The Oxford Encyclopedia of American Cultural and Intellectual History Joan Shelley Rubin, Scott E. Casper, 2013-03-14 The Oxford Encyclopedia of American Cultural and Intellectual History brings together in one two volume set the record of the nation s values aspirations anxieties and beliefs as expressed in both everyday life and formal bodies of thought Over the past twenty years the field of cultural history has moved to the center of American historical studies and has come to encompass the experiences of ordinary citizens in such arenas as reading and religious practice as well as the accomplishments of prominent artists and writers Some of the most imaginative scholarship in recent years has emerged from this burgeoning field. The scope of the volume reflects that development the encyclopedia incorporates popular entertainment ranging from minstrel shows to video games middlebrow ventures like Chautauqua lectures and book clubs and preoccupations such as Perfectionism and Wellness that have shaped

Americans behavior at various points in their past and that continue to influence attitudes in the present The volumes also make available recent scholarly insights into the writings of political scientists philosophers feminist theorists social reformers and other thinkers whose works have furnished the underpinnings of Americans civic activities and personal concerns Anyone wishing to understand the hearts and minds of the inhabitants of the United States from the early days of settlement to the twenty first century will find the encyclopedia invaluable **Oualitative Research on Sport and Physical Culture** Kevin Young, Michael Atkinson, 2012-10-12 Addresses issues in methodology contemporary issues in research methods and innovative trends in qualitative research that are addressed through case study examples from areas of research in sport studies This title includes historical methods ethnography auto ethnography embodied methods The Bioarchaeology of Violence Debra L. Martin, Ryan P. Harrod, 2012-08-05 Human interviewing and narratives violence is an inescapable aspect of our society and culture As the archaeological record clearly shows this has always been true What is its origin What role does it play in shaping our behavior How do ritual acts and cultural sanctions make violence acceptable These and other questions are addressed by the contributors to The Bioarchaeology of Violence Organized thematically the volume opens by laying the groundwork for new theoretical approaches that move beyond interpretation it then examines case studies from small scale conflict to warfare to ritualized violence Experts on a wide range of ancient societies highlight the meaning and motivation of past uses of violence revealing how violence often plays an important role in maintaining and suppressing the challenges to the status guo and how it is frequently a performance meant to be witnessed by others. The interesting and nuanced insights offered in this volume explore both the costs and the benefits of violence throughout human prehistory Buddhism in Contemporary Tibet Melvyn C. Goldstein, Matthew T. Kapstein, 2023-09-01 Following the upheavals of the Cultural Revolution the People's Republic of China gradually permitted the renewal of religious activity Tibetans whose traditional religious and cultural institutions had been decimated during the preceding two decades took advantage of the decisions of 1978 to begin a Buddhist renewal that is one of the most extensive and dramatic examples of religious revitalization in contemporary China The nature of that revival is the focus of this book Four leading specialists in Tibetan anthropology and religion conducted case studies in the Tibet autonomous region and among the Tibetans of Sichuan and Qinghai provinces There they observed the revival of the Buddhist heritage in monastic communities and among laypersons at popular pilgrimages and festivals Demonstrating how that revival must contend with tensions between the Chinese state and aspirations for greater Tibetan autonomy the authors discuss ways that Tibetan Buddhists are restructuring their religion through a complex process of social political and economic adaptation Buddhism has long been the main source of Tibetans pride in their culture and country These essays reveal the vibrancy of that ancient religion in contemporary Tibet and also the problems that religion and Tibetan culture in general are facing in a radically altered world Following the upheavals of the Cultural Revolution the People's Republic of China gradually permitted the

renewal of religious activity Tibetans whose traditional religious and cultural institutions had been decimated during the Louisiana History ,2007 preceding two decades **The Literature of Reconstruction** Brook Thomas, 2017-01-17 In this groundbreaking new study author Brook Thomas argues that literary analysis can enhance our historical understanding of race and Reconstruction The standard view that Reconstruction ended with the Compromise of 1877 is a retrospective construction Works of literature provide the perspective of those who continued to see possibilities for its renewal well past 1877 Historians have long tried to reconcile social history s emphasis on the local with political history s emphasis on the national Literature creates national political allegories while focusing on events in a particular locale Moreover the debate over Reconstruction was a debate about state legitimacy as well as specific laws It was a question of foundational myths as well as foundational legal principles Literature s political allegories allow us to recreate those debates rather than view the end of Reconstruction as a foregone conclusion Because many of the issues raised by Reconstruction remain unresolved those debates continue into the present Chapters treat how the racial issues raised by Reconstruction are interwoven with debates over state v national authority efforts to combat terrorism the KKK the paternalism of welfare economic expansion and the question of who should rightly inherit the nation s past Thomas examines authors who opposed Reconstruction authors who supported it and authors who struggled with mixed feelings This exciting text will set the standard in literary historical studies for decades to come Recognizing the Psychological and Cultural Strengths of Black Americans Robert T. Carter, 2024-09-20 This book examines the cultural beliefs and practices of Black folks in relation to psychological strength Divided into four parts the book begins with a discussion on the history of African civilizations including an analysis of faiths architecture and cultural diversity of the continent followed by a meaningful dialogue on the history of slavery and plantations in North America The later sections are a study on the contribution of the African American community towards America's prosperity The book explores cultural values as a source of power and uses historical social and psychological research to construct a framework of Black cultural values and psychological resolve The author offers practical applications and interventions to demonstrate how this framework can be applied to training and policy matters on both individual and systemic levels Recognizing the Psychological and Cultural Strengths of Black Americans is essential reading for students and academics in the fields of Psychology Sociology Critical Race Theory Political Science and other related disciplines It will also be a useful resource for professionals including policy makers psychologist counsellors educators and social workers

were contested by a number of vying groups It stresses the influence of the culture of postwar social reconstruction in shaping these groups ideas about physical education Through this analysis the book attempts to explain how physical education has been socially constructed during the postwar years and more specifically to suggest how the subject came to be used as a symbol of subversive left wing values in the campaign leading to the 1987 election In more general terms the book provides a case study of the social construction of school knowledge The book takes an original approach to the question of curriculum change in physical education building on increasing interest in historical research in the field of curriculum studies It adopts a social constructionist perspective arguing that change occurs through the active involvement of competing groups in struggles over limited material and ideological discursive resources It also draws on contemporary developments in social and cultural theory particularly the concepts of discourse and ideological hegemony to explain how the meaning of physical education has been constructed and how particular definitions of the subject have become orthodoxes The book presents new historical evidence from a period which had previously been neglected by researchers despite the fact that 1945 marked a watershed in the development of the understanding and teaching of physical education Frantz Fanon and the Future of Cultural Politics Anthony C. Alessandrini, 2014-07-01 This book focuses on a in schools reading of Frantz Fanon's work and life asking how the work of a revolutionary writer such as Fanon might be best appropriated for contemporary political and cultural issues Separate chapters introduce Fanon's life and examine the question of Fanon as our contemporary review the field of Fanon studies that has grown up around his work bring Fanon into conversation with the critical contemporary figures Edward Said Michel Foucault Jamaica Kincaid and Paul Gilroy and turn to Fanon's work to think through the contemporary popular uprisings that have come to be known as the Arab Spring The book concludes by arguing that a reevaluation of Fanon's life and work can provide us with a particular set of lessons about solidarity lessons that are crucial for the contemporary political struggles that face us today and that will continue to confront us in the future Finding Something Different Frantz Fanon and the Future of Cultural Politics is inspired by Fanon s unsparing struggle against the depredations of racism and colonialism and his lifelong commitment to finding something different
