

The background of the book cover is a classical painting. It depicts two figures in a landscape. On the left, a woman in a long, flowing, light-colored dress is shown in a dynamic, almost dancing pose, with her arms raised and her head tilted back. On the right, a man in a dark, hooded robe lies on the ground, looking up at the viewer with a somber expression. The ground is covered with small, light-colored flowers. The overall color palette is dominated by earthy tones, with the light of the woman's dress contrasting with the dark of the man's robe.

**Recreative Minds** Gregory Currie, Ian Ravenscroft, 2002 Annotation *Recreative Minds* develops a philosophical theory of imagination that draws upon recent theories and results in psychology Ideas about how we read the minds of others have put the concept of imagination firmly back on the agenda for philosophy and psychology Currie and Ravenscroft present a theory of what they call imaginative projection they show how it fits into a philosophically motivated picture of the mind and of mental states and how it illuminates and is illuminated by recent developments in cognitive psychology They argue that we need to recognize a category of desire in imagination and that supposition and fantasy should be classed as forms of imagination They accommodate some of the peculiarities of perceptual forms of imagining such as visual and motor imagery and suggest that they are important for mind reading They argue for a novel view about the relations between imagination and pretence and suggest that imagining can be but need not be the cause of pretending They show how the theory accommodates but goes beyond the idea of mental simulation and argue that the contrast between simulation and theory is neither exclusive nor exhaustive They argue that we can understand certain developmental and psychiatric disorders as arising from faulty imagination Throughout they link their discussion to the uses of imagination in our encounters with art and they conclude with a chapter on responses to tragedy The final chapter also offers a theory of the emotions that suggests that these states have much in common with perceptual states Currie and Ravenscroft offer a lucid exploration of a fascinating subject for readers in philosophy psychology and aesthetics

*Recreative Minds* Gregory Currie, Ian Ravenscroft, 2002 *Recreative Minds* develops a philosophical theory of imagination that draws upon the latest work in psychology This theory illuminates the use of imagination in coming to terms with art its role in enabling us to live as social beings and the psychological consequences of disordered imagination The authors offer a lucid exploration of a fascinating subject

**Recreative minds** Gregory Currie, 2002 *Recreative Minds* develops a philosophical theory of imagination that draws upon recent theories and results in psychology Ideas about how we read the minds of others have put the concept of imagination firmly back on the agenda for philosophy and psychology Currie and Ravenscroft present a theory of what they call imaginative projection they show how it fits into a philosophically motivated picture of the mind and of mental states and how it illuminates and is illuminated by recent developments in cognitive psychology They argue that we need to recognize a category of desire in imagination

**Belief, Imagination, and Delusion** Ema Sullivan-Bissett, 2024 This volume brings together recent work on the nature of belief imagination and delusion and seeks to get clearer on the nature of belief and imagination the ways in which they relate to one another and how they might be integrated into accounts of delusional belief formation

**Philosophical Perspectives on Memory and Imagination** Anja Berninger, Ingrid Vendrell Ferran, 2022-11-04 This book explores the structure and function of memory and imagination as well as the relation and interaction between the two states It is the first book to offer an integrative approach to these two emerging areas of

philosophical research The essays in this volume deal with a variety of forms of imagining and remembering The contributors come from a range of methodological backgrounds empirically minded philosophers analytic philosophers engaging mainly in conceptual analysis and philosophers informed by the phenomenological tradition Part 1 consists of novel contributions to ontological issues regarding the nature of memory and imagination and their respective structural features Part 2 focuses on questions of justification and perspective regarding both states The chapters in Part 3 discuss issues regarding memory and imagination as skills or abilities Finally Part 4 focuses on the relation between memory imagination and emotion

**Action and Interaction** Shaun Gallagher, 2020 Shaun Gallagher presents a ground breaking interdisciplinary account of action He shows that in order to understand human agency and the aspects of mind that are associated with it we need to grasp the crucial role of context or circumstance in action and the normative constraints of social and cultural practices

