The Collapse of Ancient States and Civilizations Norman Yoffee, George L. Cowgill, 1991-07 Publikacja prac seminarium School of American Research kt re odby o si w Santa Fe 22 26 marca 1982 r **An Environmental History of the World** J. Donald Hughes, 2002-09-26 An Environmental History of the World is a concise history from Ancient to Modern times of the interaction between human societies and the other forms of life that inhabit our planet This original work follows a chronological path through the history of mankind in relationship to ecosystems around the world Each chapter concentrates on a general period in human history which has been characterised by large scale changes in the relationship of human societies to the biosphere and gives three case studies that illustrate the significant patterns occurring at that time Little environmental or historical knowledge is assumed from the reader in this introduction to environmental history

Disinformation Guide to Ancient Aliens, Lost Civilizations, Astonishing Archaeology & Hidden History Preston Peet, 2013-01-01 If you think the history you were taught in school was accurate you re in for a big surprise This group of researchers blows the lid off everything you thought you knew about the origins of the human race and the culture we live in Cover p 4 **Ancient Mesoamerica** Richard E. Blanton, 1993-04-30 In this revised and updated 1993 edition the authors synthesize recent research to provide a comprehensive survey of Mesoamerica **Once Beneath The Forest** Bl Turner Ii, 2019-06-04 My interest in ancient Maya agriculture began late in the year of 1971 when William M Denevan encouraged me to pursue the topic Our interests had been perked by reports from Joseph W Ball JaCk Eaton and Irwin Rovner of the presence of terrace like features throughout the Rio Bee region of the southern Yucatan Peninsula Denevan maintained a long term interest in pre Hispanic agriculture and population in the New World Our studies with the emerging Rio Bee research group at the University of Wisconsin led to the conclusion that the then dominant themes of Maya agriculture were in need of reevaluation and that a number of remains of intensive forms of agriculture were likely to be found in the Central Maya lowlands of Mexico Peten Guatemala and Belize particularly wetland or raised fields in addition to the reported terraces Our interests were heightened at this time by notification from Alfred Siemens of the finds of wetland fields in the vicinity of the Rio Bee region in the Chetumal Mexico northern Belize area Healing Sherrie M. Steiner, 2005-01-21 In Healing author Sherrie M Steiner promotes social change to grapple with the global environmental problems that threaten our collective future The book combines scientific and faith based motives to compel the reader to participate in social renewal In Healing Steiner mixes hard hitting realism with hopeful possibility in her assessment of the vulnerabilities of modern civilization Steiner addresses numerous socio political issues including economic growth energy policy and sustainability Ultimately however she says that it is the choices we make about who we become in the days ahead that will determine our healing Technically this book is about environmental sustainability but the subtext is altogether quite different This is a book about a future filled with hope **Anthropology and Contemporary Human Problems** John H.

Bodley,2012-04-12 We live in a time of global mega problems of unsustainable growth and consumption resource depletion ecosystem degradation global warming escalating energy costs poverty and conflict Cultural anthropologist John H Bodley trenchantly critiques these most pressing issues and shows how anthropology makes it possible to find solutions The focus on culture scale suggests that many solutions may be found by developing local communities supported by regional markets and ecosystems rather than by making the continuous accumulation of financial capital the dominant cultural process throughout the world Now in its sixth edition this classic textbook continues to have tremendous relevance and is more timely than ever in light of the recent global economic crisis It exposes readers to the problems of a world out of balance with misdirected growth by the elite Bodley offers examples from prehistoric and modern tribal societies along side of ancient imperial and contemporary commercial societies Students will find this to be the trusted source to build a world view Anthropology and Contemporary Human Problems is ideal for adoption in anthropology and sociology courses on globalization cultural ecology social class and inequality the environment sustainability and development

Ancient Maya Arthur Demarest,2004-12-09 In this new archaeological study Arthur Demarest brings the lost pre Columbian civilization of the Maya to life In applying a holistic perspective to the most recent evidence from archaeology paleoecology and epigraphy this theoretical interpretation emphasises both the brilliant rain forest adaptations of the ancient Maya and the Native American spirituality that permeated all aspects of their daily life Demarest draws on his own discoveries and the findings of colleagues to reconstruct the complex lifeways and volatile political history of the Classic Maya states of the first to eighth centuries He provides a new explanation of the long standing mystery of the ninth century abandonment of most of the great rain forest cities Finally he draws lessons from the history of the Classic Maya cities for contemporary society and for the ongoing struggles and resurgence of the modern Maya peoples who are now re emerging from six centuries of oppression

Maya Commoners Jon C. Lohse,Fred Valdez, Jr.,2010-01-01 Much of what we currently know about the ancient Maya concerns the activities of the elites who ruled the societies and left records of their deeds carved on the monumental buildings and sculptures that remain as silent testimony to their power and status But what do we know of the common folk who labored to build the temple complexes and palaces and grew the food that fed all of Maya society This pathfinding book marshals a wide array of archaeological ethnohistorical and ethnographic evidence to offer the fullest understanding to date of the lifeways of ancient Maya commoners Senior and emerging scholars contribute case studies that examine such aspects of commoner life as settlement patterns household organization and subsistence practices Their reports cover most of the Maya area and the entire time span from Preclassic to Postclassic This broad range of data helps resolve Maya commoners from a faceless mass into individual actors who successfully adapted to their social environment and who also held primary responsibility for producing the food and many other goods on which the whole Maya society depended **Lost Knowledge**
