**A History of the Laws of War: Volume 1** Alexander Gillespie, 2011-09-06 This unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and regulating the treatment of captives This first book on warfare deals with the broad question of whether the patterns of dealing with combatants and captives have changed over the last 5 000 years and if so how In terms of context the first part of the book is about combatants and those who can lawfully take part in combat In many regards this part of the first volume is a series of less than ideal pathways This is because in an ideal world there would be no combatants because there would be no fighting Yet as a species we do not live in such a place or even anywhere near it either historically or in contemporary times This being so a second best alternative has been to attempt to control the size of military forces and therefore the bloodshed This is also not the case by which humanity has worked over the previous centuries Rather the clear assumption for thousands of years has been that authorities are allowed to build the size of their armed forces as large as they wish The restraints that have been applied are in terms of the quality and methods by which combatants are taken The considerations pertain to questions of biology such as age and sex geographical considerations such as nationality and the multiple nuances of informal or formal combatants These questions have also overlapped with ones of compulsion and whether citizens within a country can be compelled to fight without their consent Accordingly for the previous 3 000 years the question has not been whether there should be a limit on the number of soldiers but rather who is or is not a lawful combatant It has rarely been a question of numbers It has been and remains one of type The second part of this book is about people typically combatants captured in battle It is about what happens to their status as prisoners about the possibilities of torture assistance if they are wounded and what happens to their remains should they be killed and their bodies fall into enemy hands The theme that ties all of these considerations together is that all of the acts befall those who are to one degree or another captives of their enemies As such they are no longer masters of their own fate As a work of reference this first volume as part of a set of three is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself [Living on the Western Front](#) Chris Ward, 2013-06-06 This book provides an innovative insight into the lives of British settlers in areas of Belgium Northern France and Germany during the First World War [Publishers' Circular and Booksellers' Record of British and Foreign Literature](#) , 1895 [Naval History of World War I](#) Paul G Halpern, 2012-04-15 There have been a number of studies published on the activities of British and German navies during World War I but little on naval action in other arenas This

book offers for the first time a balanced history of the naval war as a whole viewed from the perspective of all participants in all major theaters The author s earlier examination The Naval War in the Mediterranean 1914 1918 centered on submarine activities and allied efforts to counteract this new menace With this welcome sequel he again takes the reader beyond those World War I operations staged on the North Sea Halpern s clear and authoritative voice lends a cohesiveness to this encompassing view of the Italians and Austrians in the Adriatic the Russians Germans and Turks in the Baltic and Black Seas and French and British in the Mediterranean Important riverine engagements notably on the Danube also are included along with major colonial campaigns such as Mesopotamia and the Dardanelles The role of neutral sea powers such as the Swedes in the Baltic and the Dutch in the East Indies is examined from the perspective of how their neutrality affected naval activity Also discussed is the part played by the U S Navy and the often overlooked but far from negligible role of the Japanese navy The latter is viewed in the context of the opening months of the war and in the Mediterranean during the height of the submarine crisis of 1917 The Publishers' Circular and Booksellers' Record of British and Foreign Literature ,1904 **A**

**History of the Laws of War: Volume 2** Alexander Gillespie,2011-10-07 This unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them protecting civilians who are either inadvertently or intentionally caught up between them and controlling the use of particular classes of weapons that may be used in times of conflict Thus it is that this work is divided into three substantial parts Volume 1 on the laws affecting combatants and captives Volume 2 on civilians and Volume 3 on the law of arms control This second book on civilians examines four different topics The first topic deals with the targetting of civilians in times of war This discussion is one which has been largely governed by the developments of technologies which have allowed projectiles to be discharged over ever greater areas and attempts to prevent their indiscriminate utilisation have struggled to keep pace The second topic concerns the destruction of the natural environment with particular regard to the utilisation of starvation as a method of warfare and unlike the first topic this one has rarely changed over thousands of years although contemporary practices are beginning to represent a clear break from tradition The third topic is concerned with the long standing problems of civilians under the occupation of opposing military forces where the practices of genocide collective punishments and or reprisals and rape have occurred The final topic in this volume is about the theft or destruction of the property of the enemy in terms of either pillage or the intentional devastation of the cultural property of the opposition As a work of reference this set of three books is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of