**Empathy and the Aesthetic Mind** Katerina Bantinaki, Efi Kyprianidou, Fotini Vassiliou, 2025-06-26 Empathy is widely acknowledged as a central if not necessary mechanism for understanding works of art and even as the mode of engagement that mediates art's edifying effects Bringing together 15 essays by established scholars this volume probes the character and role of empathy in our engagement with different forms of art but also the value of such engagement for cognition our emotive life and our moral stance Opening with a historical reconstruction of the origins of the concept of empathy the volume develops in four parts that explore in turn our empathic engagement with fictional characters the cognitive value of such engagement its relevance for moral agency as well as the thorny issue of empathic engagement with the inanimate in art focusing on music and architecture With an interest in both aesthetics and philosophy of mind the volume provides an in depth discussion of these themes giving careful attention to historical systematic and interdisciplinary perspectives

The Limits of Expression Patricia Kolaiti, 2019-01-24 Taking as its

starting point what is sometimes called the prison house of language the widespread feeling that language falls terribly short when it comes to articulating the rich and disparate contents of the human mental tapestry this book sets out a radically new view of the interplay between language literature and mind Shifting the focus from the literary text itself to literature as a case of human agency it reconsiders a wide range of interdisciplinary issues including the move from world to mind the existence or otherwise of a property of literariness or essence of art the nature of literature as a unique output of human cognition and the possible distinctiveness of the mind that creates it In constant dialogue with philosophy linguistics and the cognitive sciences this book offers an invaluable new treatment of literature and literary language and sketches novel directions for literary study in the twenty first century      Marvelous Images Kendall Walton,2008-04-23 The twelve essays by Kendall Walton in this volume address a broad range of theoretical issues concerning the arts Many of them apply to the arts generally to literature theater film music and the visual arts but several focus primarily on pictorial representation or photography In *How Marvelous Toward a Theory of Aesthetic Value* Walton introduces an innovative account of aesthetic value and in this and other essays he explores relations between aesthetic value and values of other kinds especially moral values Two of the essays take on what has come to be called imaginative resistance a cluster of puzzles that arise when works of fiction ask us to imagine or to accept as true in a fiction moral propositions that we find reprehensible in real life *Transparent Pictures* Walton s classic and controversial account of what is special about photographic pictures is included along with a new essay on a curious but rarely noticed feature of photographs and other still pictures the fact that a depiction of a momentary state of an object in motion allows viewers to observe that state in imagination for an extended period of time Two older essays round out the collection another classic *Categories of Art* and a less well known essay *Style and the Products and Processes of Art* which examines the role of appreciators impressions of how a work of art came about in understanding and appreciation None of the reprinted essays is abridged and new postscripts have been added to several of them      *The Analogical Reader* Peter Dixon,Marisa Bortolussi,2023-11-23 Perspective taking is a critical component of approaches to literature and narrative but there is no coherent broadly applicable and process based account of what it is and how it occurs This book provides a multidisciplinary coverage of the topic weaving together key insights from different disciplines into a comprehensive theory of perspective taking in literature and in life The essential insight is that taking a perspective requires constructing an analogy between one s own personal knowledge and experience and that of the perspective taking target This analysis is used to reassess a broad swath of research in mind reading and literary studies It develops the dynamics of how analogy is used in perspective taking and the challenges that must be overcome under some circumstances New empirical evidence is provided in support of the theory and numerous examples from popular and literary fiction are used to illustrate the concepts This title is part of the Flip it Open programme and may also be available Open Access Check our website Cambridge Core for details      **Embodied Cognition and Cinema** Peter Kravanja,2015-07-31

The impact of the embodied cognition thesis on the scientific study of film The embodied cognition thesis claims that cognitive functions cannot be understood without making reference to the interactions between the brain the body and the environment The meaning of abstract concepts is grounded in concrete experiences This book is the first edited volume to explore the impact of the embodied cognition thesis on the scientific study of film A team of scholars analyse the main aspects of film narrative style music sound time the viewer emotion perception ethics the frame etc from an embodied perspective By combining insights from various disciplines such as cognitive film theory conceptual metaphor theory and cognitive neuroscience they show how the process of meaning making in film is embodied and how empathy and embodied simulation play a role in understanding the way in which the viewer interacts with the film Foreword by Mark Johnson Knight Professor of Liberal Arts and Sciences Department of Philosophy University of Oregon Contributors Warren Buckland Oxford Brookes University Juan Chattah University of Miami Maarten Co gnarts University of Antwerp Adriano D Aloia Universit Cattolica del Sacro Cuore Milan Michele Guerra University of Parma Mikl s Kiss University of Groningen Peter Kravanja KU Leuven Mar a J Ortiz University of Alicante Mark S Ward University of Technology Sydney Hannah Chapelle Wojciehowski University of Texas

