Narratives of Consent and Reproductive Subjects Samantha Halliday, Rebecca Brione, Jacqueline Nicholls, 2025-09-02 Consent is the golden principle that determines the legality of most medical treatment However whilst choice is the much vaunted central tenet of maternity care its importance emphasised in policy documents the lived experience is often rather different particularly in the case of individuals constructed as other This collection brings together a range of researchers from multiple disciplines to address the issue of choice in the context of reproduction focussing upon narratives of consent as they pertain to reproductive subjects who all too often are rendered invisible by the law by the healthcare professionals treating them or by society It explores the contours of consent in England and Wales engaging with reproductive justice by focussing upon the way in which reproductive subjects are othered treated differently due to their skin colour their genetic makeup the fact that they have a serious mental illness or even those who do not want to be mothers It presents original research bringing together multiple perspectives in examining the way in which individuals are rendered invisible in the context of reproductive healthcare The book will be essential reading for academics and professionals in law nursing medicine midwifery sociology ethics and anthropology

Parenting on Earth Elizabeth Cripps, 2023-04-18 Being parents and being human building hope for our children in a fragile world Environmental catastrophes pandemics antibiotic resistance institutionalized injustice and war in a world so out of balance what does it take or even mean to be a good parent This book is one woman s search for an answer as a moral philosopher activist and mother Drawing on the insights of philosophy and the experience of parent activists Elizabeth Cripps calls for parents to think radically about exactly what we owe our children and everyone else She shows how our children s needs are inseparable from the fate of the earth and the fortunes of others and how much is at stake in parenting today And she asks the hardest question should we have kids at all Timely and thoughtful Parenting on Earth extends a challenge to anyone raising children in a troubled world and with it a vision of hope for our children s future Cripps envisions a world where kids can prosper and grow a just world with thriving social systems and ecosystems where future generations can flourish and all children can lead a decent life She explains with bracing clarity why those raising kids today should be a force for change and bring up their children to do the same Hard as this can be in the face of political gridlock ecoanxiety and general daily grind the tools of philosophy and psychology can help us find a way

Feminist Phenomenology Futures Helen A. Fielding, Dorothea E.

Olkowski,2017-06-16 Distinguished feminist philosophers consider the future of their field and chart its political and ethical course in this forward looking volume Engaging with themes such as the historical trajectory of feminist phenomenology ways of perceiving and making sense of the contemporary world and the feminist body in health and ethics these essays affirm the base of the discipline as well as open new theoretical spaces for work that bridges bioethics social identity physical ability and the very nature and boundaries of the female body Entanglements with thinkers such as Heidegger Merleau Ponty Beauvoir and Arendt are evident and reveal new directions for productive philosophical work Grounded in the richness of the feminist philosophical tradition this work represents a significant opening to the possible futures of feminist phenomenological research

Mary Wollstonecraft Susan Laird,2014-10-23 Best known as author of A Vindication of the Rights of Woman 1792 if not also as mother of Frankenstein s author Mary Shelley Mary Wollstonecraft survived domestic violence and unusual independent womanhood to write engaging letters fiction history critical reviews handbooks and treatises Her work on coeducational thought was a major early modern influence upon the development of a post Enlightenment tradition and continues to have vital relevance today Celebrated as an early modern feminist abolitionist and socialist philosopher Wollstonecraft had little formal schooling but still worked as a governess school teacher and educational writer This succinct critical account of that prolific research begins by recounting her revolutionary self education Susan Laird explains how Wollstonecraft came to criticize moral flaws in both men s and women s private education based on irrational assumptions about sexual character under the Divine Right of Kings It was to remedy those moral flaws of monarchist education that Wollstonecraft theorized her influential but incomplete concept of publicly financed universal egalitarian coeducation

The Oxford Handbook of Reproductive Ethics Leslie Francis,2017 Intimate and medicalized natural and technological reproduction poses some of the most challenging ethical dilemmas of our time This volume brings together scholars from multiple perspectives to address both traditional and novel questions about the rights and responsibilities of human reproducers their caregivers and the societies in which they live Conscience ,2003

Procreative Justice Erik Magnusson,2025-07-31 This book explores how considerations of justice apply to procreative decision making Despite its immense personal significance procreation is an inherently other regarding endeavor By its very nature the decision to procreate is the decision to bring into existence another morally considerable being one who will be exposed to the full range of harms benefits and risks that accompany a typical human life and one who cannot by its nature ever consent to being born Moreover when this decision is undertaken in a community of persons it is also a decision to affect the lives of others in a host of profound if often underappreciated ways from its effects on population size and environmental sustainability to its consequences for a community s distribution of resources In many ways of course these interests coincide adults need children for their parenting projects societies need citizens for the maintenance of their institutions and children themselves are often happy to have been brought into existence However as the book demonstrates

the various interests that are implicated by procreative decision making can also come into conflict as well and in ways that raise basic questions of justice Through a systematic examination of six of these questions the author argues that taking adequate stock of the conflicting interests at stake in procreative decision making leads to a narrower view of the conditions under which it is morally permissible to procreate and a much more demanding conception of our procreative responsibilities Procreative Justice will be of interest to researchers and advanced students working on the morality of procreation and related areas of philosophy including bioethics intergenerational ethics environmental ethics population ethics and the ethics of the family

