Scientific Temperaments Three Lives In Contemporary Science:

Scientific Temperaments Philip J. Hilts, 1984 **Beyond the Science Wars** Ullica Christina Olofsdotter Segerstråle, Ullica Segerstråle, 2000-08-03 Contextualizes the Science Wars from interdisciplinary sociological historical scientific political and cultural perspectives *The Baltimore Case* Daniel J. Kevles, 2016-03-10 You read with a rising sense of despair and outrage and you finish it as if awakening from a nightmare only Kafka could have conceived Christopher Lehmann Haupt New York Times David Baltimore won the Nobel Prize in medicine in 1975 Known as a wunderkind in the field of immunology he rose quickly through the ranks of the scientific community to become the president of the distinguished Rockefeller University Less than a year and a half later Baltimore resigned from his presidency citing the personal toll of fighting a long battle over an allegedly fraudulent paper he had collaborated on in 1986 while at MIT From the beginning the Baltimore case provided a moveable feast for those eager to hold science more accountable to the public that subsidizes its research Did Baltimore stonewall a legitimate government inquiry Or was he the victim of witch hunters The Baltimore Case tells the complete story of this complex affair reminding us how important the issues of government oversight and scientific integrity have become in a culture in which increasingly complicated technology widens the divide between scientists and society Gaither's Dictionary of Scientific Quotations Carl C. Gaither, Alma E.

Cavazos-Gaither, 2012-01-05 This unprecedented collection of 27 000 quotations is the most comprehensive and carefully researched of its kind covering all fields of science and mathematics With this vast compendium you can readily conceptualize and embrace the written images of scientists laymen politicians novelists playwrights and poets about humankind s scientific achievements Approximately 9000 high quality entries have been added to this new edition to provide a rich selection of quotations for the student the educator and the scientist who would like to introduce a presentation with a relevant quotation that provides perspective and historical background on his subject Gaither s Dictionary of Scientific Quotations Second Edition provides the finest reference source of science quotations for all audiences The new edition adds greater depth to the number of quotations in the various thematic arrangements and also provides new thematic categories

The Scientific Life Steven Shapin, 2009-08-01 Who are scientists What kind of people are they What capacities and virtues are thought to stand behind their considerable authority They are experts indeed highly respected experts authorized to describe and interpret the natural world and widely trusted to help transform knowledge into power and profit But are they morally different from other people The Scientific Life is historian Steven Shapin s story about who scientists are who we think they are and why our sensibilities about such things matter Conventional wisdom has long held that scientists are neither better nor worse than anyone else that personal virtue does not necessarily accompany technical expertise and that scientific practice is profoundly impersonal Shapin however here shows how the uncertainties attending scientific research make the virtues of individual researchers intrinsic to scientific work From the early twentieth century origins of corporate

research laboratories to the high flying scientific entrepreneurship of the present Shapin argues that the radical uncertainties of much contemporary science have made personal virtues more central to its practice than ever before and he also reveals how radically novel aspects of late modern science have unexpectedly deep historical roots His elegantly conceived history of the scientific career and character ultimately encourages us to reconsider the very nature of the technical and moral worlds in which we now live Building on the insights of Shapin's last three influential books featuring an utterly fascinating cast of characters and brimming with bold and original claims *The Scientific Life* is essential reading for anyone wanting to reflect on late modern American culture and how it has been shaped Superconducting Super Collider, 1988 *Epistemic Virtues in the Sciences and the Humanities* Jeroen van Dongen, Herman Paul, 2017-12-07 This book explores how physicists astronomers chemists and historians in the late nineteenth and early twentieth centuries employed epistemic virtues such as accuracy objectivity and intellectual courage In doing so it takes the first step in providing an integrated history of the sciences and humanities It assists in addressing such questions as What kind of perspective would enable us to compare organic chemists in their labs with paleographers in the Vatican Archives or anthropologists on a field trip with mathematicians poring over their formulas While the concept of epistemic virtues has previously been discussed primarily in the contexts of the history and philosophy of science this volume is the first to enlist the concept in bridging the gap between the histories of the sciences and the humanities Chapters research whether epistemic virtues can serve as a tool to transcend the institutional disciplinary boundaries and thus help to attain a post disciplinary historiography of modern knowledge Readers will gain a contextualization of epistemic virtues in time and space as the book shows that scholars themselves often spoke in terms of virtue and vice about their tasks and accomplishments This collection of essays opens up new perspectives on questions discourses and practices shared across the disciplines even at a time when the neo Kantian distinction between sciences and humanities enjoyed its greatest authority Scholars including historians of science and of the humanities intellectual historians virtue epistemologists and philosophers of science will all find this book of particular interest and value Language Beyond Postmodernism Eugene Gendlin, 1997-08-20 Eugene Gendlin's contribution to the theory of language is the focus of this collection of essays edited by David Michael Levin This compilation of critical studies each followed by a comment from Gendlin himself investigates how concepts grow out of experience and explores relations between Gendlin's philosophy of language and experience and the philosophies of Wittgenstein Dilthey and Heidegger

The Billion-Dollar Molecule Barry Werth, 2013-08-20 Join journalist Barry Werth as he pulls back the curtain on Vertex a start up pharmaceutical company and witness firsthand the intense drama being played out in the pioneering and hugely profitable field of drug research Founded by Joshua Boger a dynamic Harvard and Merck trained scientific whiz kid Vertex is dedicated to designing atom by atom both a new life saving immunosuppressant drug and a drug to combat the virus that causes AIDS You will be hooked from start to finish as you go from the labs where obsessive fiercely competitive scientists struggle for a breakthrough to Wall Street where the wheeling and dealing takes on a life of its own as Boger courts investors and finally decides to take Vertex public Here is a fascinating no holds barred account of the business of science which includes an updated epilogue about the most recent developments in the quest for a drug to cure AIDS

