The American Adrenaline Narrative Kristin J. Jacobson,2020-06-01 The American Adrenaline Narrative considers the nature of perilous outdoor adventure tales their gendered biases and how they simultaneously promote and hinder ecological sustainability To explore these themes Kristin J Jacobson defines and compares adrenaline narratives by a range of American authors published after the first Earth Day in 1970 a time frame selected as a watershed moment for the contemporary American environmental movement The forty plus years since that day also mark the rise in the popularity and marketing of many things as extreme including sports jobs travel beverages gum makeovers laundry detergent and even the environmental movement itself Jacobson maps the American eco imagination via adrenaline narratives grounding them in the traditional literary practice of close reading analysis and in ecofeminism She surveys a range of popular and lesser known primary texts by American authors including best selling books such as Jon Krakauer s Into Thin Air and Aron Ralston s Between a Rock and a Hard Place and lesser known texts such as Patricia C McCairen s Canyon Solitude Eddy L Harris s Mississippi Solo and Stacy Allison s Beyond the Limits She also discusses such narratives as they appear in print and online articles and magazines feature length and short films television shows amateur videos social networking site posts fiction advertising and blogs Jacobson contends that these stories constitute a distinctive genre because unlike traditional nature travel and sports writing adrenaline narratives sustain heightened risk or the element of the extreme within a natural setting Additionally these narratives provide important insight into the American environmental imagination s connection to masculinity and adventure knowledge that helps us grasp the current climate crisis and how narrative understanding provides a needed intervention
