True Notebooks Mark Salzman, 2007-12-18 In 1997 Mark Salzman bestselling author Iron and Silk and Lying Awake paid a reluctant visit to a writing class at L A s Central Juvenile Hall a lockup for violent teenage offenders many of them charged with murder What he found so moved and astonished him that he began to teach there regularly In voices of indelible emotional presence the boys write about what led them to crime and about the lives that stretch ahead of them behind bars We see them coming to terms with their crime ridden pasts and searching for a reason to believe in their future selves Insightful comic honest and tragic True Notebooks is an object lesson in the redemptive power of writing **The Invisible Pyramid** Loren C. Eiseley, 1998-01-01 In 1910 young Loren Eiseley watched the passage of Halley s Comet with his father The boy who became a famous naturalist was never again to see the spectacle except in his imagination That childhood event contributed to the profound sense of time and space that marks The Invisible Pyramid This collection of essays first published shortly after Americans landed on the moon explores inner and outer space the vastness of the cosmos and the limits of what can be known Bringing poetic insight to scientific discipline Eiseley makes connections between civilizations past and present multiple universes humankind and nature *Artifacts & Illuminations* Tom Lynch, Susan Naramore Maher, 2012-04-01 Loren Eiseley 1907-77 is one of the most important American nature writers of the twentieth century and an admired practitioner of creative nonfiction A native of Lincoln Nebraska Eiseley was a professor of anthropology and a prolific writer and poet who worked to bring an understanding of science to the general public incorporating religion philosophy and science into his explorations of the human mind and the passage of time As a writer who bridged the sciences and the humanities Eiseley is a

challenge for scholars locked into rigid disciplinary boundaries *Artifacts and Illuminations* the first full length collection of critical essays on the writing of Eiseley situates his work in the genres of creative nonfiction and nature writing The contributing scholars apply a variety of critical approaches including ecocriticism and place oriented studies ranging across prairie urban and international contexts Contributors explore such diverse topics as Eiseley's use of anthropomorphism and Jungian concepts and examine how his work was informed by synecdoche Long overdue this collection demonstrates Eiseley's continuing relevance as both a skilled literary craftsman and a profound thinker about the human place in the natural world

Mumford, Tate, Eiseley Gale H. Carrithers, Jr., 1992-01-01 Though of diverse backgrounds and training Mumford Tate and Eiseley shared remarkably concordant and convincing views of the state of twentieth century American society All three considered America to be benighted by a dominant myth the myth of the machine in Mumford's phrase that resulted in cultural degeneration Through an examination of selected works of each critic Carrithers explains how these writers both identified and fought against this myth Carrithers asserts that Mumford Tate and Eiseley in their essays revived prophecy as a mode of expression and as a means of appraising culture in a broad historical context Like the biblical prophets the three concerned themselves not so much with the future as with the present They sought to unmask the falseness the moral emptiness of a reductive abstractive mechanized model of the world Carrithers considers Mumford as he moved from conflicted stances in the four volumes of *The Renewal of Life* to the more assured and comprehensive vision of society he portrayed in the two volume *The Myth of the Machine* He examines Tate's critique of American culture as it developed from his youthful involvement with the Fugitives and Agrarians to in later years an increasingly coherent but comber construal of the world's plight Finally he describes Eiseley's fully emergent rejection of reductive scientism and temporalism a large part of all that is crushing us Eiseley wrote evident in *The Immense Journey* and other books Mumford Tate and Eiseley these watchers in the night all wrote against the grain of most of their contemporaries posing questions about generally accepted current values and proffering alternatives that would make the world a more humane and transcendent place Gale Carrithers thoughtful challenging analysis of their efforts will be required reading for anyone who wishes a better understanding of our age