Scientifically Speaking C.C. Gaither, Alma E Cavazos-Gaither, 2000-11-21 In these days of ever increasing specialization it is important to gain a broad appreciation of science Entertaining and informative Scientifically Speaking A Dictionary of Quotations Second Edition contains the words and wisdom of several hundred scientists writers philosophers poets and academics The largest compilation of published sci Fermilab Lillian Hoddeson, Adrienne W. Kolb, Catherine Westfall, 2009-08-01 Fermi National Accelerator Laboratory located in the western suburbs of Chicago has stood at the frontier of high energy physics for forty years Fermilab is the first history of this laboratory and of its powerful accelerators told from the point of view of the people who built and used them for scientific discovery Focusing on the first two decades of research at Fermilab during the tenure of the laboratory's charismatic first two directors Robert R Wilson and Leon M Lederman the book traces the rise of what they call megascience the collaborative struggle to conduct large scale international experiments in a climate of limited federal funding In the midst of this new climate Fermilab illuminates the growth of the modern research laboratory during the Cold War and captures the drama of human exploration at the cutting edge of science *Information Behaviour of Scientists and Engineers* M. S. Sridhar, 1995 **Role of Maps in Sci-Tech Libraries** Ellis Mount, 2020-06-04 Maps charts and related items present special problems to libraries for example a less organised bibliographic control mechanism more difficult means of acquisitions and problems of storage and preservation

This book first published in 1985 deals with these problems and presents practical solutions for maps in library collections

The Body in Pain: The Making and Unmaking of the World Elaine Scarry, 1985-09-26 Part philosophical meditation part cultural critique The Body in Pain is a profoundly original study that has already stirred excitement in a wide range of intellectual circles The book is an analysis of physical suffering and its relation to the numerous vocabularies and cultural forces literary political philosophical medical religious that confront it Elaine Scarry bases her study on a wide range of sources literature and art medical case histories documents on torture compiled by Amnesty International legal transcripts of personal injury trials and military and strategic writings by such figures as Clausewitz Churchill Liddell Hart and Kissinger She weaves these into her discussion with an eloquence humanity and insight that recall the writings of Hannah Arendt and Jean Paul Sartre Scarry begins with the fact of pain s inexpressibility Not only is physical pain enormously difficult to describe in words confronted with it Virginia Woolf once noted language runs dry it also actively destroys language reducing sufferers in the most extreme instances to an inarticulate state of cries and moans Scarry analyzes the political ramifications of deliberately inflicted pain specifically in the cases of torture and warfare and shows how to be fictive From these actions of unmaking Scarry turns finally to the actions of making the examples of artistic and cultural creation that work against pain and the debased uses that are made of it Challenging and inventive The Body in Pain is landmark work that promises to spark widespread debate

Cavendish Christa Jungnickel, Russell McCormack, 1996 The Cavendishes flourished during the high tide of British aristocracy following the revolution of 1688 89 and the case can be made that this aristocracy knew its finest hour when Henry Cavendish gently laid his delicate weights in the pan of his incomparable precision balance For this it took two generations and two kinds of invention one in social forms and the other in scientific technique This biography tells how it came to pass Book jacket

Interpreting Experience Ruthellen Josselson, Amia Lieblich, 1995-03-21 The focus of this book is on the role of narrative analysis in the social sciences and in increasing our understanding of human lives and experiences Contributors address such questions as Should in depth interviews become occasions in which to ask for life stories so as to enhance a study of social phenomena Can a richer approach to psychological understanding be reached by studying how experience conscious and unconscious is organized interpreted and reshaped throughout the life cycle How can biographical work be used to shed light on the social construction of individual lives In addition the book covers the use of narrative analysis in career biography in examining turning points in people s lives in the effe

Biographies of Scientists for Sci-Tech Libraries Tony Stankus, 2019-12-05 This book first published in 1991 is an invaluable guide to biographies of scientists from a wide variety of scientific fields The books selected for this highly descriptive bibliography help librarians shatter readers stereotypes of scientists as monomaniacal and uninteresting people by providing interesting and provocative titles to capture the interest of students and other readers The biographies included in this very special bibliography were carefully selected for their humour and human insights to give future scientists encouragement inspiration and an

understanding of the origins of particular scientific fields These biographies are unique in that they explore the whole personality of the scientist giving students a glimpse at the variety and drama of the lives beyond well known contributions or Nobel prize accomplishments

Conflicts of Interest in Science Sheldon Krinsky, 2019-01-29 30 Years of Peer Reviewed Studies on the Corporate Ties and Vested Interests that Influence Scientific Research For over 500 years groups and organizations with political economic and personal interests have successfully exercised influence on the pursuit of scientific inquiry and knowledge History is replete with examples like the Papal authority muddying research into studies of the cosmos but far less attention is paid today to the various corporate and special interest groups who through funding and lobbying efforts have been able to shape the modern academic and scientific landscape to fit their agenda In Conflicts of Interest Within Science author Sheldon Krinsky compiles 21 peer reviewed academic articles that examine the complex relationship between the individual scientists conducting research and the groups who fund them Ultimately Krinsky's call to action concerns a collective movement among authors peer reviewers corporations and journal editors to disclose the sources of their funding By holding scientists and the groups that fund them more accountable through increased transparency we as a society can begin to rebuild trust in the integrity of knowledge
