Pizzorno, Michael T. Murray, 2020-06-26 Selected for Doody s Core Titles 2024 with Essential Purchase designation in Complementary Integrative Health *Neo-Naturopathy New Science of Healing, Or the Doctrine of the Unity of Diseases (Classic Reprint)* Louis Kuhne, 2015-07-07 Excerpt from *Neo Naturopathy New Science of Healing or the Doctrine of the Unity of Diseases* The healing art is as old as mankind Man had always been divorced from perfect health by the effects of sin crime sensuality wrong methods of eating and drinking plagues famine the struggle for existence and the horrors of war The killing that goes on in nature is not nearly so devilish as the bloody wars of extermination among men Official medicine is as blindly at work today as it has ever worked promulgating false methods of medical treatment to conceal its failures to cure by the equally false methods it has discarded and the medical methods of today will in turn be discarded for the grotesque and equally false methods of tomorrow Official schools of medicine and individual practitioners are flooding the medical journals with literature on the practice of medicine that is based on the treatment of symptoms but which has no effect on the cause of the given ailment Bacteriologists contend that microbes are the sole origin of disease whereas the truth is that disease is primarily caused by the accumulation of filth or dead organic matter in the tissues of the body that can only be removed by agents consisting of an application of the forces of nature from without or by nature herself by the calling into being micro organisms or microbes that are the product of fermentation and are the indispensable agents that convert all manurial matter into the saline constituents that are essential for the nutrition of vegetable life In the natural purification of the atmosphere from its carbonic acid and carbonic dioxide by plants and the natural purification of filth polluted streams by micro organisms we see how nature works Nature is a ceaseless round of beneficence towards organized beings She destroys the malign agents of disease by transforming them into beneficent materials of animal and plant health

A Taste for Purity Julia Hauser,2023-12-05 In nineteenth century Europe and North America an organized vegetarian movement began warning of the health risks and ethical problems of meat eating Presenting a vegetarian diet as a cure for the social ills brought on by industrialization and urbanization this movement idealized South Asia as a model In colonial India where diets were far more varied than Western admirers realized new motives for avoiding meat also took hold Hindu nationalists claimed that vegetarianism would cleanse the body for anticolonial resistance and an increasingly militant cow protection movement mobilized against meat eaters particularly Muslims Unearthing the connections among these developments and many others Julia Hauser explores the global history of vegetarianism from the mid nineteenth century to the early Cold War She traces personal networks and exchanges of knowledge spanning Europe the United States and South Asia highlighting mutual influence as well as the disconnects of cross cultural encounters Hauser argues that vegetarianism in this period was motivated by expansive visions of moral physical and even racial purification Adherents were convinced that society could be changed by transforming the body of the individual Hauser demonstrates that vegetarians in India and the West shared notions of purity which drew some toward not only internationalism and anticolonialism but also racism nationalism and violence Finding preoccupations with race and masculinity as well as links to colonialism and eugenics she reveals the implication of vegetarian movements in exclusionary hierarchical projects Deeply researched and compellingly argued A Taste for Purity rewrites the history of vegetarianism on a global scale

Naturopathy in South India Eva Jansen, 2016-08-15. In *Naturopathy in South India: Clinics between Professionalization and Empowerment*. Eva Jansen offers a rich ethnographic account of current naturopathic thinking and practices and examines its complex history, multiple interpretations and antagonisms. This book presents two major forms of Naturopathy in contemporary South India. On one side a scientific professional branch models themselves after allopathic practitioners. On the other side a group of ideologists uses an approach to patient treatment that is grounded in the principles of simplicity, transparency, a critique of globalization and a focus on patient empowerment. Jansen discusses the current political and medical clash between Naturopaths in South India from the perspectives of practitioners, employees, the media and patients.
