Remarks on the Phonological Evolution of Russian in Comparison with the Other Slavic Languages Roman Jakobson,2023-10-31 The first English translation of a classic and groundbreaking work in historical phonology This is the first English translation of a groundbreaking 1929 work in historical phonology by the renowned linguist Roman Jakobson considered the founder of modern structural linguistics A revolutionary treatment of Russian and Slavic linguistics the book introduced a new type of historical linguistics that focused on the systematic reasons behind phonological change Rather than treating such changes as haphazard Jakobson here presents a teleological purposeful approach to language evolution He concludes by placing his book in the context of the exciting structural developments of the era including Einstein s theories Cezanne s art and Lev Berg s nomogenesis The original Russian version of the book was lost during the 1939 German invasion of Brno Czechoslovakia and the only edition available until now has been the French translation by Louis Brun Thus this first English translation offers many linguists their first opportunity to read a major early work of Jakobson Ronald Feldstein a leading Slavicist and phonologist in his own right has not only translated the text from French to English he has also worked to reconstruct something as close to the missing original as possible Feldstein s end of chapter annotations provide explanatory context for particularly difficult passages **Politics**

and the Slavic Languages Tomasz Kamusella,2021-06-17 During the last two centuries ethnolinguistic nationalism has been the norm of nation building and state building in Central Europe The number of recognized Slavic languages in line with the normative political formula of language nation state gradually tallied with the number of the Slavic nation states especially after the breakups of Czechoslovakia the Soviet Union and Yugoslavia But in the current age of borderless cyberspace regional and minority Slavic languages are freely standardized and used even when state authorities disapprove As a result since the turn of the 19th century the number of Slavic languages has varied widely from a single Slavic language to as many as 40 Through the story of Slavic languages this timely book illustrates that decisions on what counts as a language are neither permanent nor stable arguing that the politics of language is the politics in Central Europe The monograph will prove to be an essential resource for scholars of linguistics and politics in Central Europe Russian Paul Cubberley,2002-10-17 This book provides an accessible introduction to the linguistic structure of Russian including its history dialects and sociolinguistics as well as the central issues of phonology morphology syntax and word formation lexicology It particularly emphasises the special linguistic features of Russian which are not shared with English and other non Slavic languages For intermediate advanced students of Russian this will help to reinforce their understanding of how all

levels of Russian function Students and scholars of linguistics will find it a useful starting point for comparative work involving the structure of Russian and the Slavic languages or issues such as standardisation multilingualism and the fate of former colonial languages Each chapter begins with an introduction to the basic theoretical concepts of the area covered presenting the linguistic facts and relationships in an easily accessible form It will also serve as a learning aid to Cyrillic with all examples transliterated

Interslavic zonal constructed language Vojtěch Merunka, 2018-02-01 Interslavic zonal constructed language is an auxiliary language which looks very similar to real spoken Slavic languages in Central and Eastern Europe and continues the tradition of the Old Church Slavonic language Interslavic shares grammar and common vocabulary with modern spoken Slavic languages in order to build a universal language tool that Slavic people can understand without any or with very minimal prior learning It is an easily learned language for those who want to use this language actively Interslavic enables passive e.g. receptive understanding of the real Slavic languages Non Slavic people can use Interslavic as the door to the big Slavic world Zonal constructed languages are constructed languages made to facilitate communication between speakers of a certain group of closely related languages They belong to the international auxiliary languages but unlike languages like Esperanto and Volapük they are not intended to serve for the whole world but merely for a limited linguistic or geographic area where they take advantage of the fact that the people of this zone understand these languages without having to learn them in a difficult way Zonal languages include the ancient Sanskrit Old Church Slavonic and Lingua Franca Zonal design can be partially found also in modern languages such as contemporary Hebrew Indonesian and Swahili

Russian and the Slavonic Language W. J. Entwistle, W. A. Morison, 1949 **The Palgrave Handbook of Slavic Languages, Identities and Borders** Tomasz Kamusella, Motoki Nomachi, Catherine Gibson, 2016-04-29 This book analyzes the creation of languages across the Slavophone areas of the world and their deployment for political projects and identity building mainly after 1989 It offers perspectives from a number of disciplines such as sociolinguistics socio political history and language policy Languages are artefacts of culture meaning they are created by people They are often used for identity building and maintenance but in Central and Eastern Europe they became the basis of nation building and national statehood maintenance The recent split of the Serbo-Croatian language in the wake of the break up of Yugoslavia amply illustrates the highly politicized role of languages in this region which is also home to most of the world's Slavic speakers This volume presents and analyzes the creation of languages across the Slavophone areas of the world and their deployment for political projects and identity building mainly after 1989 The overview concludes with a reflection on the recent rise of Slavophone speech communities in Western Europe and Israel The book brings together renowned international scholars who offer a variety of perspectives from a number of disciplines and sub fields such as sociolinguistics socio political history and language policy making this book of great interest to historians sociologists political scientists and anthropologists interested in Central and Eastern Europe and Slavic Studies
