Sacred Natural Sites are the world's oldest protected places. This book focuses on a wide spread of both iconic and lesser known examples such as sacred groves of the Western Ghats India, Sagarmatha Chomolungma Mt Everest Nepal Tibet and China, the Golden Mountains of Altai Russia, Holy Island of Lindisfarne UK and the sacred lakes of the Niger Delta Nigeria. The book illustrates that sacred natural sites although often under threat exist within and outside formally recognised protected areas, heritage sites. Sacred natural sites may well be some of the last strongholds for building resilient networks of connected landscapes. They also form important nodes for maintaining a dynamic socio cultural fabric in the face of global change. The diverse authors bridge the gap between approaches to the conservation of cultural and biological diversity by taking into account cultural and spiritual values together with the socio economic interests of the custodian communities and other relevant stakeholders.

**The Changing World Religion Map** Stanley D. Brunn, 2015-02-03. This extensive work explores the changing world of religions, faiths and practices. It discusses a broad range of issues and phenomena that are related to religion including nature ethics, secularization, gender and identity. Broadening the context, it studies the interrelation between religion and other fields including education, business, economics and law. The book presents a vast array of examples to illustrate the changes that have taken place and have led to a new world map of religions. Beginning with an introduction of the concept of the changing world religion map, the book first focuses on nature ethics and the environment. It examines humankind's eternal search for the sacred and discusses the emergence of green religion as a theme that cuts across many faiths. Next, the book turns to the theme of the pilgrimage, illustrated by many examples from all parts of the world. In its discussion of the interrelation between religion and education, it looks at the role of missionary movements. It explains the relationship between religion, business, economics and law by means of a discussion of legal and moral frameworks and the financial and business issues of religious organizations. The next part of the book explores the many new faces that are part of the religious landscape and culture of the Global North: Europe, Russia, Australia and New Zealand, the U.S. and Canada, and the Global South: Latin America, Africa and Asia. It does so by looking at specific population movements, diasporas and the impact of globalization. Caves have been used in various ways across human society but despite the persistence within popular culture of the iconic caveman deep caves were never used primarily as habitation sites for early humans Rather in both ancient and contemporary contexts caves have served primarily as ritual spaces In Sacred Darkness contributors use archaeological evidence as well as ethnographic studies of modern ritual practices to envision the cave as place of spiritual and ideological power and a potent venue for ritual practice Covering the ritual use of caves in Europe Asia Australia Africa Mesoamerica and the US Southwest and Eastern woodlands this book brings together case studies by prominent scholars whose research spans from the Paleolithic period to the present day These contributions demonstrate that cave sites are as fruitful as surface contexts in promoting the understanding of both ancient and modern religious beliefs and practices This state of the art survey of ritual cave use will be one of the most valuable resources for understanding the role of caves in studies of religion sacred landscape or cosmology and a must read for any archaeologist interested in caves **The Heritage Corridor** Denis Byrne,2021-10-14 The Heritage Corridor argues for a transnational approach to investigating and recording heritage places that emerge from histories of migration Addressing the material legacy of migration this book also relates it to issues of contemporary importance Presenting an image of the built environment of migration as one shaped by the ongoing flows of

people ideas objects and money that circulate through migration corridors Byrne proposes that houses and other structures built by migrants in their home villages in China over the period 1840 1940 should be seen as crystallisations of the labour aspirations and longings enacted and experienced by their builders while overseas Demonstrating that the material world of the migrant is distributed across transnational space the book calls for an approach to the heritage of migration that is similarly expansive It proposes and illustrates new methods and strategies for heritage practice The Heritage Corridor is a book for scholars and students in the fields of critical heritage studies migration studies and Chinese diasporic mobilities It is designed to be accessible to heritage practitioners readers with an interest in the material worlds of migration past and present and to all those with an interest in the archaeology of transnational migration
