S Z Mitchell The Electrical Industry:

S. Z. Mitchell and the Electrical Industry Sidney Alexander Mitchell, 1960 Technology and Transformation in the American Electric Utility Industry Richard F. Hirsh, 2003-11-20 This book illuminates the role of technological stagnation in the decline of the American electric utility industry in the late 1960s and 1970s Unlike other interpreters of the industry's woes Professor Hirsh argues that a long and successful history of managing a conventional technology set the stage for the industry's deterioration After improving steadily for decades the technology that brought unequalled productivity growth to the industry appeared to stall in the late 1960s making it impossible to mitigate the economic and regulatory assaults of the 1970s Unfortunately most managers did not recognize or did not want to believe the severity of the technological problems they faced and they chose to focus instead on issues usually financial or public relations that appeared more manageable Partly as a result of this lack of attention to technological issues the industry found itself in the 1980s challenged by the prospects of deregulation and restructuring

The Wired Northwest Paul W. Hirt, 2012-10-18 The Pacific Northwest holds an abundance of resources for energy production from hydroelectric power to coal nuclear power wind turbines and even solar panels But hydropower is king Dams on the Columbia Snake Fraser Kootenay and dozens of other rivers provided the foundation for an expanding regionally integrated power system in the U S Northwest and British Columbia A broad historical synthesis chronicling the region's first century of electrification Paul Hirt's new study reveals how the region's citizens struggled to build a power system that was technologically efficient financially profitable and socially and environmentally responsible Hirt shows that every energy source comes with its share of costs and benefits Because Northwest energy development meant river development the electric power industry collided with the salmon fishing industry and the treaty rights of Northwest indigenous peoples from the 1890s to the present Because U S federal agencies like the Army Corps of Engineers and the U S Bureau of Reclamation built many of the large dams in the region a significant portion of the power supply is publicly owned initiating contentious debates over how that power should best serve the citizens of the region Hirt dissects these ongoing battles evaluating the successes and failures of regional efforts to craft an efficient yet socially just power system Focusing on the dynamics of problem solving governance and the tense relationship between profit seeking and the public interest Hirt's narrative takes in a wide range of players not only on the consumer side where electricity transformed mills mines households commercial districts urban transit factories and farms but also power companies operating at the local and regional level and investment companies that financed and in some cases parasitized the operators His study also straddles the international border It is the first book to compare energy development in the U S Northwest and British Columbia Both engaging and balanced in its treatment of all the actors on this expansive stage The Wired Northwest helps us better understand the challenges of the twenty first century as we try to learn from past mistakes and re design an energy grid for a more sustainable future

The Free-standing Company in the World Economy,

1830-1996 Mira Wilkins, Harm G. Schröter, 1998 Free standing companies are a special type of multinational enterprise that proliferated in the late nineteenth and early twentieth centuries some persisted into later years few remain today Many were headquartered in the United Kingdom but important free standing companies had headquarters in the other capital rich nations This book explores the history of the free standing company the theoretical implications of the concept comparisons with the American model multinational enterprise the validity of the concept and its contribution to the understanding of modern economic history Leading international scholars economists and historians provide evidence on and analysis of the operations of free standing companies in different parts of the world This is the first book on the much discussed topic of free standing companies The volume will provide a rich quarry for those interested in world economic history regional and national economic histories in the spread of international business and in the different forms that multinational enterprises take through time Industrial Development and Manufacturers Record ,1922 Beginning in 1956 each vol includes as a regular number the Blue book of southern progress and the Southern industrial directory formerly issued separately

Proceedings at the Convention: Gen'l National Electric Light Association,1920 **Publications of the National Electric Light Association.-** ,1924 **Electrical Installation Record** ,1923 **Electrical Record and Buyer's Reference** ,1922 *Central Station* ,1920 Coordination and Information Naomi R. Lamoreaux, Daniel M. G. Raff, 2007-12-01 Case studies that examine how firms coordinate economic activity in the face of asymmetric information information not equally available to all parties are the focus of this volume In an ideal world the market would be the optimal provider of coordination but in the real world of incomplete information some activities are better coordinated in other ways Divided into three parts this book addresses coordination within firms at the borders of firms and outside firms providing a picture of the overall incidence and logic of economic coordination The case studies drawn from the late nineteenth and early twentieth century when the modern business enterprise was evolving address such issues as the relationship between coordination mechanisms and production techniques the logic of coordination in industrial districts and the consequences of regulation for coordination Continuing the work on information and organization presented in the influential *Inside the Business Enterprise* this book provides material for business historians and economists who want to study the development of the dissemination of information and the coordination of economic activity within and between firms Utility Corporations United States. Federal Trade Commission, 1930 **National Electragist** ,1922 *Networks of Power* Thomas Parke Hughes, 1993-03 Awarded the Dexter Prize by the Society for the History of Technology this book offers a comparative history of the evolution of modern electric power systems It described large scale technological change and demonstrates that technology cannot be understood unless placed in a cultural context *Electrical Merchandising Week* ,1926 Includes annually 1961 Home goods data book Private Electric Utilities' Organized Efforts to Influence the Secretary of the Interior United States.