**Rationality and Reality** Colin Cheyne, John Worrall, 2006-07-25 Alan Musgrave has consistently defended two positions that he regards as commonsensical critical realism and critical rationalism In defence of critical realism he argues for the objective existence of the external world as opposed to idealism as well as arguing for scientific realism against all anti realist accounts of science His critical rationalism is drawn from the work of Karl Popper and stands opposed to inductivist and irrationalist methodologies In defence of these positions Musgrave s writings have covered a wide range of topics in epistemology metaphysics philosophy of science philosophy of mathematics history of science theories of truth and economic theory In this volume a group of internationally renowned authors discuss themes that are relevant in one way or another to Musgrave s work This is not intended as a standard celebratory festschrift but rather as a new examination of topics of current interest in philosophy The contributory essays are followed by responses from Alan Musgrave himself

Supposition and the Imaginative Realm Margherita Arcangeli, 2018-11-14 Supposition is frequently invoked in many fields within philosophy including aesthetics philosophy of mind philosophy of science and epistemology However there is a striking lack of consensus about the nature of supposition What is supposition Is supposition a sui generis type of mental state or is it reducible to some other type of mental state These are the main questions Margherita Arcangeli explores in this book She examines the characteristic features of supposition along the dimensions of phenomenology and emotionality among others in a journey through the imaginative realm An informed answer to the question What is supposition must involve an analysis of imagination since supposition is so often defined in opposition to the latter She assesses rival explanations of supposition putting forward a novel view according to which the proper way of seeing supposition is as a primitive type of imaginative state

- 2 Contributes towards a new understanding of how costume actually performs in time and space
- 3 Offers new insights into existing practices as well as creating a space of connection between practitioners and researchers from design the humanities and social sciences

**A Luxury of the Understanding** Allan Hazlett, 2013-10-03 The value of true belief has played a central role in history of philosophy consider Socrates slogan that the unexamined life is not worth living and Aristotle's claim that everyone naturally wants knowledge as well as in contemporary epistemology where questions about the value of knowledge have recently taken center stage It has usually been assumed that accurate representation true belief is valuable either instrumentally or for its own sake In *A Luxury of the Understanding* Allan Hazlett offers a critical study of that assumption and of the main ways in which it can be defended Hazlett defends the conclusion that true belief is at most sometimes valuable In the first part of the book he targets the view that true belief is normally better for us than false belief and argues that false beliefs about ourselves for example unrealistic optimism about our futures and about other people such as overly positive views of our friends are often valuable vis vis our wellbeing In the second part he targets the view that truth is the aim of belief and argues for anti realism about the epistemic value of true belief Together these arguments comprise a challenge to the philosophical assumption of the value of true belief and suggest an alternative picture on which the fact that some people love truth is all there is to the value of true belief

categories      **The Rationality of Perception** Susanna Siegel, 2017 One of the most important divisions in the human mind is between perception and reasoning. We reason from information that we take ourselves to have already, but perception is a means of taking in new information. Reasoning can be better or worse, but perception is considered beyond reproach. The Rationality of Perception argues that these two aspects of the mind become deeply intertwined when beliefs, fears, desires, or prejudice influence what we perceive. When these influences reach all the way to perceptual appearances, we face a philosophical problem: is it reasonable to strengthen what one believes or fears or suspects on the basis of an experience that was generated by those very same beliefs, fears, or suspicions? Drawing on examples involving racism, emotion, and scientific theories, Siegel argues that perception itself can be rational or irrational and makes vivid the relationship between perception and culture.
