The America Syndrome Betsy Hartmann, 2017-05-23. Has apocalyptic thinking contributed to some of our nation's biggest problems: inequality, permanent war, and the despoiling of our natural resources? From the Puritans to the present, historian and public policy advocate Betsy Hartmann sheds light on a pervasive but until now invisible theme shaping the American mindset: apocalyptic thinking or the belief that the end of the world is nigh. Hartmann makes a compelling case that apocalyptic fears are deeply intertwined with the American ethos to our detriment. In *The America Syndrome*, she seeks to reclaim human agency and in so doing revise the national narrative. By changing the way we think, we just might change the world.

Since the early 1990s, there are two increasingly hot topics attracting numerous scholarly attentions in Chinese politics: first, it is the transformation of China's political system; second, it is China's increasingly involvement in international regimes. Nevertheless, until now, there are only a few scholars to work out the distinctive relations between them, and even less people work on the bureaucratic politics level. By explaining and evaluating the development of policymaking coordination in the United Nations Framework Convention on Climate Change (UNFCCC), the author demonstrates the argument that international regimes have contributed to the development of coordination in Chinese policymaking, taking the UNFCCC as a departure.
