Red Chips And The Globalisation Of Chinas Enterprises:

Red Chips and the Globalisation of China's Enterprises Charles de Trenck, 1998 Red Chips analyses leading Chinese companies and their operating environment in the 1990s In China it is government organisations that form corporate structures These state backed companies often follow a trail that leads back to foreign equity markets particularly Hong Kong s stock exchange The examination of these companies in this book is a first in the English language Red Chips bridges the standard press and scholastic coverage providing both the context of China s reforms and in depth analysis of several of China s leading companies Corporate Governance and China's H-share Market Alice De Jonge, 2008-01-01 Using detailed case studies of the first nine mainland Chinese companies to be listed on the Hong Kong stock exchange 1993 94 Alice de Jonge examines the evolution of corporate governance law and culture in China s H share market A story emerges not of tensions between ideas of corporate governance from two different legal systems Hong Kong vs mainland Chinese nor about legal convergence as China adopts concepts from Anglo American jurisdictions Rather it is a story of individual firms being pragmatic in mediating the different agendas of state agencies that own or control them Corporate Governance and China s H Share Market looks at corporate governance in a cross border context is unique in providing a detailed understanding of China s H share market reveals why a beer company was the first ever Chinese firm to be listed overseas This fascinating work will appeal to postgraduate students and scholars of corporate governance Asian law and legal systems and Asian business as well as Chinese scholars more generally Professionals such as law practitioners working in Chinese law will also find the book of interest *The Digital Business Ecosystem* Angelo Corallo, Giuseppina Passiante, Andrea Prencipe, 2007-01-01 By bringing together elements of a radical new approach to the firm based on a biological metaphor of the ecosystem this unique book extends the limits of existing theories traditionally used to investigate business networks

Globalisation in China, India, and Russia Jean-François Huchet, Xavier Richet, Joël Ruet, 2007 No study of globalization is complete without an analysis of these formerly socialist players according to this collection of essays on the current posture between government and global firms in China India and Russia Points of comparison include bureaucracy corporate governance economic reform foreign investment privatization productivity and competitiveness subcontracting and the size of the remaining public sector **Shareholding System Reform in China** Shuyun Ma, 2010-01-01 This insightful book demonstrates how China has emerged as one of the world s largest privatizing countries within a decade Since the 1980s there has been a global wave of transfer of state assets to private hands China is a relatively late participant in this worldwide trend yet in the last decade it has emerged as one of the largest privatizing countries Shu Yun Ma argues that China s privatization is not based on any grand blueprint rather it is privatization by groping for stones to cross the river a well known metaphor often attributed to Deng Xiaoping meaning that the reform simply proceeds on a trial and error basis without being guided by any theory With original case studies including one on China s first industrial shareholding

enterprise this informative book will be of great interest to the academic community China observers and policymakers as well as financial analysts *Management and Organization Paradoxes* Stewart R. Clegg, 2002-06-07 Paradox the simultaneous existence of two inconsistent states has become orthodox The orthodox is now the paradox The orthodox world of ordering controlling and organizing is increasingly opposed to a normalizing world of disordering disrupting and disorganizing And organization studies cannot avoid changing its conceptions of reality as that reality changes In the future organization studies will be the study of paradox how to understand it how to use it In this book of original contributions addressed to management and organization paradoxes the authors address the new state of the field in terms of representations representing paradoxes and materialisations materialising paradoxes The themes although varied ranging from dialectics to internal tensions from collaborations to ethics and value conflicts from resistant labourers and wharfies to cartoon characters such as The Simpsons from the irrationalities of finance to the psychoanalytic rationalities of auditing and from issues of governance in Asian and international business to the composition of the new knowledge work force in the business professions cohere around core aspects of paradoxicality Overall the contributions to *Management and Organization Paradoxes* are diverse and challenging Each contribution takes a different angle on the central theme All of the chapters illuminate diverse aspects of contemporary paradoxes in management and organization theory The book provides in each of its chapters a challenge to the still overwhelmingly rationalist views of theory and practice that dominate the field and provides new directions for understanding organizations and management The contributors are drawn from leading European Australian and Latin American contributors *Privatizing the State* Béatrice Hibou, 2004 In the new global political economy privatization names a transformation of the roles of public and private actors with the goal of reforming government policies and economic aid programs It is an objective a slogan a fetish But what does it signify On the one hand it refers to the process of changing industries businesses and services from governmental or public ownership to private agencies But privatization now also extends to what are normally the prerogatives of national states taxation customs internal security national defense and peace negotiations In much of the literature privatization is associated with the retreat decline or even demise of the state Using Max Weber's concept of delegation or discharge as a point of departure Hibou and the contributors of this volume propose an alternative view interpreting the contemporary restructuring of economic and political relations in much of the world as the privatization of the state This book challenges received ideas about the process of globalization and its presumed homogenization by suggesting that rather than weakening the powers of the state privatization actually strengthens it With examples from Russia Poland China Taiwan Indonesia North Africa and sub Saharan Africa the book questions the supposed inefficiency of states in regulating capitalism and the role economic and financial knowledge play as substitutes for political and social analysis **China in the Asian Financial Crisis** Peter Nolan, 2021-06-01 The widely held view of the Asian Financial Crisis is that it had no substantial impact on China In fact the

country was far more vulnerable than most people realized due to the high possibility of financial contagion entering the system from Hong Kong through Guangdong province This book analyzes the severe policy challenge that it presented for China's leaders The crisis in Guangdong's financial institutions provided a forewarning of the difficulties that lay ahead as China's integration with the global financial system deepened The experience of Guangdong in the Asian Financial Crisis provided a profound lesson for China's policy makers as they planned the country's strategy for financial reform in the following years China was able to avoid disaster by astute and difficult policy choices in the face of fierce pressure from outside the country as well as from different domestic interests at many different levels The successful resolution of the crisis provided a breathing space for the leadership It gave it time to undertake necessary reforms in the country's financial system in the decade that followed the crisis

The Dynamics of States Klaus Schlichte, 2016-12-05 State domination in the non Western world is hallmarked by its constantly shifting character This stimulating book develops a new approach to the study of state formation and state erosion to explain dynamics that neither follow the pathways of development nor the rule of stagnation that dependency theory once suggested Carefully edited by Klaus Schlichte this book provides a fresh angle to the study of states with an attempt to overcome Weber with Weber The approach focuses on the historical authenticity of states and their institutional frameworks describing the trajectories taken as they react to the effects of changes in their international and local social environments The emphasis laid on the specific characteristics of individual states does not however lead to the theoretical difficulty of a new contextual relativism The conceptual design employs sociological categories developed by Max Weber Norbert Elias Michel Foucault Pierre Bourdieu and others

The Rise and Decline of the Asian Century Christopher Lingle, 1998 He points out that many of institutions credited with the miracle performance of East Asian economies cannot withstand close scrutiny Their short term virtue can be shown to be long term vice irreparably harming the region's prospects for sustainable economic and social progress The coming period should neither be considered the end of an American century nor the beginning of an Asian century Instead it should be constructively regarded as the dawn of a global millennium in which an increasingly internationalized economy will raise the living standards of even greater numbers of people
