Saab Aircraft Since 1937:

SAAB Aircraft Since 1937 Hans G. Andersson, 1989 Though the Swedish aircraft industry can be traced back to the years before the First World War it was the establishment of Saab in 1937 which laid the solid foundations for a Swedish industry capable of producing world standard airplanes which often were in advance of those designed elsewhere The Saab 17 single engined and the Saab 18 twin engined bombers were the company's first products But it was the appearance of the brilliant Draken and Viggen which established Saab's reputation for producing outstanding world class airplanes Today the Saab 340 airliner is widely used having secured the international markets which eluded the Scandia Since the first edition was published in 1989 the JAS 39 Gripen has gone into full production and the decision has been made to go ahead with the Saab 2000 the larger version of the successful 340 The Nation's Hangar F. Robert van der Linden, 2012-11-06 The Nation's Hangar Aircraft Treasures of the Smithsonian offers a fascinating textual and visual history of civilian military and commercial aviation from the earliest balloon flights to today's most advanced aircraft The Nation's Hangar charts the awe inspiring history of flight around the world F Robert Van Der Linden a Smithsonian curator and leading expert on aviation history explains the fascinating stories behind aviation's great technological advances and provides historic and social context that highlights the many ways in which these innovations have changed the course of human history The Nation's Hangar is also a visual delight The Smithsonian aircraft collection has never looked so compelling and sleek The Nation's Hangar is a must have for that fly boy or fly girl in your flight pattern Early Jet Fighters, 1944-1954 Leo Marriott, 2020-03-30 A clearly written profusely illustrated and well organized volume on Soviet and European jet fighter design Air Power History In his previous book on early jet fighters Leo Marriott traced the history of the revolutionary aircraft produced by the British and Americans immediately after the Second World War Now in this companion volume he describes jet fighter development on the continent of Europe and in the Soviet Union during the same remarkable period Using over 200 archive photographs he covers the pioneering German designs then the range of experimental and operational fighters constructed by the Soviets the French and the Swedes The sheer variety of the designs that manufacturers came up with during this short intense period of innovation make for fascinating reading Several of the most famous jet fighters feature prominently in the rare photographs and are analyzed in the expert text including the Messerschmitt Me 262 the Heinkel He 162 the MiGs 15 17 and 19 the Dassault Ouragan and the Saab J29 But perhaps the most rewarding aspect of the book is its record of experimental projects testing new concepts that rapidly became established elements of jet aircraft design The photographs of these largely forgotten aircraft give us an insight into the extraordinary technical challenges and the ambition and inventiveness of the designers and manufacturers who overcame them **International Warbirds** John C. Fredriksen, 2001-08-01 In depth descriptions and photographs of the aircraft of 21 nations presented with a unique human dimension that goes behind the machines to the people involved Invaluable for
