poisonous snakes Trinidad hosts four venomous species including coral snakes and the notorious bushmaster Boos refutes many of the myths about these deadly but usually nonaggressive snakes with information about their habits and behavior He also writes about the giant anaconda and the boa constrictor about which many half truths and fictions abound All snakes bite but only a few species are venomous Boos gives information about what to do and what not to do in the event of a bite and discusses intriguing folk medicine cures such as the Belgian Black Stone sure to work only if a bite was harmless to begin with The Snakes of Trinidad and Tobago will find an enthusiastic audience among herpetologists ecologists and other scientists concerned about the snakes and wildlife of Trinidad and Tobago the Caribbean and South America It will also appeal to general readers interested in snakes and in Caribbean folklore
