

**RECON PILOT PROJECT: A PROGRESS REPORT,
APRIL-SEPTEMBER 1970**

Henriette D. AVRAM and Lenore S. MARUYAMA: MARC Development Office, Library of Congress, Washington, D. C.

A synopsis of the third progress report on the RECON Pilot Project submitted by the Library of Congress to the Council on Library Resources. An overview is given of the progress made from April through September 1970 in the following areas: RECON production, format recognition, research titles, microfilming, and investigation of input devices. In addition, the status of the tasks assigned to the RECON Working Task Force are briefly described.

INTRODUCTION

The RECON Pilot Project was established in August 1969 to test various techniques for retrospective conversion in an operational environment and to convert a useful body of records into machine readable form. It is being supported with funds from the Council on Library Resources, the U.S. Office of Education, and the Library of Congress. This article summarizes the third progress report of the pilot project submitted by the Library of Congress to the Council and has addressed itself to all aspects of the project, regardless of the source of funding, in order to present a meaningful document.

Two previous articles in the *Journal of Library Automation* summarized the first and second progress reports, respectively (1), (2). This article describes the activities occurring April through September 1970.

PROGRESS—APRIL THROUGH SEPTEMBER 1970

RECON Production

At the present time, the RECON data base contains approximately 20,000 records. It appears that the original estimates on the number of titles to be input during the RECON Pilot Project were considerably higher than the actual number found to be eligible. This situation occurred because of the following circumstances:
