The Rise of the Fiscal State in Europe c.1200-1815 Richard Bonney, 1999-09-02 In this volume an international team of scholars builds up a comprehensive analysis of the fiscal history of Europe over six centuries It forms a fundamental starting point for an understanding of the distinctiveness of the emerging European states and highlights the issue of fiscal power as an essential prerequisite for the development of the modern state The study underlines the importance of technical developments by the state its capacity to innovate and however imperfect the techniques the greater detail and sophistication of accounting practice towards the end of the period New taxes had been developed new wealth had been tapped new mechanisms of enforcement had been established In general these developments were made in western Europe the lack of progress in some fiscal systems especially those in eastern Europe is an issue of historical importance in its own right and lends particular significance to the chapters on Poland and Russia By the eighteenth century mountains of debt and high debt revenue ratios had become the norm in western Europe yet in the east only Russia was able to adapt to the western model by 1815 The capacity of governments to borrow and the interaction of the constraints on borrowing and the power to tax had become the real test of the fiscal powers of the modern state by 1800 15 Karl W. Ryavec, 2005 This unique study provides an original nitty gritty view of the true nature and operation of Russia's state bureaucracy from the imperial period to the present including the Putin presidency The only book length exploration of the problems and deficiencies of Russian bureaucracy since tsarist times this detailed work sheds important new light on Russian public administration an often overlooked but key barrier to Russian normalization and democratization

Russia Geoffrey A. Hosking, 1997 The Soviet Union crumbles and Russia rises from the rubble once again the great nation a perfect scenario but for one point Russia was never a nation And this says the eminent historian Geoffrey Hosking is at the heart of the Russians dilemma today as they grapple with the rudiments of nationhood His book is about the Russia that never was a three hundred year history of empire building at the expense of national identity Russia begins in the sixteenth century with the inception of one of the most extensive and diverse empires in history Hosking shows how this undertaking the effort of conquering defending and administering such a huge mixture of territories and peoples exhausted the productive powers of the common people and enfeebled their civic institutions Neither church nor state was able to project an image of Russian-ness that could unite elites and masses in a consciousness of belonging to the same nation Hosking depicts two Russias that of the gentry and of the peasantry and reveals how the gap between them widened by the Tsarist state's repudiation of the Orthodox messianic myth continued to grow throughout the eighteenth and nineteenth centuries Here we see how this myth on which the empire was originally based returned centuries later in the form of the revolutionary movement which eventually swept

away the Tsarist Empire but replaced it with an even more universalist one Hosking concludes his story in 1917 but shows how the conflict he describes continues to affect Russia right up to the present day *Innovation and the Arms Race* Matthew Evangelista, 2023-08-15 *Innovation and the Arms Race* investigates the causes and mechanisms of the technological arms race between the United States and the Soviet Union Challenging the commonly held notion that Soviet weapons innovation processes simply mirror those of the United States Matthew Evangelista shows that the United States usually leads in introducing new military technology while the Soviets typically react to American initiatives Evangelista bases his study of pivotal nuclear weapons development decisions on a variety of US and USSR primary sources including the memoirs of weapons designers and scientists declassified intelligence analyses Soviet Academy of Science documents and Nikita Khrushchev's taped reminiscences He finds that in the United States impetus for innovation comes from the bottom at the initiative of corporate or government researchers and military officials whereas the centralized Soviet system produces innovations from the top in response to foreign developments A revelatory analysis of US military policy Soviet American relations and weaponry development *Innovation and the Arms Race* bears lessons for the study of great power competition and military innovation today **Portraits of Old Russia** Donald Ostrowski, Marshall T. Poe, 2015-07-17 This book introduces readers to a little known place and time in world history early modern Russia from its beginnings as Muscovy in the fourteenth century through the reign of Peter I 1689-1725 by portraying the lives of representative individuals from the major levels of the society of that era The portraits written by professional historians are imaginative reconstructions or composites of individual lives rather than biographies The portraits are arranged into socio-political categories and include members of ruling families government servitors clerks military personnel church prelates monks provincial landowners townspeople and artisans Siberian explorers and traders free peasants serfs slaves and holy fools Using these portraits the book brings old Russian society to life in an interesting way **Crime and Punishment in Early Modern Russia** Nancy Kollmann, 2012-10-11 This is a magisterial account of the day to day practice of Russian criminal justice in the seventeenth and early eighteenth centuries Nancy Kollmann contrasts Russian written law with its pragmatic application by local judges arguing that this combination of formal law and legal institutions with informal flexible practice contributed to the country's social and political stability She also places Russian developments in the broader context of early modern European state building strategies of governance and legal practice She compares Russia's rituals of execution to the spectacles of suffering of contemporary European capital punishment and uncovers the dramatic ways in which even the tsar himself complying with Moscow's ideologies of legitimacy bent to the moral economy of the crowd in moments of uprising Throughout the book assesses how criminal legal practice used violence strategically administering horrific punishments in some cases and in others accommodating with local communities and popular concepts of justice **Lessons from the Failure of the Communist Economic System** Ladislav Rusmich, Stephen M. Sachs, 2004-04-01 Why have the neoliberal economic

programs aimed at transforming Eastern Europe to a market economy and democracy since 1989 not only experienced unanticipated difficulties but more importantly failed to achieve their expected progress Dr Ladislav Rusmich and Dr Stephen M Sachs offer a comprehensive and critical study that examines this specific question and concludes that the cultural and institutional conditions created by communism must be overcome in order to critique previous policies and propose a better direction Drawing on the experiences of Dr Rusmich who for many years was an important participant in the communist economic apparatus and who is also among the leaders attempting to reform it during the Prague Spring of 1968 this work corrects common misconceptions among mainstream economists about the workings of communist economies Lessons from the Failure of the Communist Economic System is a first hand expert account that provides useful economic lessons applicable to the first world concerning such topics as the role of power in the economy monopoly bureaucracy market culture and ethics to name a few

God, Tsar, and People Daniel B. Rowland, 2020-11-15 God Tsar and People brings together in one volume essays written over a period of fifty years using a wide variety of evidence texts icons architecture and ritual to reveal how early modern Russians 1450 1700 imagined their rapidly changing political world This volume presents a more nuanced picture of Russian political thought during the two centuries before Peter the Great came to power than is typically available The state was expanding at a dizzying rate and atop Russia's traditional political structure sat a ruler who supposedly reflected God's will The problem facing Russians was that actual rulers seldom or never exhibited the required perfection Daniel Rowland argues that this contradictory set of ideas was far less autocratic in both theory and practice than modern stereotypes would have us believe In comparing and contrasting Russian history with that of Western European states Rowland is also questioning the notion that Russia has always been and always viewed itself as an authoritarian country God Tsar and People explores how the Russian state in this period kept its vast lands and diverse subjects united in a common view of a Christian polity defending its long frontier against powerful enemies from the East and from the West
