American Women Photographers Martha Kreisel, 1999-02-28 American women have made significant contributions to the field of photography for well over a century This bibliography compiles more than 1,070 sources for over 600 photographers from the 1880s to the present As women's role in society changed so did their role as photographers In the early years women often served as photographic assistants in their husbands' studios The photography equipment initially heavy and difficult to transport was improved in the 1880s by George Eastman's innovations With the lighter camera equipment photography became accessible to everyone Women photographers became journalists and portraitists who documented vanishing cultures and ways of life Many of these important female photographers recorded life in the growing Northwest and the streets of New York City became pioneers of historic photography as they captured the plight of Americans fleeing the Dust Bowl and the horrors of the concentration camps and were members of the Photo Secessionist Movement to promote photography as a true art form This source serves as a checklist for not only the famous but also the less familiar women photographers who deserve attention

Art of Illusion Dan Karlholm, 2006 To survey art history as a whole was a pressing task for a generation of German scholars around the mid nineteenth century Their projections of a historicist chain of artworks ranged from textual narratives without illustrations to separate picture compendia as well as images of a more allegorical kind Other means with which to picture art history as part of a virtually all encompassing cultural history were the museums of art erected in Germany at the time in Berlin and Munich especially This book deals with practices of