Ecology and Literatures in English Françoise Besson, 2018-12-14 In all latitudes writers hold out a mirror leading the reader to awareness by telling real or imaginary stories about people of good will who try to save what can be saved and about animals showing humans the way to follow Such tales argue that in spite of all destructions and tragedies if we are just aware of and connected to the real world around us to the blade of grass at our feet and the star above our heads there is hope in a reconciliation with the Earth This may start with the emergence or rather the return of a nonverbal language restoring the connection between human beings and the nonhuman world through a form of communication beyond verbalization Through a journey in Anglophone literature with examples taken from Aboriginal African American English Canadian and Indian works this book shows the role played by literature in the protection of the planet It argues that literature reveals the fundamental idea that everything is connected and that it is only when most people are aware of this connection that the world will change Exactly as a tree is connected with all the animal life in and around it texts show that nothing should be separated From Shakespeare's theatre to ecopoetics from travel writing to detective novels from children's books to novels all literary genres show that literature responds to the violence destroying lands men and nonhuman creatures whose voices can be heard through texts

Barns of the Midwest Allen G. Noble, Hubert G. H. Wilhelm, 2018-09-11 Originally published in 1995 Barns of the Midwest is a masterful example of material cultural history It arrived at a critical moment for the agricultural landscape The 1980s were marked by farm foreclosures rural bank failures the continued rise of industrialized agriculture and severe floods and droughts These waves of disaster hastened the erosion of the idea of a pastoral Heartland knit together with small farms and rural values And it wasn't just an idea that was eroded material artifacts such as the iconic Midwestern barn were also rapidly wearing away It was against this background that editors Noble and Wilhelm gathered noted experts in history and architecture to write on the nature and meaning of Midwestern barns explaining why certain barns were built as they were what types of barns appeared where and what their functions were Featuring a new introduction by Timothy G. Anderson Barns of the Midwest is the definitive work on this ubiquitous but little studied architectural symbol of a region and its history

Emerson and Environmental Ethics Susan Dunston, 2018-09-15 At the core of Emerson's philosophy is his view as a naturalist that we are made of the same atoms as the world is In counterpoint to this identity he noted the fluid evolution and diversity of combinations and configurations of those atoms Thus he argued our relation and connection to the world are not occasional or recreational but everywhere and always and also reciprocal ongoing and creative He declared he would be a naturalist which for him meant being a knowledgeable lover of nature Emerson's famous insistence on an original relation to the universe centered on morally creative engagement with the environment It took the form of a nature literacy that has become central to contemporary environmental ethics The essential argument of this book is that Emerson's integrated philosophy of nature ethics and creativity is a powerful prototype for a diverse range of contemporary environmental ethics After describing Emerson's own environmental literacy and ethical aesthetic and creative practices of relating to the natural world Dunston delineates a web of environmental ethics that connects Emerson to contemporary eco feminism living systems theory Native American science Asian philosophy and environmental activism

Rebellion James Brody, 2008-03 tiny differences in the nature of individuals require that each of us discovers, arranges and sustains his or her unique partnerships and territories Because of this uniqueness you must actively steer your life rather than just letting it happen None of us is mere clay for environment's thumbs and even the youngest of ten children is a one off architect who renovates his parents Using clarity humor and personal examples Dr James Brody shows why you simplify or complicate your life form partnerships and social networks and sometimes conform or not He also explains why certain aspects of physics are your best friends why your commonsense handles them so well why women displace men and why you shouldn't believe bell curves To illustrate Brody includes stories from his clients as well as from biologists Charles and Erasmus Darwin authors William and Henry James anthropologists Mary Leakey and Loren Eiseley and Nobel winners Richard Feynman and Rita Levi Montalcini a rich tapestry of human behavior but done in a way that gives significance to individualism using models that physics and mathematics offer Phase transitions emergent networks condensates swarming and other models are in the arsenal that he develops in the first half of the book and applies in its second half to evolution and behavior genetics conflict and suicide and resilience and personal will This is serious work yet it is not difficult to read I highly recommend it Bryen Lorenz Ph D Professor of Electrical Engineering Widener University
