Reconstructing Psychological Practice:

Reconstructing Psychological Practice Ian G. McPherson, Andrew Sutton, 1981 *Reconstructing Psychological Practice* Ian G. McPherson, Andrew Sutton, 1981 **Practicing Feminisms, Reconstructing Psychology** Jill G Morawski, 2025-10-01 Practicing Feminisms Reconstructing Psychology is a valuable survey of developments to date in feminist psychology and a provocative assessment of its future possibilities For many psychologists engaged with the questions raised by modern feminist the reconciliation of scientific methods and feminist commitments has been a complicated and sometimes perplexing project In her book Jill Morawski attempts to move beyond the apparent impasses toward a constructive feminist psychology The book assesses the substantive advances feminist psychology has made and proposes ways in which those transformations can lead to new research and methodologies These transformative interventions Morawski argues have often consisted of local and partial alterations to established methods rather than a programmatic metatheory or a formulaic methodology She reviews a variety of exemplary studies that demonstrate how such intermittent practices taken together constitute a groundword for radically new forms of psychological inquiry The study describes feminist challenges to long held conceptions of objectivity subjectivity and validity and examines emergent problems and ongoing debates The feminist innovations discussed reveal the impossibility of a pure and abstract objective stance and demonstrate the feasibility of situated and critical objective practices Morawski also shows how experimental investigative strategies are generating new perspectives on subjectivity which incorporate agency as well as dependence reflection as well as reactivity Feminist inquiry is modifying the procedures through which knowledge is warranted with different evaluations of validation processes Despite the transformations in these areas the pursuit of a feminist psychology remains in transition in a liminal space Among the emerging issues Morawski explores are vicissitudes of reflexivity the investigator's self and the cultural bases of psychological knowledge **A Critical Reconstruction of Evidence-based Practice in Psychology** Henrik Berg, 2024-10-30 Evidence based practice in psychology is the dominant regulatory principle in clinical psychology defining psychological knowledge and its application This book provides a critical analysis and a reconstruction of the policy statement focusing on epistemology and ethics The book shows the ideological and historical background for the development of evidence based practice in psychology It covers the main conceptual and empirical arguments leading to this transition including philosophy and evidence based medicine The book goes on to show some of the defects of evidence based practice in psychology it misconstrues psychological knowledge reduces the number of ethical resources available to regulate psychological practices does not fulfil its ambitions of being a tripartite concept and undertheorises the issue of integration The closing chapters provide a constructive critique preserving the valuable aspects of evidence based practice in psychology while developing it to make it function adequately In that sense the book aims to change the way psychological knowledge is understood and used in practice This text will be engaging and thought

provoking for anyone using psychological knowledge with patients or clients It will provide analytic resources to understand psychology better and facilitate the application of psychological knowledge in various settings The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Reconstructing the Psychological Subject Betty M Bayer, John Shotter, 1998-01-12 This major book offers a comprehensive overview of key debates on subjectivity and the subject in psychological theory and practice In addition to social construction's long engagement with social relations this volume addresses questions of the body technology intersubjectivity writing and investigative practices The internationally renowned contributors explore the tensions and opposing viewpoints raised by these issues and show how analyzing the psychological subject interrelates with reforming the practices of psychology Drawing on perspectives that include feminism dialogics poststructuralism hermeneutics Lacanian psychoanalysis and cultural or social studies of science readers are guided through pivotal

Training Behaviour Therapists (Psychology Revivals) Derek Milne, 2015-03-27 Originally published in 1986 one of the major developments in behavioural psychotherapy and mental health in the previous decade had been the growing involvement of non psychologists in behaviour therapy This was a result of the fact that there were too few psychologists to cope with problem behaviour and that other professionals or carers began to appreciate more clearly their potential as agents of behaviour change Foremost among these mediators of therapy were parents nurses particularly psychiatric nurses and teachers especially remedial teachers Their involvement had greatly increased the efficiency of behaviour therapy at the time and opened up a new era in applied psychology It also entailed the development of new training formats evaluation procedures and implementation strategies The main aim of this book was to provide a summary of the research relevant to these issues and to offer practical guidelines to those who were interested in training or being trained as behaviour therapists For this reason there are chapters by researchers who have been involved in training parents nurses and teachers These chapters provide a detailed account of training in a form that was rarely available in published form at the time and even today should be of great assistance to readers

Critical Educational Psychology Antony J. Williams, Tom Billington, Dan

Goodley, Tim Corcoran, 2016-10-18 The first textbook of its kind Critical Educational Psychology is a forward thinking approach to educational psychology that uses critical perspectives to challenge current ways of thinking and improve practice

