Russian Design:

Soviet/Russian Armor and Artillery Design Practices ,1995 **The New Russian Book** Birgitte Beck

Pristed,2017-08-01 This book takes up the obtrusive problem of visual representation of fiction in contemporary Russian book design By analyzing a broad variety of book covers the study offers an absolutely unique material that illustrates a radically changing notion of literature in the transformation of Soviet print culture to a post Soviet book market It delivers a profound and critical exploration of Russian visual imaginary of classic popular and contemporary prose Among all the carelessly bungled covers of mass published post Soviet series the study identifies gems from experimental designers By taking a comparative approach to the clash of two formerly separate book cultures the Western and the Soviet that results both in a mixture of highbrow and lowbrow forms and in ideological re interpretations of the literary works this book contributes to opening an East West dialogue between the fields of Russian studies contemporary book and media history art design and visual studies

Transition to Eminence G. M. Hiranandani,2005 This volume of the navy s history covers the period from 1976 to 1990 It examines the navy s success in keeping abreast of advances in technology in step with progressive self reliance In a decade and a half of innovation the navy equipped its indigenously built frigates corvettes and other vessels with combinations of the latest available weapons and equipment from the Soviet Union from Europe and from indigenous sources A tiny ship design cell which in 1965 was designing yard craft was by 1990 designing an aircraft carrier submarines and missile destroyers The new acquisitions from the Soviet Union ranged from missile destroyers conventional submarines and long range reconnaissance aircraft to minesweepers All these high tech inductions needed to be operated and manned by better educated and better trained personnel New maintenance

repair and refit facilities had to be created The increase in the volume of spares and the diversity of sources compelled modernization of the logistics system This volume analyzes how these problems were tackled **Decommissioned Russian Nuclear Submarines and International Cooperation** Charles Krupnick,2001-03-19 With the end of the Cold War Russia s submarines were no longer needed to deter or fight Western navies and were very expensive to operate and maintain Older submarines were taken out of service in large numbers but without firm plans and infrastructure in place to remove and adequately care for their nuclear components problems soon developed over the disposition of spent fuel assemblies Problems arose also of course between Russia and the international community as to the best way to respond to the challenge This book looks at those problems first discussing Russia s economy its environment and the Russian Navy and then covering in detail the spent fuel of Russian submarines and related nuclear problems The engagement of the international community on the issue is then addressed A theoretical analysis is offered on how Russia s fellow nations can help remedy a troubling environmental problem in a difficult country Russian Archaism Irina Shevelenko,2024-08-15 Russian Archaism considers the aesthetic quest of Russian modernism in relation to the nation building ideas that spread in the late imperial period Irina Shevelenko argues that the cultural milieu in Russia where the modernist movement began as an extension of Western trends at the end of the nineteenth century soon became captivated by nationalist indoctrination Members of artistic groups critics and theorists advanced new interpretations of the goals of aesthetic experimentation that would allow them to embed the nation building agenda within the aesthetic one Shevelenko s book focuses on the period from the formation of the World of Art group 1898 through the Great War and encompasses visual arts literature music and performance As Shevelenko shows it was the rejection of the Russian westernized tradition informed by the revival of populist sensibilities across the educated class that played a formative role in the development of Russian modernist agendas particularly after the 1905 revolution Russian Archaism reveals the modernist artistic enterprise as a crucial source of insight into Russia s political and cultural transformation in the early twentieth century and beyond Visualizing Russia Cynthia Hyla Whittaker,2010-07-14 The Romantic search for a national past was a European preoccupation in the first half of the nineteenth century In Russia this process led to the formation of the Russian style that has to today so captivated the world s imagination While the manifestations of this style are easily recognizable in gleaming gilt vibrant colors onion domes peasant costume and tsarist regalia hardly anyone has realized the pioneering and defining role that Fedor Solntsev 1801 1892 played in the development of a Russian national aesthetic This book rescues Solntsev from obscurity and celebrates his major contributions to the arts archaeology architecture ethnography icon painting restoration work and Russian nationalist ideology as well as place his work in a general European context Contributors include Marc Raeff Wendy Salmond Richard Wortman Anne Odom Irina Bogatskaia Marina Evtushenko Olenka Pevny Irina Reyfman Nathaniel Knight Lauren M O Connell and J Robert Wright **China's Military Modernization** Richard D. Fisher, Jr.,2008-09-30 China s rise to global

economic and strategic eminence with the potential for achieving pre eminence in the greater Asian region is one of the defining characteristics of the post Cold War period This work offers a basic understanding of the military strategic basis and trajectory of a rising China provides background and outlines current and future issues concerning China s rise in strategic military influence The next decade may witness China s assertion of military or strategic pressure on Japan the Korean Peninsula India the South China Sea the Taiwan Strait Central Asia or even on behalf of future allies in Africa and Latin America While conflict is not a foregone conclusion as indicated by China s increasing participation in many benign international organizations it is a fact that China s leadership will pursue its interests as it sees them which may not always coincide with those of the United States its friends and allies Until now no single volume has existed that provides an authoritative comprehensive and concise description of China s evolving geo strategy or of how China is transforming its military to carry out this strategy Fisher examines how China s People s Liberation Army PLA remains critical to the existence of the Chinese Communist government and looks at China s political and military actions designed to protect its expanded strategic interests in both the Asia Pacific and Central to Near Asian regions Using open sources including over a decade of unique interview sources Fisher documents China s efforts to build a larger nuclear force that may soon be protected by missile defenses modern high technology systems for space air and naval forces and how China is now beginning to assemble naval air and ground forces for future power projection missions His work also examines how the United States and other governments simultaneously seek greater engagement with China on strategic concerns while hedging against its rising power Although China faces both internal and external constraints on its rise to global eminence it cannot be denied that China s government is pursuing a far reaching strategic agenda Hearing on Military Modernization and Cross-strait Balance U.S.-China Economic and Security Review Commission,2004
