Death of a Scientist Michael G. Welham, Mike Welham, 2013 A Time for War When a President and a Prime Minister want to go to war to remove a dictator and gain control of his country's vast reserves of oil, they must gain public support. A threat from the dictator: President to use chemical and biological weapons gives them their reason. But the weapons inspectors just can't find the evidence that the country has such weapons. To counter this, a political dossier is created claiming the existence of weapons of mass destruction. A Time to Die Dr. John Finch, the world-renowned British specialist in chemical and biological weapons, is a member of a UN inspection team. He discovers that no such weapons exist; that the dossier is misleading and refuses to toe the political line. His actions do not stop the war, but it results in him becoming a target for a political assassination. Chuck Cornell, a member of the ultra-secret Black Eagles, is assigned the task, and Dr. Finch is his victim. When Dr. Finch is found dead in a wood, it looks like suicide, but somebody has tampered with the crime scene. Unidentified men are seen in the area, and unusual activity at the scene is observed. A Time for Justice To halt the media frenzy, a formal inquiry is set up, but vital witnesses are not called, and a political cover-up looks likely. The Excalibur Foundation, an organisation that seeks justice for political victims, decides to take up the case. They propose to hunt down Chuck Cornell themselves, and former French Foreign Legion sniper Dan Pierce is hired for the mission. During the operation to eliminate the Black Eagle, however, a political target comes into Dan's sights. Dan now holds the power to bring justice to the world; it's just a matter of squeezing the trigger

Reward and Punishment in Social Dilemmas Paul A.M. Van Lange, Bettina Rockenbach, Toshio Yamagishi, 2014-03-26 One of the key scientific challenges is the puzzle of human cooperation. Why do people help strangers, even sometimes at a major cost to themselves? Why do people want to punish others who violate norms and undermine collective interests? What are the emotions that accompany reward and punishment? Even if reward and punishment are effective, are they also efficient, knowing that rewards and punishment are costly to administer? In this book, the first in a series on human cooperation, authors explore the workings of reward and punishment, how they should be organized, and their functions in society, thereby providing a synthesis of the psychology, economics, and neuroscience of human cooperation
