Recycling of Papermaking Fibers Herbert E. Ortner, *Recycling of Papermaking Fibers* Herbert E. Ortner, 1981

Recycling and Deinking of Recovered Paper Pratima Bajpai, 2024-06-26 *Recycling and Deinking of Recovered Paper* Second Edition covers recent advances in recycling technologies This second edition examines this new process which is more eco friendly than the virgin papermaking process and which uses less energy and natural resources produces less solid waste and fewer atmospheric emissions and helps to preserve natural resources and landfill space In addition the most recent information about the recycling of fibers into various grades of paper and board the control of stickies and the effects of recycled fiber on paper machines are also covered Recycling technologies have been improved in recent years due to advances in pulping flotation deinking and cleaning screening resulting in the quality of paper made from secondary fibers remarkably approaching that of virgin paper Covers all aspects of recycling technologies in great depth Offers up to date authoritative information and cites many mills experiences and pertinent research Examines the use of biotech methods for deinking refining improving drainage and stickies control Includes new case studies on paper recycling Chemical

Processing Aids in Papermaking Kevin J. Hipolit, 1992

Handbook of Pulping and Papermaking Christopher J.

Biermann, 1996-08-01 In its Second Edition *Handbook of Pulping and Papermaking* is a comprehensive reference for industry and academia The book offers a concise yet thorough introduction to the process of papermaking from the production of wood chips to the final testing and use of the paper product The author has updated the extensive bibliography providing the reader with easy access to the pulp and paper literature The book emphasizes principles and concepts behind papermaking detailing both the physical and chemical processes A comprehensive introduction to the physical and chemical processes in pulping and papermaking Contains an extensive annotated bibliography Includes 12 pages of color plates **Recycling**

Paper, 1990 **Technical Association of the Pulp and Paper Industry**, 1982 *Tappi Journal*, 1984 **Recycling**

Paper Matthew Coleman, 1990 Papers on recycling have been a part of Conference Proceedings and Tappi Journal for decades In just the past nine years several hundred papers on aspects of recycling have been presented at conferences and published in the journal To use this collected body of knowledge this book was created by reviewing and selecting the best of the papers on recycling presented at TAPPI Conference or published in Tappi Journal during the past nine years The issues of collected waste paper quality deinking of newsprint and the challenges of recycled paper production are addressed in these pages Solid waste mandatory collection quality control stickies contamination and more are all a part of this collection

Recovery and Recycling of Paper Ravindra K. Dhir, Mukesh C. Limbachiya, 2001 Vast quantities of used paper are discarded every day despite the technology existing to recover and recycle the material Throughout the world a number of legislative and industry led initiatives aimed at value recovery from paper collected for recycling have been introduced with a view to increasing public awareness of paper recycling and creating a sustainable environment This book presents the

proceedings of an international Symposium organised by the Concrete Technology Unit University of Dundee which brings together some of the world's leading experts in the field of paper recovery and recycling *1997 Pulping Conference* ,1997

Progress in Paper Recycling ,2000 **Flotation Technology** Lawrence K. Wang,Nazih K. Shammass,William A. Selke,Donald B. Aulenbach,2010-06-09 The past 30 years have seen the emergence of a growing desire worldwide that positive actions be taken to restore and protect the environment from the degrading effects of all forms of pollution air water soil and noise Since pollution is a direct or indirect consequence of waste the seemingly idealistic demand for zero discharge can be construed as an unrealistic demand for zero waste However as long as waste continues to exist we can only attempt to abate the subsequent pollution by converting it to a less noxious form Three major questions usually arise when a particular type of pollution has been identified 1 How serious is the pollution 2 Is the technology to abate it available and 3 Do the costs of abatement justify the degree of abatement achieved This book is one of the volumes of the Handbook of Environmental Engineering series The principal intention of this series is to help readers formulate answers to the last two questions above The traditional approach of applying tried and true solutions to specific pollution problems has been a major contributing factor to the success of environmental engineering and has accounted in large measure for the establishment of a methodology of pollution control However the realization of the ever increasing complexity and interrelated nature of current environmental problems renders it imperative that intelligent planning of pollution abatement systems be undertaken *Lignocellulosic Fibers and Wood Handbook* Mohamed Naceur Belgacem,A. Pizzi,2016-04-14 This book will focus on lignocellulosic fibres as a raw material for several applications It will start with wood chemistry and morphology Then some fibre isolation processes will be given before moving to composites panel and paper manufacturing characterization and aging **Preprints of Papers to be Presented at the Annual Meeting** Canadian Pulp and Paper Association. Technical Section, Abstract Bulletin of the Institute of Paper Chemistry ,1988-04 **Pulp and Paper Industry** Pratima Bajpai,2016-01-22 Pulp and Paper Industry Energy Conservation presents a number of energy efficient technologies and practices that are cost effective and available for implementation today Emerging energy efficient technologies and future prospects in this field are also dealt with Qualitative and quantitative results data on energy savings for various steps of pulp and paper making process are presented There is no specific book on this topic This will be a comprehensive reference in the field Thorough and in depth coverage of energy efficient technologies and practices in paper and pulp industry Presents cost effective and available for implementation today technologies Discusses Biotechnological processes especially enzymatic processes in the pulp and paper industry to reduce the energy consumption and improve the product quality Presents qualitative and quantitative results data on energy savings for various steps of pulp and paper making process **Encyclopedia of Surface and Colloid Science** P. Somasundaran,2006 **Comprehensive Membrane Science and Engineering** Enrico Drioli,Lidietta Giorno,2010-07-09 Comprehensive Membrane Science and Engineering Four Volume Set covers all aspects of membrane

science and technology from basic phenomena to the most advanced applications and future perspectives Modern membrane engineering is critical to the development of process intensification strategies and to the stimulation of industrial growth The work presents researchers and industrial managers with an indispensable tool toward achieving these aims Covers membrane science theory and economics as well as applications ranging from chemical purification and natural gas enrichment to potable water Includes contributions and case studies from internationally recognized experts and from up and coming researchers working in this multi billion dollar field Takes a unique multidisciplinary approach that stimulates research in hybrid technologies for current and future life saving applications artificial organs drug delivery *Paper Chemistry* J.C. Roberts, 2012-12-06 Although the title of this book is Paper Chemistry it should be considered as a text about the chemistry of the formation of paper from aqueous suspensions of fibre and other additives rather than as a book about the chemistry of the raw material itself It is the subject of what papermakers call wet end chemistry There are many other excellent texts on the chemistry of cellulose and apart from one chapter on the accessibility of cellulose the subject is not addressed here Neither does the book deal with the chemistry of pulp preparation from wood from other plant sources or from recycled fibres for there are also many excellent texts on this subject The formation of paper is a continuous filtration process in which cellulosic fibres are formed into a network which is then pressed and dried The important chemistry involved in this process is firstly the retention of colloidal material during filtration and secondly the modification of fibre and sheet properties so as to widen the scope for the use of paper and board products As is the fashion these days each chapter is written by an internationally recognised expert in the field and my thanks are extended to all of the contributors for their hours of patient and unseen research during the preparation of their manuscripts
