Red Cat White Cat China And The Contradictions Of Market Socialism:

Red Cat, White Cat Robert Weil,1996 Robert Weil has written a brilliant powerfully argued book that cuts through the hogwash pouring from the West and from China about the miracle of the Deng reforms Weil shows how Deng s use of capitalism to build socialism has resulted in the use of socialism to build capitalism This is powerful stuff must reading for all those who care about the future of humanity William Hinton *Mao's China and After* Maurice Meisner,1999-04 Presents a revised account of the revolution of 1966 1969 Examines the social and political consequences of the upheaval Deng Xiaoping Democracy movement Tienanmen Incident Mao Zedong The hundred flowers Great Leap Forward Critical Perspectives on China's Economic Transformation ,2007 China socialism and especially China s three decades long experiment in building socialism has been an issue of much interest and debate among scholars as well as practicing Marxists in India and elsewhere They also confront the realities of post Mao China and how these have been impacting the lives of the peasants and workers in that society as well as face the question of today s China being a development model for other third world countries In mid 2005 several editors of Critical Asian Studies formerly the Bulletin of Concerned Asian Scholars convened in a Roundtable to engage the issues raised by Martin Hart Landsberg and Paul Burkett in their book China and Socialism Market Reforms and Class Struggle Monthly Review Press 2005 The articles published in this Roundtable along with a Rejoinder by Hart Landsberg and Burkett appeared in two issues of Critical Asian Studies 37 3 and 4 in 2005 They along with an Introduction by Hari P Sharma are reprinted here in Critical Perspectives on China s Economic Transformation in order to stimulate further discussion As Hari P Sharma writes in the Introduction It is our task to learn the positive and negative lessons from the Chinese experience and carry on with the task of fighting and defeating imperialism and its hold wherever we live as well as lend support to the struggles for national liberation and for socialism wherever they take place The Rise of China and the Capitalist World Order Li Xing,2016-03-03 China s rise within global society and politics has brought it into the spotlight for social scientists the country s long and dramatic transformations in the twentieth and twenty first centuries make it an ideal case study for research on political and economic development and social changes China s size integration and dynamism are impacting on the functioning of the capitalist world system This book offers a non conventional analysis of the possible outcomes from China s transformation and provides a dialectical understanding of the complexities and underlying dynamics brought about by the rise of modern day China The theoretical and methodological approaches will prove useful for students and researchers of development studies and international relations **In the Wake of the Crisis** Olivier Blanchard,David Romer,Michael Spence,Joseph E. Stiglitz,2014-08-29 Prominent economists reconsider the fundamentals of economic policy for a post crisis world In 2011 the International Monetary Fund invited prominent economists and economic policymakers to consider the brave new world of the post crisis global economy The result is a book that captures the state of macroeconomic thinking at a transformational moment The crisis and the weak recovery that

Alternative Political Economy Models of Transition John Marangos, 2017-07-05 The collapse of centrally administered socialism in Russia and Eastern Europe resulted in what is commonly referred to as the transition problem the transformation from a centrally administered socialist economic system to one that is market based Economic science has been faced with the challenge of developing an appropriate body of analysis advice and direction to help other nations that may be undergoing this process In this volume John Marangos adopts a political economy approach that yields alternative models of transition The volume develops transition models from what Marangos defines as the primary elements of six variables 1 economic analysis 2 definitions of the Good Society 3 speed of transition 4 political structure 5 ideological structure and 6 initial conditions The models developed include the shock therapy model the neoclassical gradualist model of transition the post Keynesian model the pluralistic market the socialist model and the non pluralistic market socialist model After identifying the primary elements of each transition model Marangos considers the elements of each model with respect to the desirable reforms An essential element of the transition process is not only to identify the necessary reforms but also a sequence in which the reforms should be introduced For each transition model developed in this book a set of primary and secondary elements were provided in conjunction with a sequence of reforms Analyzing the transition problem from a political economy perspective Marangos shows that it is possible to have inconsistencies within each transition model and between transition models yet be able to identify the potential for implementation and maintenance of necessary reforms each model recommends This volume contributes to the understanding of the process of transition with the objective of identifying an optimal model of transition

Media Transparency in China Baohui Xie, 2014-08-20 This book argues that the gap between the official transparency rhetoric and the censorship reality has demonstrated the discrepancy between what the Party is and what it claims to be Such a discrepancy is manifested by the reality that the reformed news industry a hybrid of market oriented commercialization and party state control has largely failed to deliver either the voice of the disenfranchised groups or the value of journalism To observe the discrepancy this book investigates the role of transparency in the Chinese news media Media transparency which goes beyond the issue of censorship and press freedom has been undermined by the consensus reached between the party state and the media on political and market control It is this mutually accommodating and benefiting scheme between power and profits that has been hollowing out the substance of the

transparency rhetoric and distorting the Marxist idea of press freedom as freedom for all This book argues that the cause of such a gap between rhetoric and reality is rooted in the disjuncture of political representation of both the party state and the profit seeking media

