Fenn,Donald Capps,1995-07-01 The social scientific literature on the self has been marred by a general indifference to the levels of the self that escape observation The literature on the one hand makes claims about the extent of individualism in American society or claims to see a narcissistic social character widespread in the American public On the other hand very little is known about the self at levels that escape observation but these are the levels at which the self is both most vulnerable and we argue most vital In this volume the notion of the soul is put forward as a hypothesis with which to challenge social sciences to explore the self at depths well beyond that of social relationships Handbook of Caribbean Economies Robert Looney,2020-11-10 This volume aims to illustrate the uniqueness of the economies of the countries and territories of the Caribbean as well as the similarities they share with other regions While most countries in the region share many of the characteristics of middle income countries theirs is a matter of extremes Their generally small size suggests a fragility not found elsewhere While much of the world is beginning to feel some effects of climate change the Caribbean is ground zero These factors suggest a difficult road ahead but the chapters presented in

this volume aim to help to spur the search for creative solutions to the region s problems The chapters written by expert contributors examine the Caribbean economies from several perspectives Many break new ground in questioning past policy mindsets while developing new approaches to many of the traditional constraints limiting growth in the region The volume is organized in four sections Part I examines commonalities including issues surrounding small economies tourism climate change and energy security Part II looks at obstacles to sustained progress for example debt natural disasters and crime In Part III chapters consider the specific role of external influences including the USA and the European Union the People s Republic of China as well as regional co operation The volume concludes in Part IV with country case studies intended to provide a sense of the diversity that runs through the region
