Wiredu,1992      **Reconstructing Human Rights** Joe Hoover,2016-05-27 We live in a human rights world The language of human rights claims and numerous human rights institutions shape almost all aspects of our political lives yet we struggle to know how to judge this development Scholars give us good reason to be both supportive and sceptical of the universal claims that human rights enable alternatively suggesting that they are pillars of cross cultural understanding of justice or the ideological justification of a violent and exclusionary global order All too often however our evaluations of our human rights world are not based on sustained consideration of their complex ambiguous and often contradictory consequences

Reconstructing Human Rights argues that human rights are only as good as the ends they help us realise We must attend to what ethical principles actually do in the world to know their value So for human rights we need to consider how the identity of humanity and the concept of rights shape our thinking structure our political activity and contribute to social change Reconstructing Human Rights defends human rights as a tool that should enable us to challenge political authority and established constellations of political membership by making new claims possible Human rights mobilise the identity of humanity to make demands upon the terms of legitimate authority and challenges established political memberships In this work it is argued that this tool should be guided by a democratising ethos in pursuit of that enables claims for more democratic forms of politics and more inclusive political communities While this work directly engages with debates about human rights in philosophy and political theory in connecting our evaluations of the value of human rights to their worldly consequences it will also be of interest to scholars considering human rights across disciplines including Law Sociology and Anthropology

Empire of Humanity Michael Barnett,2011-03-03 Empire of Humanity explores humanitarianism s remarkable growth from its humble origins in the early nineteenth century to its current prominence in global life In contrast to most contemporary accounts of humanitarianism that concentrate on the last two decades Michael Barnett ties the past to the present connecting the antislavery and missionary movements of the nineteenth century to today s peacebuilding missions the Cold War interventions in places like Biafra and Cambodia to post Cold War humanitarian operations in regions such as the Great Lakes of Africa and the Balkans and the creation of the International Committee of the Red Cross in 1863 to the emergence of the major international humanitarian organizations of the twentieth century Based on extensive archival work close encounters with many of today s leading international agencies and

interviews with dozens of aid workers in the field and at headquarters Empire of Humanity provides a history that is both global and intimate Avoiding both romanticism and cynicism Empire of Humanity explores humanitarianism's enduring themes trends and most strikingly ethical ambiguities Humanitarianism hopes to change the world but the world has left its mark on humanitarianism Humanitarianism has undergone three distinct global ages imperial postcolonial and liberal each of which has shaped what humanitarianism can do and what it is The world has produced not one humanitarianism but instead varieties of humanitarianism Furthermore Barnett observes that the world of humanitarianism is divided between an emergency camp that wants to save lives and nothing else and an alchemist camp that wants to remove the causes of suffering These camps offer different visions of what are the purpose and principles of humanitarianism and accordingly respond differently to the same global challenges and humanitarianism emergencies Humanitarianism has developed a metropolis of global institutions of care amounting to a global governance of humanity This humanitarian governance Barnett observes is an empire of humanity it exercises power over the very individuals it hopes to emancipate Although many use humanitarianism as a symbol of moral progress Barnett provocatively argues that humanitarianism has undergone its most impressive gains after moments of radical inhumanity when the international community believes that it must atone for its sins and reduce the breach between what we do and who we think we are Humanitarianism is not only about the needs of its beneficiaries it also is about the needs of the compassionate **Stove Mounters' & Range Workers' Journal** ,1918

Kant's viz the law of nature formula and also to Kant's ideas about laws in general and human nature in particular The third chapter considers and rejects some influential recent attempts to understand Kant's argument for the humanity formula and offers an alternative reconstruction instead Chapter four considers what it is to flourish as a human being in line with Kant's basic formulas of morality and argues that the standard readings of the humanity formula cannot properly account for its relation to Kant's views about the highest human good

**A Political Theology of Nature** Peter Scott, 2003-03-06 This book argues that the modern separation of humanity from nature can be traced to the displacement of the triune God Locating the source of our current ecological crisis in this separation Peter Scott argues that it can only be healed within theology through a revival of a Trinitarian doctrine of creation interacting with political

philosophies of ecology Drawing insights from deep ecology ecofeminism and social and socialist ecologies Scott proposes a common realm of God nature and humanity Both Trinitarian and political the theology of this common realm is worked out by reference to Christ and Spirit Christ's resurrection is presented as the liberation and renewal of ecological relations in nature and society the movement of the Holy Spirit is understood as the renewal of fellowship between humanity and nature through ecological democracy and the Eucharist is proposed as the principal political resource Christianity offers for an ecological age