The Ethics of Pregnancy, Abortion and Childbirth Helen Watt, 2016-01-08 The Ethics of Pregnancy Abortion and Childbirth addresses the unique moral questions raised by pregnancy and its intimate bodily nature From assisted reproduction to abortion and vital conflict resolution to more everyday concerns of the pregnant woman this book argues for pregnancy as a close human relationship with the woman as guardian or custodian Four approaches to pregnancy are explored uni personal neighborly maternal and spousal The author challenges not only the view that there is only one moral subject to consider in pregnancy but also the idea that the location of the fetus lacks all inherent unique significance It is argued that the pregnant woman is not a mere neighbor or helpful stranger to the fetus but is rather already in a real familial relationship bringing real familial rights and obligations If the status of the fetus is conclusive for at least some moral questions raised by pregnancy so too are facts about its bodily relationship with and presence in the woman who supports it This lucid accessible and original book explores fundamental ethical issues in a rich and often neglected area of philosophy in ways of interest also to those from other disciplines

Motherhoods, Markets and Consumption Stephanie O'Donohoe, Margaret Hogg, Pauline Maclaran, Lydia Martens, Lorna Stevens, 2013-10-30 It takes more than a baby to make a mother and mothers make more than babies Bringing together a range of international studies Motherhoods Markets and Consumption examines how marketing and consumer culture constructs particular images of what mothers are what they should care about and how they should behave exploring how women's use of consumer goods and services shapes how they mother as well as how they are seen and judged by others Combining personal accounts from many mothers with different theoretical perspectives this book explores How advertising media and consumer culture contribute to myths and stereotypes concerning good and bad mothers How particular consumer choices are bound up with women's identities as mothers The role of consumption for women entering different phases of their mothering lives such as pregnancy early motherhood and the empty nest

The Bloomsbury Handbook of Care Ethics Matilda Carter, 2025-07-24 Emphasising the vulnerability and interdependence of humans care ethics has emerged in recent years as a powerful alternative to dominant modes of thinking in moral philosophy Bringing together the theoretical and applied dimensions of care ethics this pioneering volume provides an authoritative overview of what care ethics is and the contributions it can make to pressing contemporary problems Divided into two parts Part I of The Bloomsbury Handbook of Care Ethics traces the development of care ethics how it

interacts with other central components of moral reasoning such as freedom and normative justification and the ongoing discussions among care ethicists about the direction scope and underlying mechanisms of the theory Part II then showcases the varied contributions care ethics can make to key areas of applied philosophy and to research in the social sciences from disability and care medical ethics and feminist ethics to timely issues such as maternity care and public administration With an international team of experts providing interdisciplinary approaches to care this is the place to start if you want to gain an in depth insight into the field of care ethics and its crucial role in addressing worldwide vulnerabilities

Motherhood in Literature and Culture Gill Rye,Victoria Browne,Adalgisa Giorgio,Emily Jeremiah,Abigail Lee Six,2017-06-26 Motherhood remains a complex and contested issue in feminist research as well as public discussion This interdisciplinary volume explores cultural representations of motherhood in various contemporary European contexts including France Italy Germany Portugal Spain and the UK and it considers how such representations affect the ways in which different individuals and groups negotiate motherhood as both institution and lived experience It has a particular focus on literature but it also includes essays that examine representations of motherhood in philosophy art social policy and film The book s driving contention is that through intersecting with other fields and disciplines literature and the study of literature have an important role to play in nuancing dialogues around motherhood by offering challenging insights and imaginative responses to complex problems and experiences This is demonstrated throughout the volume which covers a range of topics including discursive and visual depictions of pregnancy and birth the impact of new reproductive technologies on changing family configurations the relationship between mothering and citizenship the shaping of policy imperatives regarding mothering and disability and the difficult realities of miscarriage child death violence and infanticide The collection expands and complicates hegemonic notions of motherhood as the authors map and analyse shifting conceptions of maternal subjectivity and embodiment explore some of the constraining and or enabling contexts in which mothering takes place and ask searching questions about what it means to be a mother in Europe today It will be of interest not only to those working in gender women s and feminist studies but also to scholars in literary and cultural studies and those researching in sociology criminology politics psychology medical ethics midwifery and related fields

Being Born Alison Stone,2019-09-26 All human beings are born and all human beings die In these two ways we are finite our lives begin and our lives come to an end Historically philosophers have concentrated attention on our mortality and comparatively little has been said about being born and how it shapes our existence Alison Stone sets out to overcome this oversight by providing a systematic philosophical account of how being born shapes our condition as human beings Drawing on both feminist philosophy and existentialist concerns about the structure of meaningful human existence Stone offers an original perspective on human existence She explores how human existence is shaped by the way that we are born Taking natality into account transforms our view of human existence and illuminates how many of its aspects are connected with our birth These aspects include

dependency the relationality of the self vulnerability reception and inheritance of culture and history embeddedness in social power situatedness and radical contingency Considering natality also sheds new light on anxiety mortality and the temporality of human life This book therefore bears on death and the meaning of life as well as many debates in feminist and continental philosophy

Pregnancy Without Birth Victoria Browne, 2022-09-08 Pregnancy is so thoroughly entangled with birth and babies in the popular imagination that a pregnancy which ends in miscarriage consistently appears as a failure or a waste of time indeed as not proper to pregnancy at all But in this compelling book Victoria Browne argues that reflection on miscarriage actually deepens and expands our understanding of pregnancy forcing us to consider what pregnancy can amount to besides the production of a child By exploring common themes within personal accounts of miscarriage including feelings of failure self blame and being stuck in limbo *Pregnancy Without Birth* critically interrogates teleological discourses and disciplinary ideologies that elevate birth as pregnancy's natural and normal endpoint As well as politicizing miscarriage as a feminist issue the book articulates an alternative intercorporeal philosophy of pregnancy which embraces variation invites us to sit with ambiguity contingency and suspension and enables us to see subjective agency in all pregnancies even as they are shaped by biological political and social forces beyond our personal control What emerges is a relational feminist politics of full spectrum solidarity social justice and care rather than individualized choice and responsibility which breaks down presumed oppositions between pregnancy miscarriage abortion stillbirth and live birth and liberates pregnancy from reproductive futurism
