**The Russian Orthodox Community in Hong Kong** Loretta E. Kim, Chengyi Zhou, 2021-08-23 Hong Kong has been a unique society from its establishment as a political region separate from mainland China in the nineteenth century under British colonial rule until the present day as a special administrative region of the People's Republic of China. A hub of interregional and international migration it has been the temporary and long term home of people belonging to many racial, ethnic and cultural groups. This book examines the evolution of the community established by clergy and congregants of the Russian Orthodox Church. This community was first developed in the 1930s and then revived after a hiatus of over two decades from the 1970s to the 1990s with the founding of the Orthodox Parish of Apostles Saints Peter and Paul (OPASPP) at the turn of the twenty-first century. This study demonstrates how the OPASPP has become a vital provider of knowledge about Russian language and culture as well as a religious institution serving both heritage and convert believers. The community formed by and around the OPASPP is important to foster Sino-Russian relations based on individual to individual contact and mutual exposure to Chinese and Russian cultures in a region of China which allows spiritual and social diversity with minimal political constraints.

**Large Language Models in Cybersecurity** Andrei Kuchavy, Octave Plancherel, Valentin Mulder, Alain Mermoud, Vincent Lenders, 2024-05-31 This open access book provides cybersecurity practitioners with the knowledge needed to understand the risks of the increased availability of powerful large language models (LLMs) and how they can be mitigated. It attempts to outrun the malicious attackers by anticipating what they could do. It also alerts LLM developers to understand their work's risks for cybersecurity and provides them with tools to mitigate those risks. The book starts in Part I with a general introduction to LLMs and their main application areas. Part II collects a description of the most salient threats LLMs represent in cybersecurity: be they as tools for cybercriminals or as novel attack surfaces if integrated into existing software. Part III focuses on attempting to forecast the exposure and the development of technologies and science underpinning LLMs as well as macro levers available to regulators to further cybersecurity in the age of LLMs. Eventually in Part IV mitigation techniques that should allow safe and secure development and deployment of LLMs are presented. The book concludes with two final chapters in Part V: one speculating what a secure design and integration of LLMs from first principles would look like and the other presenting a summary of the duality of LLMs in cyber security. This book represents the second in a series published by the Technology Monitoring (TM) team of the Cyber Defence Campus. The first book entitled *Trends in Data Protection and Encryption Technologies* appeared in 2023. This book series provides technology and trend anticipation for government, industry and academic decision makers as well as technical experts.

unifying role of the Russian language for developing transnational connections and show its value in the knowledge economy They demonstrate that centrifugal developments of Russian and its pluricentricity are grounded in the language and education policies of their host countries as well as the goals and functions of cultural institutions such as schools media travel agencies and others created by migrants for their co-ethnics This book also reveals the tensions between Russia's attempts to homogenize the Russian world and the divergence of regional versions of Russian reflecting cultural hybridity of the diaspora Interdisciplinary in its approach this book will prove useful to researchers of Russian and post-Soviet politics Russian studies Russian language and culture linguistics and immigration studies Those studying multilingualism and heritage language teaching may also find it interesting      **Nationalism** Liah Greenfeld,1992 Nationalism is a movement and a state of mind that brings together national identity consciousness and collectivities A five-country study that spans five hundred years this historically oriented work in sociology bids well to replace all previous works on the subject