warfare itself     A History of the Laws of War: Volume 3 Alexander Gillespie, 2011-10-07 This unique work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them protecting civilians who are either inadvertently or intentionally caught up between them and controlling the use of particular classes of weapons that may be used in times of conflict Thus it is that this work is divided into three substantial parts Volume 1 on the laws affecting combatants and captives Volume 2 on civilians and Volume 3 on the law of arms control This third volume deals with the question of the control of weaponry from the Bronze Age to the Nuclear Age In doing so it divides into two parts namely conventional weapons and Weapons of Mass Destruction The examination of the history of arms control of conventional weapons begins with the control of weaponry so that one side could achieve a military advantage over another This pattern which only began to change centuries after the advent of gunpowder was later supplemented by ideals to control types of conventional weapons because their impacts upon opposing combatants were inhumane By the late twentieth century the concerns over inhumane conventional weapons were being supplemented by concerns over indiscriminate conventional weapons The focus on indiscriminate weapons when applied on a mass scale is the core of the second part of the volume Weapons of Mass Destruction are primarily weapons of the latter half of the twentieth century Although both chemical and biological warfare have long historical lineages it was only after the Second World War that technological developments meant that these weapons could be applied to cause large scale damage to non combatants this is unlike nuclear weapons which are a truly modern invention Despite being the newest Weapon of Mass Destruction they are also the weapon of which most international attention has been applied although the frameworks by which they were contained in the last century appear inadequate to address the needs of current times As a work of reference this set of three books is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself     **The Last Century of Sea Power, Volume 1** H. P. Willmott, 2021-12-22 In this first of three volumes on sea power the author reviews the story of political economic and military oceanic control from the 1890s through WWI

Choice The transition to modern war at sea began during the period of the Sino Japanese War 1894 1895 and the Spanish American War 1898 and was propelled forward rapidly by the advent of the dreadnought and the nearly continuous state of war that culminated in World War I By 1922 most of the elements that would define sea power in the 20th century were in place Written by one of our foremost military historians this volume acknowledges the complex nature of this transformation focusing on imperialism the growth of fleets changes in shipbuilding and armament technology and doctrines about the

deployment and use of force at sea among other factors There is careful attention to the many battles fought at sea during this period and their impact on the future of sea power The narrative is supplemented by a wide range of reference materials including a detailed census of capital ships built during this period and a remarkable chronology of actions at sea during World War I The author dean of naval historians provides a sweeping look at and analysis of the transformation of naval power His dry wit and sense of irony add spice to the impressive array of facts and analysis of the greatest period of naval warfare Wilmott is fearless in his judgments Seapower This book first of a series contains a wealth of facts and opinions the latter provided with Willmott s unerring analytical eye and mordant wit Bernard D Cole National War College *New Earths* James E. Oberg,1981 This exciting new volume presents every ship in which Admiral Horatio Nelson served in full detail for the first time Includes a comprehensive background of each vessel and the incidents that occurred when Nelson was aboard each ship 45 photos 40 line drawings *The Publishers' Circular and General Record of British and Foreign Literature*,1889 Church History (Vol.1-3) J. H. Kurtz,2023-12-18 In Church History Vol 1 3 J H Kurtz provides an exhaustive and meticulously detailed examination of the evolution of Christianity from its inception to the Reformation Spanning three volumes this work employs a narrative style rich in historical context and theological insight drawing upon a vast array of primary sources and scholarly debates Kurtz s scholarly rigor is evident as he navigates complex doctrinal developments the rise and fall of ecclesiastical powers and the interplay between faith and culture making the text a vital resource for theologians and historians alike J H Kurtz 1818 1890 a German theologian and historian was deeply immersed in the ecclesiastical scholarship of his time His commitment to historical accuracy and his awareness of the socio political influences on church development stem from his own religious upbringing and academic pursuits Kurtz s background allows him to navigate the intricacies of church history with both authority and empathy providing a nuanced view of the faith s transformative journey through diverse cultural landscapes For scholars theologians and lay readers interested in the profound impact of Christianity on world history Kurtz s Church History is indispensable Its comprehensive approach educates on fundamental ecclesiastical developments while fostering an appreciation for the complexities of faith This work not only informs but challenges readers to reflect on the historical roots of modern Christianity **Science and Technology in World History, Volume 1** David Deming,2014-01-10 Science is a living organic activity the meaning and understanding of which have evolved incrementally over human history This book the first in a roughly chronological series explores the development of the methodology and major ideas of science in historical context from ancient times to the decline of classical civilizations around 300 A D It includes details specific to the histories of specialized sciences including astronomy medicine and physics along with Roman engineering and Greek philosophy It closely describes the contributions of such individuals as Pythagoras Hippocrates Socrates Plato Aristotle Alexander the Great Euclid Archimedes Ptolemy Seneca Pliny the Elder and Galen **The Causes of War** Alexander Gillespie,2013-10-16 This is the first volume of a

