Hermann Kurz' sämtliche werke in zwölf bänden Hermann Kurz,1904 **Lessings sämtliche Werke in zwanzig Bänden** Gotthold Ephraim Lessing,1899 **Rainer Maria Rilke, 1893-1908: Poetry as Process - A Poetics of Becoming** Ben Hutchinson,2017-12-02 Rainer Maria Rilkes early verse is often seen as having little relevance to the great achievement of the middle years the Neue Gedichte Yet the very different styles of the juvenilia and this new maturity are united by a preoccupation with processes of motion and growth which governs both his life and work In this meticulous philological study Ben Hutchinson reassesses every level of Rilkes early poetry from its motives and metaphors to its very grammar and syntax in order to trace what he terms a poetics of becoming With careful attention to rhythm resonance and linguistic detail he illuminates both the hidden patterns of the poetry and the artistic context of the fin de siecle From its roots in the intellectual climate of the 1890s to the poems inspired by Rodin in 1908 Rilkes stylistic development is set against the surprising consistency with which he pursues this poetics of becoming **Sämtliche Werke in zwölf Bänden** Heine,1887 **Schillers sämtliche Werke in zwölf Bänden** Friedrich von Schiller,1890 *The Oxford Handbook of the History of Ethics* Roger Crisp,2013-01-31 Philosophical ethics consists in the human endeavour to answer rationally the fundamental question of how we should live The Oxford Handbook of the History of Ethics explores the history of philosophical ethics in the western tradition from Homer until the present day It provides a broad overview of the views of many of the main thinkers schools and periods and includes in addition essays on topics such as autonomy and impartiality The authors are international leaders in their field and use their expertise and specialist knowledge to illuminate the relevance of their work to discussions in contemporary ethics The essays are specially written for this volume and in each case introduce the reader to the main lines of interpretation and criticism that have arisen in the professional history of philosophy over the past two or three decades **Deutscher Universitäts-kalender** ,1910 *Brill's Companion to Propertius* Hans-Christian Günther,2006-07-01 The present volume provides a comprehensive guide to one of the most difficult authors of classical antiquity All the major aspects of Propertius work its themes the poetical technique its sources and models as well as the history of Propertian scholarship and the vexed problems of textual criticism are dealt with in contributions by Joan Booth James Butrica Francis Cairns Elaine Fantham Paolo Fedeli Adrian Hollis Peter Knox Robert Maltby Tobias Reinhardt and Richard Tarrant due space is also given to the reception of the author from antiquity and the renaissance Simona Gavinelli up to the modern age Bernhard Zimmermann At the centre stands an interpretation of the four transmitted books by Gesine Manuwaldt Hans Peter Syndikus John Kevin Newman and Hans Christian G nther German Thought and Culture Hans Joachim Hahn,1995 From the late eighteenth century to the early twentieth century Liverpool was frequently referred to as the second city of the empire Yet the role of Liverpool within the British imperial system and the impact on the city of its colonial connections remain underplayed in recent writing on both Liverpool and the empire

However inconvenient this may prove this specially commissioned collection of essays demonstrates that the imperial dimension deserves more prevalence in both academic and popular representations of Liverpool's past. Indeed if Liverpool does represent the World in One City the slogan for Liverpool's status as European Capital of Culture in 2008 it could be argued that this is largely down to Merseyside's long term interactions with the colonial world and the legacies of that imperial history. In the context of Capital of Culture year and growing interest in the relationship between British provincial cities and the British empire this book will find a wide audience amongst academics, students and history enthusiasts generally.

The countries of the larger region of Eastern Europe pass through change and modernization processes with ambivalent effects. This book tackles aspects of cultural diversity and change in the Baltic States in Southeast Europe and in the Southern Caucasus. These regions are diverse not only with regard to their historical, political and religious traditions but also with regard to their status as EU members or non members. The articles focus on the situation of ethnic minorities and related political and public discourses as well as on aspects of political cultures. The anthology also raises the topic of cleavages between geographic Eastern Europe and Europe's reunited part.

Arthur Schopenhauers sämtliche Werke in zwölf Bänden Arthur Schopenhauer, 1894 *German Nationalism and Indian Political Thought* Alexei Pimenov, 2020-01-22

This book examines the influence of Indian socio-political thought, ideas and culture on German Romantic nationalism. It suggests that contrary to the traditional view that the concepts of nationalism have moved exclusively from the West to the rest of the world, in the crucial case of German nationalism the essential intellectual underpinnings of the nationalist discourse came to the West not from the West. The book demonstrates how the German Romantic fascination with India resulted in the adoption of Indian models of identity and otherness and ultimately shaped German Romantic nationalism. The author illustrates how Indian influence renovated the scholarly design of German nationalism and at the same time became central to pre-modern and pre-nationalist models of identity which later shaped the Aryan myth. Focusing on the scholarship of Friedrich Schlegel, Otmar Frank, Joseph Goerres and Arthur Schopenhauer, the book shows how in explaining the fact of the diversity of languages, peoples and cultures the German Romantics reproduced the Indian narrative of the degradation of some Indo-Aryan clans which led to their separation from the Aryan civilization. An important resource for the nexus between Indology and Orientalism, German Indian Studies and
