Bayesian Network Modeling of Corrosion Narasi Sridhar, 2024-06-29 This book represents a compilation of experience from a slate of experts involved in developing and deploying Bayesian Networks BN for corrosion management The contributors describe how probability distributions can be developed for corroding systems and BN can be applied as an ideal framework to deal with corrosion risk Corrosion can develop suddenly and grow rapidly after a long incubation period and take many non uniform aspects including pitting and stress corrosion cracking that cannot be mitigated by simply bulking up the system They also describe how complex engineering structures and systems are influenced by many natural and engineering factors that come together in myriad ways It provides a broad perspective to the reader on the potential of BN as an artificial intelligence tool for corrosion risk management and the challenges for implementing it *Applications of Invariance in Computer Vision* Joseph L. Mundy, Andrew Zisserman, 1994-07-20 This book is the proceedings of the Second Joint European US Workshop on Applications of Invariance to Computer Vision held at Ponta Delgada Azores Portugal in October 1993 The book contains 25 carefully refereed papers by distinguished researchers The papers cover all relevant foundational aspects of geometric and algebraic invariance as well as applications to computer vision particularly to recovery and reconstruction object recognition scene analysis robotic navigation and statistical analysis In total the collection of papers together with an introductory survey by the editors impressively documents that geometry in its different variants is the most successful and ubiquitous tool in computer vision
