Crothers,2014-08-13 This book describes the intricacies of the construction and fabrication more than 150 years ago of masts and yards installed in American merchant vessels particularly those spars which were built or composed of multiple pieces bound together by iron bands These were referred to as made spars as opposed to spars constructed from a single tree It also contains instructions for developing the shape and proportions of various spars Very little information is available on this subject Generally the external sizes of individual spars can be found but intimate details are sorely neglected In addition the book includes the spacing and location of masts in a ship and the rake and it discusses the types of wood that are most desirable in the construction of spars **The American Catalogue** ,1941 Hoping to avoid the worry of caring for a valuable object Miss Teaberry gives away the locket her cat finds in the garden only to find herself enmeshed in a situation of escalating chaos *Rulership in 1st to 14th century Scandinavia* Dagfinn Skre,2019-12-16 This book seeks to revitalise the somewhat stagnant scholarly debate on Germanic rulership in the first millennium AD A series of comprehensive chapters combines literary evidence on Scandinavia s politics kings and other rulers with archaeological documentary toponymical and linguistic evidence The picture that emerges is one of surprisingly stable rulership institutions sites and myths while control of them was contested between individuals dynasties and politics While in the early centuries Scandinavia was integrated in Germanic Europe profound
