Barbarossa to eventual triumph over Berlin Starting with outdated aircraft such as the Polikarpov Po 2 biplane and monoplane fighters the Soviets then settled on two main lines of development the inline engine LaGG 3 and its radial engine derivatives the La 5 and La 7 and the inline engine Yakovlev fighters which were produced in greater numbers than any other series of fighters Not only are these aircraft accurately described but experimental fighters are also dealt with In addition colour profiles illustrate these aircraft in terms of design camouflage and markings From the I 15bis biplane of the late 1930s to the superb La 7 and Yak 3 fighters of the last year of the war all Red Air Force fighters are covered in this comprehensive volume *The Evolution of Modern Land Warfare* Christopher Bellamy, 2015-10-05 Extensively illustrated with 52 detailed campaign and battle maps and diagrams this book originally published in 1990 surveys the evolution of warfare in Europe from Napoleon to the end of the twentieth century and in Asia from the Middle Ages It considers the interaction of technology and warfare With wide ranging examples the book includes two in depth case studies one on the Soviet Operational Manoeuvre Group and its predecessors in the Russian Imperial Army the other on the history of land warfare including guerilla warfare in Asia In this book the author demonstrates that military history can be of immense practical help to the modern military analyst and professional Now updated with a new introduction to take into account changes since 1990 this book remains of essential value to students teachers professionals in political social history international relations defence war peace studies [The Eastern Front Air War, 1941-1945](#) Anthony Tucker-Jones, 2020-01-31 This lavishly illustrated WWII history examines the bitter aerial combat of the Eastern Front through rare wartime photographs and informative text Though the air war was a major aspect of the Eastern Front conflict it has long been neglected by historians Anthony Tucker Jones s photographic history offers a vividly detailed introduction to the subject With more than 150 archival images most of which have never been published before this volume examines Stalin s Red Air Force and Hitler s Luftwaffe their equipment and the role they played in supporting the war on the ground Just before Hitler s invasion of the Soviet Union Stalin had decimated the leadership of the Red Air Force in a series of purges Thousands of Russian fighter aircraft were swiftly destroyed in the German Blitzkrieg But a remarkable recovery followed as the Red Air Force turned the tide against the ravages of the Luftwaffe to wrestle back air superiority by 1944 **Soviet Air Power of the Cold War** Michael Green, 2023-04-06 a praiseworthy examination of the evolution of the Soviet air force throughout the Cold War *Journal of Military History* At the peak of the Cold War in the 1950s the Soviet Union possessed some 12 000 aircraft making it the largest air force of all the protagonists By the 1990s this had declined to around 8 000 the reduction largely reflecting the increase in aircraft capability As well as fighters and bombers the Soviet inventory included trainers transports seaplanes electronic warfare and ground attack aircraft as well as an impressive helicopter fleet notably the Mi 24 Hind gunship and the massive Homer transport The Tu 4 Bull was the first Russian nuclear capable bomber a copy of the US B 29 which was followed by their range of jet bombers the Il 28 Beagle Tu 16 Badger and M 4 Bison The prop

**The Defense of Moscow 1941** Jack Radey, Charles Sharp, 2013-01-19 The little known story of the Battle of Kalinin on the eastern front and how it shaped the course of WWII based on archival records from both sides There was only one point in the Second World War when Nazi Germany had a chance of winning That point was October 1941 when most of the Red Army's forces before Moscow had been smashed or encircled and no reserves were available to defend the capital All that stood in Hitler's way were a handful of Soviet rifle divisions tank brigades and hastily assembled militia According to German accounts their spearheads were stopped by the mud but a close examination of German records shows this was not so Instead it is clear that it was the resistance of the Red Army and bad arrogant planning that halted the Wehrmacht This is the dramatic story that Jack Radey and Charles Sharp tell in this compelling study of a previously unknown part of the Battle of Moscow Using archival records from both sides they reveal how the Soviets inflicted a stunning defeat on a German plan to encircle six Soviet armies in the middle of October 1941

**The Battle of Kursk** Valeriy Zamulin, 2017-07-27 In this book noted historian of the Battle of Kursk Valeriy Zamulin the author of multiple Russian language books on the Battle of Kursk and *Destroying the Myth The Tank Battle at Prokhorovka* Kursk July 1943 An Operational Narrative takes a fresh look at several controversial and neglected topics regarding the battle and its run up He starts with a detailed look at the Soviet and Russian historiography on the battle showing how initially promising research was swamped by Party dogma and censorship during the Brezhnev era before being resumed with the collapse of the Soviet Union Zamulin then transitions to discussions of how the southern shoulder of the Kursk bulge was formed preparations for the battle on both sides and the size and composition of Model's Ninth Army He then examines such controversial topics as whether or not the II SS Panzer Corps was aware of the pending Soviet counterattack at Prokhorovka and the effectiveness of the Soviet preemptive barrage that struck the German troops that were poised to attack Zamulin also discusses whether or not General Vatutin the Commander in Chief of Voronezh Front erred when arranging his defenses Zamulin also takes a look at how the myth of 1 500 tanks colliding on a narrow strip of farm fields became perpetuated in Soviet and foreign history books when in fact it was impossible for the 5th Guards Tank Army's tanks to attack in massive wave after wave due to the constrictions of the terrain Zamulin also reveals incidents of the battle that were long kept behind the curtain by Soviet

censorship For example the 183rd Rifle Division defending the Prokhorovka axis was repeatedly struck by friendly aircraft and a Soviet tank counterattack overran the positions of one of its battalions Zamulin discusses other cases of fratricide in the Voronezh Front including the death of one of the 1st Tank Army's foremost tank commanders in a friendly fire incident In the process he reveals that a wave of suicides swept through the junior command staff of the 5th Guards Tank Army immediately prior to the famous counteroffensive on 12 July 1943 All in all Valeriy Zamulin with this collection of essays and articles two of which have been reprinted from the Journal of Slavic Military History makes a new contribution to our knowledge and understanding of this pivotal epochal battle of the Second World War

**The Messerschmitt 210/410 Story** Jan Forsgren, 2019-09-17 In 1938 the Reichsluftfahrtministerium German Air Ministry RLM issued a requirement for a new twin engine heavy fighter to replace the Me 110 This type of combat aeroplane was known as Zerstörer Destroyer The first prototype flew in September 1939 The Me 210 proved very difficult to fly having numerous deficiencies It was said to be deadlier to its crews than the enemy Nevertheless the Luftwaffe ordered the Me 210 into production Operational trials began in late 1941 but it was eventually acknowledged that the aircraft had to be redesigned in order to be accepted into Luftwaffe service The whole Me 210 debacle proved a huge scandal A redesigned variant the Me 410 began to reach Luftwaffe units in mid 1943 Even if the Me 210 and Me 410 were similar in appearance the latter had to be redesigned to avoid the extremely poor reputation of the Me 210 The Me 410 proved a quite successful aeroplane being used as a heavy fighter and for reconnaissance duties Its closest Allied equivalent was the British DH 98 Mosquito More than 1 500 Me 210 410s were built in Germany and Hungary with only two Me 410s surviving today