The Handbook of Clinical Adult Psychology S. J. E. Lindsay, 1994 The Handbook of Clinical Adult Psychology provides a comprehensive and thorough practical guide to modern clinical psychology Clinical psychology is no longer devoted just to the traditional areas of neuropsychology and mental health but is now contributing to many other areas such as health promotion behavioural medicine issues of professional management and the presentation and management of forensic evidence The Handbook covers all these areas which are of critical concern to clinical psychologists and related professions Clinical psychologists are called upon not only to treat mental illness and problems associated with medical afflictions but are also required to investigate screen and advice on the treatment of clients referred to them by medical practitioners social workers nurses and others In addition one of the strengths of clinical psychology has been that careful investigation contributes to successful treatment Therefore investigation and treatment are clearly differentiated in separate chapters for most topics in this book with each chapter written by a specialist in the area Many of the practices developed by clinical psychologists are now conducted by other professions in the course of their work The Handbook of Clinical Adult Psychology will be immensely valuable for all professionals in training such as clinical psychologists nurses psychiatrists counsellors and social workers It will also be a valuable reference work for members of those professions in practice

Psychological Therapies for the Elderly Ian Hanley, Mary Gilhooly, 2018-09-21 Prior to publication it had only recently been appreciated that psychology had a great deal to offer in therapeutic terms to a wide range of patients and was not merely concerned with assessing and identifying problems This is particularly so with the elderly where physical and mental problems and multiple pathology are compounded and where psychological aspects of the quality of life are so important The focus of this book originally published in 1986 is on therapeutic approaches and the effective implementation of services While the book is aimed particularly at clinical psychologists it will also be of great interest to medical nursing or occupational therapy staff working with elderly people

Current Issues in Clinical Psychology Eric Karas, 2012-12-06 In January 1980 a Refresher Course in Clinical Psychology was held in Liverpool The aim of the course was to apply a contemporary perspective to issues of significance and interest to clinical psychologists in Britain and more specifically to afford the opportunity for past graduates in clinical psychology from Liverpool University to meet together to share their working experiences Following the success of this event it was decided by the Mersey Regional Group of Clinical Psychologists to embark upon a long term project The Annual Merseyside Course in Clinical Psychology as a means to provide a post qualification training forum for practitioners of clinical psychology and related professions In the tradition of the refresher course it was designed to impart to its delegates and to readers of this book the most recent ideas in a variety of fields of enquiry within clinical practice and theory The growing emphasis on post qualification training from within the

clinical psychology profession marks an important milestone in its development and the inception of this course reflects this growth by fulfilling its further purpose of providing a regular platform from which national and international innovations and developments can be presented and discussed

Elements of Applied Psychology Peter Spurgeon, Roy Davies, Antony Chapman, 2015-12-22 Originally published in 1994 *Elements of Applied Psychology* provided an introductory survey of the major aspects of applied psychology at the time for students of psychology as a main or ancillary subject It was the first text to investigate the pressures created by this increased interest in applied psychology offering insight into the factors which had influenced its patterns and direction The book comprises 18 chapters covering both the well established fields of professional psychology such as educational clinical counselling and occupational organisational psychology and areas of developing application at the time including applied cognitive psychology economic and health psychology and psychology and law The text will still be of value to students considering possible career areas in psychology students on psychology courses pondering choice of specialism and those students taking psychology as a subsidiary subject in one of the areas covered It is also consistent with the increasing link between the academic community and practitioners It will serve to increase the understanding and exchange

Refocusing Educational Psychology Neville Jones, Norah Frederickson, 1990 This work is a follow up volume to *Management and the Psychology of Schooling* 1988 which looked at an alternative style of working for psychological services in the future From this starting point the present volume aims to be more precise about what a psychology of schooling entails

Vygotsky and Special Needs Education Harry Daniels, Mariane Hedegaard, 2011-04-21

Psychology and Psychotherapy (Psychology Revivals) David Pilgrim, 2015-03-27 Originally published in 1983 fifteen well known psychologists and psychotherapists write about their personal interests to give the reader a vivid picture of the complexities of psychotherapy in Britain at the time They explore aspects of the interaction and intersection of the psychological and psychotherapeutic worlds paying particular attention to the practical and theoretical controversies involved in this overlap The first half of the book concerns itself with problems of theory and practice in psychology and psychotherapy while the second half deals with professional conflicts and political issues impinging upon the practice of psychotherapy by psychologists Areas of concern and controversy that are scrutinised include the problematic relationship between academic psychology and psychotherapy doubts and certainties in psychotherapy the psychology of helping the relevance of the psychodynamic tradition inter professional disputes women and psychotherapy and social class issues in psychotherapy