Alternative Political Economy Models of Transition Marangos, **Consistency and Viability of Islamic Economic Systems and the Transition Process** J. Marangos, 2013-08-27 Consistency and Viability of Islamic Economics Systems and the Transition Process outlines the transition problem for non market economies and creates an analytic framework for understanding the cause and effect of these economies

China and India Jonathan Holslag, 2010-01-22 For all their spectacular growth China and India must still lift a hundred million citizens out of poverty and create jobs for the numerous laborers Both powers hope trade and investment will sustain national unity For the first time Jonathan Holslag identifies these objectives as new sources of rivalry and argues that China and India cannot grow without fierce contest Though he recognizes that both countries wish to maintain stable relations Holslag argues that success in implementing economic reform will give way to conflict This rivalry is already tangible in Asia as a whole where shifting patterns of economic influence have altered the balance of power and have led to shortsighted policies that undermine regional stability Holslag also demonstrates that despite two decades of peace mutual perceptions have become hostile and a military game of tit for tat promises to diminish prospects for peace Holslag therefore refutes the notion that development and interdependence lead to peace and he does so by embedding rich empirical evidence within broader debates on international relations theory His book is down to earth and realistic while also taking into account the complexities of internal policymaking The result is a fascinating portrait of the complicated interaction among economic political military and perceptual levels of diplomacy

Is the East Still Red? Gary Blank, 2015-02-27 Does China represent a non capitalist alternative to neoliberal development models Commentators on the left have offered sharply divergent assessments over the last two decades A few still cling the old dream of market socialism twinning efficiency with social justice For most however China is proof that market reforms invariably yield dispossession inequality and capitalist restoration Is the East Still Red argues that both interpretations are wrong and exhibit a common failure to distinguish between market mechanisms and capitalist imperatives Gary Blank situates the Chinese experience within broader Marxist debates on socio historical transitions and primitive accumulation highlighting the need to conceptualize capitalism as a unique system in which producers and appropriators depend on the market for their reproduction Despite years of marketization the mandarins in Beijing have not yet imposed full market dependence in industry and agriculture He shows how the resistance of workers and peasants the imperatives of party state legitimacy and the reproductive strategies of individual Communist officials and managers all act to perpetuate central aspects of a bureaucratic collectivist system in which direct producers and bureaucrats are effectively merged with the means of production The People s Republic may be a non capitalist market alternative albeit one that is hardly edifying for socialists

Craig, Richard King, 2010-10-01 Cheap mechanical and satellite transmissions have made a predominantly North American culture available to a global audience Does this mean that rock n roll soap opera reruns and professional wrestling will destroy Asian traditions and leave Asian nations to produce nothing but imitations of a shallow hedonistic alien culture Far from it In Global Goes Local international scholars from a variety of disciplinary perspectives examine different forms of popular culture in Asia Covering topics from pop music in Korea to TV commercials in Malaysia this collection shows how imported cultural forms can be invested with fresh meaning and transformed by local artists to result in new forms of assertion and resistance that also meet the needs of their particular audiences Global Goes Local addresses significant questions being considered by scholars of popular culture and offers case studies of how culture suffers survives or prospers in Asian communities in an age of global communication **Rethinking International Organisation** Barbara

Global Governance and Transnationalizing Capitalist Hegemony Ian Taylor,2016-11-25 This book is a critique of claims regarding how emerging economies are supposedly rewriting the rules of global governance and ushering in alternative models to neoliberal orthodoxy It argues that such assumptions are abstractions that ignore both the transnationalizing nature of the global political economy and the actual policy goals of the ruling classes within most emerging economies Considering the larger issues behind the emerging economies or powers debate the book deploys an adapted global capitalism perspective with insights from Gramsci Poulantzas and Cox to argue that the transnational nature of the global political economy and the actual policy goals of the dominant elites within most emerging economies merge to undermine any transformative element Far from challenging the global order these ostensible new rivals in fact seek to integrate their economies more and more within the existing liberal global economy Inter state dynamics and even inter elite tensions exist and it is clear that the nation state has not simply become a transmission belt for global capital but equally we must move beyond the surface phenomena that are most visible in global tensions to get at the underlying essence of social and class forces in the global political economy Looking at the largest emerging powers such as Brazil Russia India and China Taylor explains why the emerging powers elites although essentially subscribing to neoliberalism in all its variegated forms may confront the core in a myriad of ways but that these are not challenges to the ongoing world order and in fact the so called emerging powers serve a legitimizing function for the extant global system The book will be of great use to graduates and scholars of International Relations Global International Political Economy and International Development
