Neighborhood Revitalization and the Postindustrial City Dennis E. Gale, 1984 **Neighborhood Revitalization and the Postindustrial City** Dennis E. Gale, 1984 **Neighbourhood Policy and Programmes** Naomi Carmon, 2016-07-27 This volume comprised of original contributions by experienced urban planners and distinguished social scientists sets forth the accumulated experience directed at improving the quality of life in our cities through neighbourhood programs Policy issues housing programs and job development plans along with organizational innovations aimed at redistribution of power are described and evaluated **The Gentrification Debates** Japonica Brown-Saracino, 2013-09-13 Uniquely well suited for teaching this innovative text reader strengthens students critical thinking skills sparks classroom discussion and also provides a comprehensive and accessible understanding of gentrification **The Oxford Handbook of Urban Economics and Planning** Nancy Brooks, Kieran Donaghy, Gerrit-Jan Knaap, 2012-01-12 This volume embodies a problem driven and theoretically informed approach to bridging frontier research in urban economics and urban regional planning The authors focus on the interface between these two subdisciplines that have historically had an uneasy relationship Although economists were among the early contributors to the literature on urban planning many economists have been dismissive of a discipline whose leading scholars frequently favor regulations over market institutions equity over efficiency and normative prescriptions over positive analysis Planners meanwhile even as they draw upon economic principles often view the work of economists as abstract not sensitive to institutional contexts and communicated in a formal language spoken by few with decision making authority Not surprisingly papers in the leading economic journals rarely cite clearly pertinent papers in planning journals and vice versa Despite the historical divergence in perspectives and methods urban economics and urban planning share an intense interest in many topic areas the nature of cities the prosperity of urban economies the efficient provision of urban services efficient systems of transportation and the proper allocation of land between urban and environmental uses In bridging this gap the book highlights the best scholarship in planning and economics that address the most pressing urban problems of our day and stimulates further dialog between scholars in urban planning and urban economics *The Routledge Handbook on Cities of the Global South* Susan Parnell, Sophie Oldfield, 2014-03-26 The renaissance in urban theory draws directly from a fresh focus on the neglected realities of cities beyond the west and embraces the global south as the epicentre of urbanism This Handbook engages the complex ways in which cities of the global south and the global north are rapidly shifting the imperative for multiple genealogies of knowledge production as well as a diversity of empirical entry points to understand contemporary urban dynamics The Handbook works towards a geographical realignment in urban studies bringing into conversation a wide array of cities across the global south the ordinary mega global and peripheral With interdisciplinary contributions from a range of leading international experts it profiles an emergent and geographically diverse body of work The contributions draw on conflicting and divergent debates to

open up discussion on the meaning of the city in or of the global south arguments that are fluid and increasingly contested geographically and conceptually It reflects on critical urbanism the macro and micro scale forces that shape cities including ideological demographic and technological shifts and constantly changing global and regional economic dynamics Working with southern reference points the chapters present themes in urban politics identity and environment in ways that re frame our thinking about cities The Handbook engages the twenty first century city through a southern urban lens to stimulate scholarly professional and activist engagements with the city

Social Change And The Middle Classes Tim Butler, Mike Savage, 2013-11-05 First Published in 1995 The study of the middle classes actually poses a variety of interesting challenges Traditionally the social scientific gaze has been directed either downwards to the working classes the poor and the dispossessed or upwards to the wealthy and powerful For all these

reasons a collection of original papers on various aspects of the British middle classes seems an important venture that will cast valuable light on the course of social change in Britain more generally This book is designed to bring together a series of accessible high quality research papers on various aspects of the British middle classes **Gentrification** Loretta Lees, Tom Slater, Elvin Wyly, 2013-10-18 This first textbook on the topic of gentrification is written for upper level undergraduates in geography sociology and planning The gentrification of urban areas has accelerated across the globe to become a central engine of urban development and it is a topic that has attracted a great deal of interest in both academia and the popular press Gentrification presents major theoretical ideas and concepts with case studies and summaries of the ideas in the book as well as offering ideas for future research Future Survey Annual 1985 Michael Marien, 1987-01-01 Landscapes of Power Sharon Zukin, 1993-03-12 The momentous changes which are transforming American life call for a new exploration of the economic and cultural landscape In this book Sharon Zukin links our ever expanding need to consume with two fundamental shifts places of production have given way to spaces for services and paperwork and the competitive edge has moved from industrial to cultural capital From the steel mills of the Rust Belt to the sterile malls of suburbia to the gentrified urban centers of our largest cities the creative destruction of our economy a process by which a way of life is both lost and gained results in a dramatically different landscape of economic power Sharon Zukin probes the depth and diversity of this restructuring in a series of portraits of changed or changing American places Beginning at River Rouge Henry Ford s industrial complex in Dearborn Michigan and ending at Disney World Zukin demonstrates how powerful interests shape the spaces we inhabit Among the landscapes she examines are steeltowns in West Virginia and Michigan affluent corporate suburbs in Westchester County gentrified areas of lower Manhattan and theme parks in Florida and California In each of these case studies new strategies of investment and employment are filtered through existing institutions experience in both production and consumption and represented in material products aesthetic forms and new perceptions of space and time The current transformation differs from those of the past in that individuals and institutions now have far greater power to alter the course of change making the creative destruction of landscape the most important cultural product of our time Zukin s eclectic inquiry into the parameters of social action and the emergence of new cultural forms defines the interdisciplinary frontier where sociology geography economics and urban and cultural studies meet **Fin de Millénaire Budapest** Judit Bodnar, 2001 Fin de Millenaire Budapest combines historical narratives and ethnographic accounts with quantitative evidence to create a detailed picture of a city subjected to the forces of great local and global change In the privatizing of public space the decline of manufacturing the rapid growth of services and the opening of opportunities for entrepreneurs Bodnar captures global urban patterns with a distinct central European accent In particular she shows tensions between the liberating and fragmenting effects of the increasingly private use of urban space and some ways in which the new urban patterns both resemble and transcend cultural patterns from Budapest s socialist past BOOK JACKET
