Sprinter and Sprummer Timothy Entwisle, 2014-09-01 Sprinter and Sprummer challenges the traditional four seasons and encourages us to think about how we view changes in our natural world Since 1788 Australia has carried the yoke of four European seasons that make no sense in most parts of the country We may like them for historical or cultural reasons or because they are the same throughout the world but they tell us nothing of our natural environment It s time to reject those seasons and to adopt a system that brings us more in tune with our plants and animals a system that helps us to notice and respond to climate change Using examples from his 25 years working in botanic gardens author Timothy Entwisle illustrates how our natural world really responds to seasonal changes in temperature rainfall and daylight and why it would be better to divide up the year based on what Australian plants do rather than ancient rites of the Northern Hemisphere Sprinter and Sprummer opens with the origins and theory of the traditional seasonal system and goes on to review the Aboriginal seasonal classifications used across Australia Entwisle then proposes a new five season approach explaining the characteristics of each season along with the biological changes that define them The book uses seasons to describe the fascinating triggers in the life of a plant and plant like creatures using charismatic flora such as carnivorous plants the Wollemi Pine and orchids as well as often overlooked organisms such as fungi The final chapter considers climate change and how the seasons are shifting whether we like it or not **Fundamentals of Ornamentals Horticulture and Landscape Gardening** Ajai Kumar Tiwari, 2012-01-01 Ornamental Horticulture is a branch of Horticulture which deals with commercial growing of flowers ornamental plants and beautification of surroundings This subject assumes great importance in improving total environment and checks visual pollution by way of beautification The flowers have been eulogised by poets and artists for generations not merely for their ornamental properties but for their versatile curative properties The Study of ornamental horticulture comprises of two parts i e the knowledge of growing of plants like annuals shrubs climber trees bulbous succulents and cactus shade loving plants lawn etc and their use in beautification programme The information on above aspect is scattered in different book and a great difficulty was being felt by students landscapers and scientist In this context a need of simple book on introduction cultivation and management of ornamental plants is highly demanded by student of Horticulture and florists of India This book describes in details collection identification propagation cultivation nutritional weed management plant and flowers senescence management etc of annuals herbs shrubs climbers and ornamental trees Since beautification involves the principles of art and gardening styles Therefore bio aesthetic planning basics of landscaping and flowers arrangement have also been discussed in details Special care has been taken to present the subject matter in a
