M. Destler, 1995 This is an updated edition of the most influential and widely read analysis of the US trade policymaking system In the third edition of this American Political Science Association's Gladys Kammerer award winner for the best book on US national policy Destler extends his original analysis to assess the politics of the extraordinarily contentious debates over NAFTA and the Uruguay Round He explains how free traders overcame the opposing forces represented by H Ross Perot Pat Buchanan and Ralph Nader to secure congressional approval for the two most important US trade agreements in the postwar period The liberal trade regime survived these latest challenges but Destler nevertheless argues that there is a need for reform of the policymaking system in the 1990s to advance US led free trade negotiations in the Western Hemisphere and the Asia Pacific as well as future rounds of global liberalization Published jointly with the Twentieth Century Fund **The**

Rules of the Global Game Kenneth W. Dam, 2001-10-25 A rare book that can be read with pleasure and profit by layperson and economist alike The Rules of the Global Game takes readers beyond the headlines to understand the policies that shape the economy Ethics and International Relations Joel H. Rosenthal, 2017-03-02 This volume offers a new dimension to realist theories about world politics It questions both the theoretical and empirical foundations of much of traditional realist thought by offering realist oriented analyses that emphasize the possibilities of cooperation and accommodation through agreement over common motivations and concerns The articles in this volume demonstrate that moral considerations can and do play a significant role in shaping state behavior and that despair about the possibility of improving the systems and institutions within which we live is unwarranted Specific points of normative convergence are raised in some detail especially on issues of war membership and authority humanitarian concern and the social consequences of globalization Three ethical concepts form the core of the realism reconsidered argued for here namely the ideas of pluralism rights and fairness