projected four volume series charting the causes of war from 3000 BCE to the present day written by a leading international lawyer and using as its principal materials the documentary history of international law largely in the form of treaties and the negotiations which led up to them These volumes seek to show why millions of people over thousands of years slayed each other In departing from the various theories put forward by historians anthropologists and psychologists Gillespie offers a different taxonomy of the causes of war focusing on the broader settings of politics religion migrations and empire building These four contexts were dominant and often overlapping justifications for the first four thousand years of human civilisation for which written records exist Documents, Including Messages and Other Communications Ohio, 1890 *Translating Others (Volume 1)* Theo Hermans, 2014-04-08 Both in the sheer breadth and in the detail of their coverage the essays in these two volumes challenge hegemonic thinking on the subject of translation Engaging throughout with issues of representation in a postmodern and postcolonial world *Translating Others* investigates the complex processes of projection recognition displacement and othering effected not only by translation practices but also by translation studies as developed in the West At the same time the volumes document the increasing awareness that the world is peopled by others who also translate often in ways radically different from and hitherto largely ignored by the modes of translating conceptualized in Western discourses The languages covered in individual contributions include Arabic Bengali Chinese Hindi Irish Italian Japanese Latin Rajasthani Somali Swahili Tamil Tibetan and Turkish as well as the Europhone literatures of Africa the tongues of medieval Europe and some major languages of Egypt's five thousand year history Neighbouring disciplines invoked include anthropology semiotics museum and folklore studies librarianship and the history of writing systems Contributors to Volume 1 Doris Bachmann Medick Cosima Bruno Ovidi Carbonell Martha Cheung G Gopinathan Eva Hung Alexandra Lianeri Carol Maier Christi Ann Marrill Paolo Rambelli Myriam Salama Carr Ubaldo Stecconi and Maria Tymoczko *X.1* Roger Branfill-Cook, 2013-01-21 The *X* stood for experimental but it might equally have meant extraordinary exotic or extravagant as this giant submarine attracted superlatives the world's largest most heavily armed and deepest diving submersible of the day *X 1* was a controversial project conceived behind the backs of the politicians and would remain an unwanted stepchild As British diplomats at the Washington naval conference were trying to outlaw the use of submarines as commerce raiders the Admiralty was designing and building the world's most powerful corsair submarine to destroy single handed entire convoys of merchant ships This book explores the historical background to submarine cruisers the personalities involved in *X 1*'s design and service the spy drama surrounding her launch the treason trial of a leading RN submarine commander the ship's chequered career and her political demise Despite real technical successes she would finally fall foul of black propaganda aimed at persuading foreign naval powers that the cruiser submarine did not work even today uninformed opinion repeats the myth of her failure However it was completely ignored by other navies who went on building submarine cruisers of their own some larger than but none so sophisticated as *X 1* The book analyses in detail the submarine cruisers built by the US

Navy the French and the Japanese plus the projected German copy of X 1 the Type XI U Boat paying belated tribute to the real importance of the mysterious X 1      **Proceedings. [Continued as] Bulletin** Salem Mass, Essex inst,1870
