Life's Dueling Dualities Stephen Michael Soreff MD, 2020-12-04 Life is simple Follow a few maxims and it is easy No In growing up everyone must deal with a series of opposing dual messages For example one hears If you hesitate you lose Good Then one also learns Look before you leap Both are correct What to do And this is only one of life's six

contradictions This book identifies the six dual dueling ideas The first is Carpe Diem vs Reflection and Contemplation Or its variation the early bird gets the worm but the second mouse gets the cheese The second is ambivalence which amazingly means simultaneously loving and hating something or someone The third involves following your heart versus the head and we all root for the Hollywood ending The fourth looks at whether it is better to work alone or as part of a group The fifth deals with whether you should follow the rules or challenge them The sixth shows the advantages of having big picture views in your life while also appreciating your daily realities The final chapter Transcendence offers a unique answer and alternative to all the six contradictions As a grandfather a father a psychiatrist a son a brother a wishing to be better golfer a jogger a sailor a hiker an amateur geologist want to be comedian local newspaper reporter and a veteran of School of Hard Knocks the author has wrestled with all six of them and discovered moments of transcendence In this book he shares his observations and philosophy about all of them with his grandchildren and you Based on this book you can make better decisions The book itself is engaging insightful witty and entertaining It is full of examples from history literature and the author s experiences Welcome and enjoy **The Land & the Orchard of Human Species** Babajide M.

Ola-Buraimo,2011-04-12 The analytical views in this book are not in any way serendipity rather they were well thought out and structured as simply received Thus arises the need to initiatively look back at the epoch of our existence on Earth as preceded by the following survival of the fittest search for food where to live sacrifices and rituals to appeal to God brutalism against one another religious sect formation and deforestation due to uncontrollable population increase Improvisation of wooden houses trees of concrete iron and steel have been initiated but in a way they have continually caused global warming to increase very much at a gradual pace as civilization advances through Machine Age mechanized farming industrialization and technological advancements space exploration and globalization of industries and corporate organizations The heat increases at an unusual unprecedented level due to greenhouse gas emission and thus the assumed greenhouse releases a light weight carbon dioxide CO₂ gas into the atmosphere which is speculated to have formed impenetrable blanket The presence of CO₂ is an indicator pointing to a fact that this gas in question had been released in the past and is presently being discharged uncontrollably More so there seems to be no end in sight as the CO₂ continues to be sporadically expunged into the atmosphere The process described above has continued to be expanding through all frontiers with no end in sight where new neighborhoods are being built Suburbs margining together as new Castles are evolving block by block and concrete plazas are enveloping the Earth so are the vegetative forest of trees are disappearing causing global warming to increase exponentially The increase becomes very much intense at an alarming rate in that it has now been considered to be adversely effective when found to be dangerously impacting the essence and every facet of life Analytical research is hereby required to be conducted by the world s best researchers and scientists in their respective professional fields Necessary wisdom of advice has to be forwarded by religious leaders of all known notable reliable religious groups or denominations
