ball lightning for more than two decades I published a ball lightning report in Nature in 1976 that received worldwide publicity and I consequently many people wrote to me with accounts of their own experiences Within a very short time I had accumulated about 200 firsthand accounts and the file has continued to grow steadily since then Several things impressed me Few of those who wrote to me had any detailed foreknowledge of ball lightning at the time of their observation Nonetheless once reports of other phenomena such as St Elmo s fire had been eliminated the remaining descriptions were remarkably consistent Furthermore nearly all who contacted me were keen to have an explanation of what they had seen and seemed entirely sincere

A Short History of Circuits and Systems Franco Maloberti,Anthony C. Davies,2022-09-01 After an overview of major scientific discoveries of the 18th and 19th centuries which created electrical science as we know and understand it and led to its useful applications in energy conversion transmission manufacturing industry and communications this Circuits and Systems History book fills a gap in published literature by providing a record of the many outstanding scientists mathematicians and engineers who laid the foundations of Circuit Theory and Filter Design from the mid 20th Century Additionally the book records the history of the IEEE Circuits and Systems Society from its origins as the small Circuit Theory Group of the Institute of Radio Engineers IRE which merged with the American Institute of Electrical Engineers AIEE to form IEEE in 1963 to the large and broad coverage worldwide IEEE Society which it is today Many authors from many countries contributed to the creation of this book working to a very tight time schedule The result is a substantial contribution to their enthusiasm and expertise which it is hoped that readers will find both interesting and useful It is sure that in such a book omissions will be found and in the space and time available much valuable material had to be left out It is hoped that this book will stimulate an interest in the marvellous heritage and contributions that have come from the many outstanding people who worked in the Circuits and Systems area

Advances in Knowledge Discovery and Data Mining Takashi Washio, Einoshin Suzuki, Kai Ming Ting, Akihiro Inokuchi, 2008-05-11 The Pacific Asia Conference on Knowledge Discovery and Data Mining PAKDD has been held every year since

1997 PAKDD 2008 the 12th in the series was held at Osaka Japan during May 20-23 2008 PAKDD is a leading international conference in the area of data mining. It provides an international forum for researchers and industry practitioners to share their new ideas, original research results and practical development experiences from all KDD related areas including data mining, data warehousing, machine learning, databases, statistics, knowledge acquisition, automatic scientific discovery, data visualization, causal induction and knowledge based systems. This year we received a total of 312 research papers from 34 countries and regions in Asia, Australia, North America, South America, Europe and Africa. Every submitted paper was rigorously reviewed by two or three reviewers discussed by the reviewers under the supervision of an Area Chair and judged by the Program Committee Chairs. When there was a disagreement the Area Chair and/or the Program Committee Chairs provided an additional review. Thus many submissions were reviewed by four experts. The Program Committee members were deeply involved in a highly selective process. As a result only approximately 11

9% of the 312 submissions were accepted as long papers, 12.8% of them were accepted as regular papers and 11.5% of them were accepted as short papers.
