflict between the two traditions helped to create the situation out of which modern Ireland was to emerge Professor Lydon's book presented here in a new annotated edition with full apparatus is a highly readable and scholarly overview of four centuries of Irish political history

Lordship in the County of Maine, C. 890-1160 Richard Ewing Barton, 2004 The vision and chronology of tenth and eleventh century lordship on offer here departs from the model of feudal mutation and emphasizes two major themes the centrality of intangible charismatic elements of honor prestige and acclamation and the lack of foundation for any notion of feudal transformation while acknowledging changes in the geography of power across the tenth and eleventh centuries the argument insists that the practicalities of the practice of lordship remained essentially the same between 890 and 1160
